VOLUME 14, NUMBER 9 SEPTEMBER 1993

An Official Journal of The Society for Healthcare Epidemiology of America

INFECTION CONTROL AND HOSPITAL EPIDEMIOLOGY™

EDITORIAL

Prevention of Rubella: Missed Opportunities 511-512
JAMES A. MCGREGOR, MD

ORIGINAL ARTICLES

A Survey of Hospital Postpartum and Postabortion Rubella Vaccination Policies in Los Angeles County, 1992 513-516
DIANA G. GARCIA, BA; DONNELL P. EWERT, MPH; LAURENE MASCOLA, MD, MPH

Intervention to Discontinue Parenteral Antimicrobial Therapy in Hospitalized Patients with Urinary Tract Infection, Skin and Soft Tissue Infection, or No Evident Infection 517-522
N. JOEL EHRENKRANZ, MD; DEBRA E. NERENBERG, RN; KENNETH C. SLATER, MD; JAMES M. SHULTZ, MS, PHD

Choosing Appropriate Criteria for Tuberculin Positivity and Conversion in a Long-Term Care Facility 523-526
ROBERT R. MUDER, MD; CAROLE BRENNEN, RN, MSN; KWAN TING YU

BRIEF REPORT

Inactivation of Human Immunodeficiency Virus by a Medical Waste Disposal Process Using Chlorine Dioxide 527-529
R. WESLEY FARR MD; CHERYL WALTON, BA

CLINICAL PHARMACOLOGY OF ANTIBIOTICS

Pharmacodynamics of Antiretroviral Chemotherapy 530-536
GEORGE L. DRUSANO, MD

STATISTICS FOR HOSPITAL EPIDEMIOLOGY

CQI Tools: Sentinel Events, Warning, and Action Limits 537-539
DAVID BIRNBIAUM, PHD, MPH

LETTERS TO THE EDITOR

Nosocomial Aspergillosis in Lymphoma Patients (with Response) 509
MELVIN N. KRAMER, PHD, MPH; PETER C. IWEN. MS

