THE CLAY MINERALS SOCIETY

Purpose: To stimulate research and to disseminate information relating to all aspects of the science and technology of clays and other fine-grained minerals.

What the Society Does:

- Publishes the bimonthly international journal *Clays and Clay Minerals.*
- Sponsors annual Clay Minerals Conferences where research and invited review papers are presented in technical sessions and special symposia.
- Sponsors Field Trips to important occurrences of clays and Workshops on subjects of current interest in clay science at its annual meetings.
- Issues a quarterly Newsletter containing information about Society activities, related conferences, employment opportunities, and book notices.
- Sponsors a Source Clays Project designed to provide homogeneous clay samples for research purposes.
- Offers clay-related publications to members at a discount over publisher's list prices.

Why Join the Society:

Through its annual conferences and publications, The Clay Minerals Society offers the individual the best means of following the many-sided growth of clay science and of exchanging ideas and results with fellow scientists and technologists having widely different backgrounds and interests.

Who Should Join the Society:

Agronomists, Surface Chemists, Physicists, Geologists, Mineralogists, Sedimentologists, Economic Geologists, Soil Scientists, Rheologists, Colloid Chemists, Ceramists, Engineers, and all others interested in the science and technology of clays and other fine-grained minerals.
