(Accepted 7 May 1985)

A HUNDRED YEARS AGO

"Crighton Royal Institution—The number of pauper patients has been kept down by the discharge of all who were fit to reside out of the asylum, and most of those discharged unrecovered were boarded out in private dwellings. This policy has been steadily pursued for the last few years, with the result that the number of pauper patients belonging to the district has fallen from 302 to 239."
