and 4 between two and four months. Dr. Mosher says that the length of time patients should remain is still undetermined, and thinks that no definite rule can be established.

Dr. Mosher also remarks that the pavilion has demonstrated that mental patients of all classes may be received on voluntary request, and that only "a small minority resent the confinement and cannot be held."

Women nurses have been entrusted with the care of both men and women, an arrangement that is reported to have worked satisfactorily.

The experiment has been so successful that it is to be continued, and we urgently hope that similar additions may soon be made to British hospitals.

The Winsley Sanatorium for Consumptives.

The laying of the foundation stone of the Winsley Sanatorium for Consumptives was an opportunity for the expression, by those connected with, it of their recognition of the valuable services of a member of our Association, Dr. Lionel Weatherly.

The sanatorium is the result of a combined charitable effort of the counties of Gloucester, Wiltshire, and Somerset, and when complete is expected to supply sixty beds.

The *Western Daily Press*, in commenting on the opening ceremony, speaks of Dr. Weatherly as having been the "inspiring genius of the movement," and it is satisfactory to remember that this is said of the Chairman of the Tuberculosis Committee appointed by the Medico-Psychological Association.

A New Journal.

We have received notice from Cambridge that there is a project for starting an English journal devoted to psychology. The great increase in the number of workers in this department of science has overburdened the pages of *Mind*, and it is believed that there is now scope for a journal which will permit of the publication of important papers in regard to analytic, genetic, comparative, and experimental observations. The recent founding of new laboratories and the establishment of
