SUBJECT INDEX TO VOLUME 29

Dynamics

dynamics 79

Hamiltonian system 79

vibration 143, 197

Fluid Mechanics

added mass 1

aerodynamics 45, 225, N15

axisymmetric flow 27

Bingham fluid 355

bird flight 433

Burgers' fluid 453

capillary 297

cavity 207

combustion 273

convective boundary conditions 217, 403, 599

Couette flow 53

electrohydrodynamics 569

electroosmotic flow 609

flame 345

ground effect 433

Hall effects 337, 443

hydromagnetic 169, 337

jet 45

Maxwell fluids 233, 403

micropolar fluid 461, 559

Poiseuille flow 53

rotating flow 169, 433

stagnation point flow 27, 411, 453

stretching surface 217, 423, 623

thermal radiation 461, 559

turbulent flow 273

viscoelastic fluid 207, 233

viscous flow 1, 53, 217, 297, 355, 403, 423, 433, 443, 471, 539, 599, 623

vortex 337

water wave 551

Geotechnical Engineering

soil mechanics 685

Heat Transfer

heat transfer 27, 95, 411, 493, 559

Soild Mechanics

3D framed structures 7

auxetic materials 121

beam 143

buckling 157, 583

ceramics 695

composite materials 109, 135, 157, 197, 287, 373, 617, 661, 675

contact N9, 633, 653

https://doi.org/10.1017/jmech.2013.75 Published online by Cambridge University Press

elasticity 121, 241, 281, 287, 373 481, 517, 653, 661, N21

effective property 661, 675

failure strain 177

fatigue 535

fracture mechanics 85, 177, 309, 319, 481, 643

functionally graded material 109, 135, 157, 287, 373

Hertz's contact theory 281

magnetostrictive 135

micromechanics 661

piezoelectric materials 157, 517

plate 121, 135, 157, 241, 287, 373, 517

plasticity 535

poroelastic 589

reverberation-ray matrix 7

shell 583

stress concentration 241

thermoelasticity 109, 135

wave propagation 7, 197

Others

artificial immune method 185

biomechanics 35

boundary element analysis 385

drain pipe 263

finite element analysis 481, 539, N09, 589, 633, 661

genetic algorithms 471

instability 569

interface tracking 253

inverse problem 363

mass transfer 411, 453

mechanism N01

micropump 527

muffler 225

multi-order derivatives 67

numerical algorithm 67, 253, 363, 507, 551

optimal design 185, 507

perturbation method 345

resistance training 35

sensitivity analysis 177

structural health monitoring 617

thermoacoustics 59

turbine 327