Barrier Testing Methods 510
WILLIAM C. BECK, MD, FACS

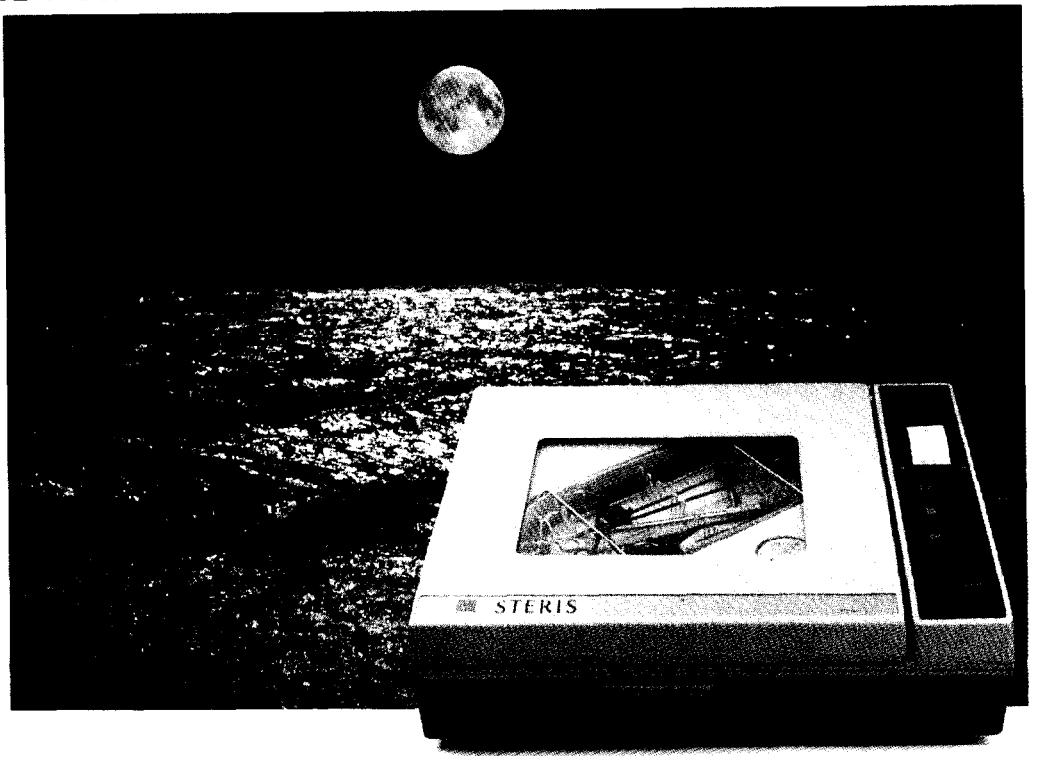

BOOKREVIEWS 540-542

Dream Machine.

Rapid, Safe, Sterile Processing Was Once Just A Dream

STERIS SYSTEM 1™ has made the dream of rapid and safe sterile processing a reality.

STERIS SYSTEM 1 is the proven, low temperature sterile processing system for immersible surgical and diagnostic devices. Even delicate, heat sensitive scopes, cameras, instruments, and accessories can be safely sterilized in less than 30 minutes-Just In Time for each patient procedure.

STERIS SYSTEM 1 also provides peace of mind. There are no toxic fumes, and no disposal restrictions to lose sleep over. And liquid processing means that your devices can be sterilized without the drying and wrapping which are required with gaseous systems.

Write or call us today to learn why thousands of health professionals rest assured with the rapid and safe sterile processing of STERIS SYSTEM 1.0

We've made it easier to spot the benefits of infection protection.

By now, nearly every clinician knows the benefits of central vessel catheterization. But you also know the infection risks. Catheter-related infections are estimated to occur in 3% to 12% of central vessel catheterizations,' and 20% of those are fatal.

Until now, all you could do was look for ways to treat the problem. But today you can look for a way to prevent it. ARROWg+ard™ Blue.

Catheters with the ARROWg+ard™ Blue antiseptic surface are up to 80% less likely to develop bacteremia than unprotected catheters.3 The benefit to the patient is immense.

ARROW&d" Blue is also worth looking into for financial masons. Each CVC infection costs about $8,000 to treat, so a 3% infection rate would cost a hospital placing 1,000 CVC's about $180,000 per year.' If ARROWg+ard™ Blue cuts that rate in half, a hospital would save $90,000. Given today's focus on medical costs, catheters with ARROWg+ard™ Blue offer the unique benefit of saving more than they cost.

Plus, ARROWg+ard™ Blue is built into the catheter. So you don't have to dip it or slip it on. You just have to look for the blue.

To learn more about the benefits of ARROWg+ard™ Blue, contact your Arrow International, Inc. representative, or call 1 800 523-8446.

ARROWg+ard™ Blue. *Now you can see infection protection.*

BECTON DICKINSON
MICROBIOLOGY SYSTEMS

BBL® Crystal™ MRSA ID.

In 4 Hours, A New Age Dawns.

It's a significant development for your laboratory and your hospital. **BBL®** Crystal™ MRSA ID. The first 4-hour test that accurately identifies methicillin-resistant *Staphylococcus aureus* strains (MRSAs). So your lab can rapidly identify nosocomial infections. Your physicians can start effective patient therapy sooner. And your hospital can deliver better patient care.

With **BBL®** Crystal™: all you do is prepare the broth, inoculate the wells, snap on the lid and incubate 4 hours. Under a UV light source, MRSAs visibly fluoresce bright orange. That's all there is to it!

Join the new age. For tremendous ease of use, speed, and time and money savings in fighting infection, use **BBL®** Crystal™ MRSA ID. Available now from your Becton Dickinson Microbiology Systems distributor.
