visual neuroscience

Volume 29 **January 2012** **Number 1**

CONTENTS

Introduction

Jeffrey S. Diamond and Peter D. Lukasiewicz **1** Amacrine cells: Seeing the forest *and* the trees

Perspective

Richard H. Masland **3** The tasks of amacrine cells

Review Articles

Chi Zhang and Maureen A. McCall **11** Receptor targets of amacrine cells

Evanna Gleason **31** The influences of metabotropic receptor activation on cellular signaling and synaptic function in amacrine cells

William N. Grimes **41** Amacrine cell-mediated input to bipolar cells: Variations on a common mechanistic theme

Jonathan B. Demb and Joshua H. Singer **51** Intrinsic properties and functional circuitry of the AII amacrine cell

Kevin J. Ford and Marla B. Feller **61** Assembly and disassembly of a retinal cholinergic network

W.R. Taylor and R.G. Smith **71** The role of starburst amacrine cells in visual signal processing

https://doi.org/10.1017/S0952523812000399 Published online by Cambridge University Press

Volume 29 March 2012 Number 2

CONTENTS

Research Articles

Maren Engelhardt, Chinatsu Tosha, Vanda S. Lopes, Bryan Chen, Lisa Nguyen, Steven Nusinowitz, and David S. Williams **83** Functional and morphological analysis of the subretinal injection of retinal pigment epithelium cells

Nicole Bischoff, Benjamin Nickle, Thomas W. Cronin, Stephani Velasquez, and Jeffry I. Fasick **95** Deep-sea and pelagic rod visual pigments identified in the mysticete whales

Thorstein Seim, Arne Valberg, and Barry B. Lee **105** Visual signal processing in the macaque lateral geniculate nucleus

Masaki Yamamoto and Hiroshi Ando **119** Probabilistic models of state estimation predict visuomotor transformations during prism adaptation

Lori B. Daniels, David F. Nichols, Mathew S. Seifert, and Howard S. Hock **131** Changes in pupil diameter entrained by cortically initiated changes in attention

https://doi.org/10.1017/S0952523812000399 Published online by Cambridge University Press

Volume 29 **May 2012** **Number 3**

CONTENTS

Research Articles

Erica E. Rosenbaum, Kimberley S. Brehm, Eva Vasiljevic, Allen Gajeski, and Nansi Jo Colley **143** *Drosophila* GPI-mannosyltransferase 2 is required for GPI anchor attachment and surface expression of chaoptin

Carla J. Abbott, Kumiko A. Percival, Paul R. Martin, and Ulrike Grünert **157** Amacrine and bipolar inputs to midget and parasol ganglion cells in marmoset retina

John R. Jarvis and Christopher M. Wathes **169** Mechanistic modeling of vertebrate spatial contrast sensitivity and acuity at low luminance

Michal Vavrečka, Václav Gerla, Lenka Lhotská, and Martin Brunovský **183** Frames of reference and their neural correlates within navigation in a 3D environment

Holly Bridge, Nicola Ragge, Ned Jenkinson, Alan Cowey, and Kate E. Watkins **193** The fate of the oculomotor system in clinical bilateral anophthalmia

Brief Communication

Shannon K. Gallagher, Julia N. Anglen, Justin M. Mower, and Jozsef Vigh **203** Dopaminergic amacrine cells express opioid receptors in the mouse retina

https://doi.org/10.1017/S0952523812000399 Published online by Cambridge University Press

Volume 29 July/September 2012 Number 4 & 5

CONTENTS

Research Articles

Constanze Bickelmann, James M. Morrow, Johannes Müller, and Belinda S.W. Chang **211** Functional characterization of the rod visual pigment of the echidna (*Tachyglossus aculeatus*), a basal mammal

Hong-Gam T. Le, John e. Dowling, and D. Joshua Cameron **219** Early retinoic acid deprivation in developing zebrafish results in microphthalmia

Dwight A. Burkhardt **229** Zebrafish inner retina: Local signals for spatial position, luminance, and color contrast

Anne L. Georgiou, Li guo, M. Francesca Cordeiro, and Thomas E. Salt **237** Changes in the modulation of retinocollicular transmission through group III mGluRs long after an increase in intraocular pressure in a rat model of glaucoma

Sajjida Jaffer, Vasily Vorobyov, and Frank Sengpiel **247** Effects of different forms of monocular deprivation on primary visual cortex maps

David Wilkinson, Heather J. Ferguson, and Alan Worley **255** Galvanic vestibular stimulation modulates the electrophysiological response during face processing

Book Review

Jeffrey S. Diamond **263** The Gospel of John, *revised*

Announcement

265 2012 VNS Young Investigator Award

https://doi.org/10.1017/S0952523812000399 Published online by Cambridge University Press

Volume 29 **November 2012** **Number 6**

CONTENTS

Review Articles

Ivy S. Samuels, Chieh-Allen Lee, J. Mark Petrash, Neal S. Peachey, and Timothy S. Kern **267** Exclusion of aldose reductase as a mediator of ERG deficits in a mouse model of diabetic eye disease

Shu-Jie Wang, Lai-Hua Xie, Bin Heng, and Yan-Qiang Liu **275** Classification of potassium and chlorine ionic currents in retinal ganglion cell line (RGC-5) by whole-cell patch clamp

Victoria R.A. Hore, John B. Troy, and Stephen J. Eglen **283** Parasol cell mosaics are unlikely to drive the formation of structured orientation maps in primary visual cortex

Anthony G. Robson and Janus J. Kulikowski **301** Objective assessment of chromatic and achromatic pattern adaptation reveals the temporal response properties of different visual pathways

Yong Tang, Linyi Chen, Zhongjian Liu, Caiyuan Liu, and Yifeng Zhou **315** Low-level processing deficits underlying poor contrast sensitivity for moving plaids in anisometropic amblyopia

325 Acknowledgment to Reviewers

329 Author/Keyword Index to Volume 29, 2012

331 Contents to Volume 29
