INFECTION CONTROL AND HOSPITAL EPIDEMIOLOGY

A Creative Focus On Infection Control

The Hospital of the Good Samaritan is a major tertiary care teaching hospital located in downtown Los Angeles. We are acclaimed as Southern California's preeminent cardiothoracic surgery and critical care hospital, with the largest open heart surgery program in the state (over 2,000 per year). Added to that fact is the exciting growth of our neonatal ICU and orthopedic programs. Because of this expansion and the overall acuity of our patient population, our Infection Control Program has assumed greater importance. We are solidifying our commitment to this project with the addition of another full-time position.

Nurse Epidemiology Coordinator

The professional we are seeking will report to the Assistant Vice President Nursing Services, and will possess the following qualifications:

- Prior Infection Control / Quality Assurance experience and/or management experience in an acute care setting;
- Knowledge of epidemiology, infection control and/or risk management;
- The ability to translate, adapt and apply this knowledge at a level associated with a Master's degree in a health related field, or an equivalent combination of related education and experience;
- Excellent interpersonal skills.

(*CIC certification is preferred.*)

In exchange for your expertise, we will provide competitive salary (negotiable based upon experience), a comprehensive benefits package, and an environment that rewards excellence. *The Hospital will support educational needs for your success in this position.* Relocation assistance is also available for qualified candidates. If you are interested, we encourage you to call **Mary Ann O'Connor, Assistant Vice President Nursing Services at (213) 482-2744**, or send your resume to **The Hospital of the Good Samaritan, 616 S. Witmer St., Los Angeles, CA 90017.** *Equal Opportunity Employer.*

By adding 3 inches to our gloves, we've gone the extra mile when it comes to your protection.

By adding an extra 3 inches to the cuffs of our new MICRO-TOUCH* XP Latex Medical Gloves and insisting on 100 percent on-line visual inspection, we go the distance to assure you of extra protection and added strength. The kinds of quality you expect in Johnson & Johnson Medical, Inc. products.

Because your safety is important to us, we've added an extra 3 inches that can help prevent the possibility of cross contamination. Safety that is translated to our manufacturing process which produces gloves with quality standards that far exceed those recommended by the FDA.

That's important to you.

MICRO-TOUCH* XP Medical Gloves, three extra inches, a lot more protection and added strength.

For more information contact your Johnson & Johnson Medical, Inc., Medical Specialties Sales Representative or call 1-800-433-5009. All Johnson & Johnson Medical Gloves are made in the USA.
