STUDIES IN SECOND LANGUAGE ACQUISITION

Information for Contributors

For guidelines and requirements regarding manuscript submission, please consult the *SSLA* website at http://journals.cambridge.org/sla. Click on the Journal Information tab which will lead you to Information for Contributors. Potential authors are advised that all manuscripts are internally reviewed for both content and formatting/style in order to determine their suitability for external evaluation.

Research Article. These manuscripts may be essays or empirical studies, either of which must be motivated by current theoretical issues in second and subsequent language acquisition or heritage language acquisition, including methodological issues in research design and issues related to the context of learning. Maximum length is 11,000 words all-inclusive (i.e., abstract, text, tables, figures, references, notes, and appendices intended for publication must all fall within the 10,000 word limit).

Research Report. These manuscripts are shorter empirical studies motivated by current theoretical issues in second and subsequent language acquisition or heritage language acquisition, including methodological issues in research design. Very often, these are narrowly focused studies or they present part of the results of a larger project in progress. The background and motivation sections are generally shorter than research articles. Maximum length is 6,000 words all-inclusive (i.e., abstract, text, tables, figures, references, notes, and appendices intended for publication must all fall within the 6,000 word limit).

Replication Study. These manuscripts are empirical studies that replicate the research design and methods of a previously published study, with or without changes. The study selected for replication should have impacted empirical and/or theoretical work relevant to SLA. Replications can be direct (exact, close, approximate) or conceptual, and should identify and motivate the study selected for replication as well as any changes made. The maximum length is 10,000 words all-inclusive (i.e., abstract, text, tables, figures, references, notes, and appendices intended for publication).

State-of-the-Scholarship Article. These manuscripts are essays that review the extant research on a particular theme or theoretical issue, offering a summary of findings and making critical observations on the research to date. Manuscripts in this category typically fall within the 10,000-word limit; however, longer manuscripts may be considered on a case-by-case basis.

Critical Commentary. These manuscripts are shorter essays (i.e., non-empirical) motivated by current theory and issues in second and subsequent language acquisition or heritage language acquisition, including methodological issues in research design and issues related to the context of learning. Maximum length is 6,000 words all-inclusive (i.e., abstract, text, tables, figures, references, notes, and appendices intended for publication must all fall within the 6,000 word limit).

Methods Forum. Recognizing the need to discuss and advance SLA research methods, these manuscripts seek to advance methodological understanding, training, and practices in the field. Submissions can be conceptual or empirical; we also encourage articles introducing novel techniques. All research paradigms, epistemologies, ontologies, and theoretical frameworks relevant to SLA are welcome. The target length is up to 10,000 words, although longer manuscripts will be considered with justification.

All manuscripts in all categories are peer reviewed and subject to the same high standards for publication in *SSLA*.

RESEARCH ARTICLES

Usage-based analysis of L2 oral proficiency: Characteristics of argument structure construction use
Hakyung Sung and Kristopher Kyle 991–1017

Timing matters for interactive task-based learning: Effects of vocabulary practice on learning multiword expressions and neural synchronization
Yuichi Suzuki, Takayuki Nozawa, Takumi Uchihara, Sachiko Nakamura, Atsuko Miyazaki, and Hyeonjeong Jeong 1018–1043

Does timing matter?: Exploring different windows of maximal opportunity to enhance the effectiveness of high variability phonetic training
Charlie Nagle, Jose A Mompean, and Jonás Fouz-González 1044–1070

Effects of Sociophonetic Variability on L2 Vocabulary Learning
Friederike Fichtner, Joe Barcroft, Mitchell Sommers, and Paul Olejarczuk 1071–1095

CRITICAL COMMENTARIES

Manufactured crisis: A response to Al-Hoorie et al. (2024)
Mostafa Papi and Yasser Teimouri 1096–1107

Validation crisitunity: A response to Al-Hoorie, Hiver, and In'nami (2024)
W. L. Quint Oga-Baldwin 1108–1120

Why you should stop using the ideal L2 self and the L2 motivational self-system to measure motivation (Reaction to Al-Hoorie, Hiver & In'nami, 2024)
Neil McClelland and Jenifer Larson-Hall 1121–1132

Resolving the crisis in L2 motivational self-system research: Constructive dialogue and argument-based validation
Meng Liu and Alastair Henry 1133–1147

METHODS FORUM

Interpreting the semi-partial correlation as a multiple regression-bound (not a bivariate) metric: A methods-oriented response to Papi and Teimouri's (2024) response to Al-Hoorie et al. (2024)
Joseph P. Vitta, Paul Leeming, and Christopher Nicklin 1148–1169

Is "the L2 learning experience" simply intrinsic motivation by another name? A content validity analysis
W. L. Quint Oga-Baldwin, Ali H. Al-Hoorie, and Phil Hiver 1170–1183

CRITICAL COMMENTARIES

With "crisis" comes opportunity: Using invariance testing to understand and improve measurement models (A response to Al-Hoorie et al., 2024)
Charlie Nagle 1184–1192

Looking beyond the L2 Motivational Self System: Lessons from two "lost" decades
Ali H. Al-Hoorie, Phil Hiver, and Yo In'nami 1193–1204
