HBV positive!

If you're concerned about infection control at your hospital, you already know that sharps placed in sharps containers are not enough. . . you need a system! That's why more than 1700 hospitals nationwide have already chosen BFI Medical Waste Systems.

At BFI, we've built the largest medical waste disposal company in the world by providing individualized programs for hospitals nationwide. That includes:

- Establishing a waste handling system that's aimed at controlling the exposure to bloodborne pathogens such as HBV and HIV.
- Providing safe and reliable packaging that reduces the risk of accidental needle sticks and other exposures.
- Training hospital personnel on proper identification and separation of medical waste which may result in significant cost savings.

https://doi.org/10.1086/646520 Published online by Cambridge University Press

HBV negative!

* *This symbolizes BFI's comprehensive array of services and is not intended to represent any sharps disposal box or container.*

- Training hospital personnel on safe handling procedures for medical waste.
- Providing training and information to assist in complying with federal, state and local regulations, plus OSHA Bloodborne Pathogen Regulations.

To find out more about how BFI can reduce the risk and the cost of your medical waste treatment and disposal, call us at l-800-950-2010. Or come by Exhibit #413 at APIC '92 in San Francisco. We'll be happy to provide you with additional literature that supports the effectiveness of BFI Medical Waste Systems.

Hospitals today can't just rely on containers for sharps and medical waste disposal. Out of site is not out of mind. That's why more and more hospitals are relying on a medical waste system from BFI.

The World's #1 Choice for Medical Waste Services

Visit us at **APIC** '92 booth **#413** in San Francisco.

KEEP UP WITH NEW JCAHO REQUIREMENTS BY USING AICE®

The AICE® Software System is continuously being enhanced to keep you abreast of changing; Joint Commission demands.

"Compliance" and "easy" are not words normally heard in the same sentence--not until the **AICE Software System** was developed to meet the complex demands of infection control. AICE enables compliance with the epidemiologic and statistical standards using an easy step-by-step model. Use AICE to:

- ♦ Calculate specific infection rates (by surgeon, service, unit, etc.)
- ♦ Provide 3-way rate tables stratified by risk
- ♦ Easily feedback these rates to the employees/ physicians who can make a difference
- ♦ Send follow-up lists and letters to physicians
- ♦ Conduct priority-directed/targeted, problem-oriented, and/or total house surveillance
- ♦ Identify clusters of infections on incidence graphs
- 4 Track thresholds on graphic reports
- ♦ Perform case-control and special studies
- ♦ Compare hospital infections in-house with data trend analyses
- ♦ Watch the decline of infection rates and patient morbidity!

Today's hospital information management systems require ways to transfer data back and forth between computers. Do you want **to** download data from the operating room computer into **AICE?** Do you want to upload **AICE** data into other hospital databases or even into the Joint Commission's beta test software? **AICE** has solutions for you.

AICE is designed for both the novice and experienced computer user. With our 6 months of toll-free support, we will have you up and running on **AICE** in no time!

It is time to deal yourself a winning hand.

Order AICE Today!

YOUR JOB CAN BE LESS OF A THREAT

INJECTOR
Tubex®
(closed injection system) Wyeth-Ayerst

TUBEX®, the unique injector that puts you farther from the needle and cartridge than any other injection system.

There's no touching... shaking... manipulation of cartridge or needle. Just twist and drop.

In a recent survey, 1,522 hospital nurses recommended TUBEX® almost 2:1 over Carpuject®,[1]* which is one more reason to **adopt** TUBEX®--the injection system designed as if your life depended on it.

FARTHER FROM THE POINT OF DANGER'"

TUBEX® Brand Injectors are available free of charge--just contact your Wyeth-Ayerst representative for a supply.

*Carpuject® is a registered trademark of Winthrop Pharmaceuticals

Techni-Care™ Surgical Scrub

99.99% Bacterial Reduction in only 30 seconds

Techni-Care...A new technology in a surgical scrub exhibits outstanding antimicrobial efficacy *without* dermal irritation.

Fully substantiated by independent testing in vivo and in vitro, Techni-Care Surgical Scrub both disinfects and conditions *in less time than any prior technology available to healthcare personnel.*

Results of Time Kill tests demonstrate that Techni-Care eliminates gram negative and gram positive bacteria at 99.99% in 30 second contact.

Outstanding Bactericidal Activity without skin irritation

Techni-Care's active ingredient, chloroxylenol (PCMX) at 3%, eliminates bacteria, while a host of skin conditioning agents work synergistically to condition and soften the skin. Exceptionally mild, Techni-Care's dermal conditioning ingredients, include cocamidopropyl PG-Dimonium Chloride Phosphate, Aloe Vera Gel, Collagen and Propylene Glycol.

Techni-Care has rated a "minimal irritation" in the Draize Dermal irritation test. Specially blended formulation for dermal conditioning, as well as for bacterial reduction. Techni-Care Surgical Scrub is soothing to dermal tissue while phospolipids promote natural turgor.
