INFECTION CONTROL AND HOSPITAL EPIDEMIOLOGY

Volume 9, Number 9 • September 1988

EDITORIAL

Pseudomeningitis—Another Nosocomial Headache
Burke A. Cunha, MD

ORIGINAL ARTICLES

Bacillus Species Pseudomeningitis
Ludwig A. Lettau, MD, MPH; Dean Benjamin, MT; H. Furman Cantrell, PhD; David W. Potts, MD; J. Michael Boggs, RN, BSN

An Epidemic of Adenovirus 7a Infection in a Neonatal Nursery: Course, Morbidity, and Management
Adam Finn, BM, MRCP(UK); Endla Anday, MD; George H. Talbot, MD

Nosocomial Infection in Adult Patients with Sickle Cell Anemia
Helen M. Crowe, MD; Deborah A. Lichtenberg, RN; Donald E. Craven, MD

Safe and Cost-Effective Cleaning of Pressure-Monitoring Transducers
Richard Platt, MD; John L. Lehr, PhD; Susan Marino, BS; Alvaro Munoz, PhD; Barbara Nash, BS; Daniel B. Raemer, PhD

CEU/CME Quarterly Quiz in this issue

The Official Journal of The Society of Hospital Epidemiologists of America

Publisher: Infection Control and Hospital Epidemiology (ISSN-0195-9417) is published monthly by SLACK Incorporated, 6900 Grove Road, Thorofare, New Jersey 08086. Telephone: (609) 848-1000.

Copyright 1988: All rights reserved. No part of this publication may be reproduced without written permission from the publisher.

Subscriptions. Requests should be addressed to the publisher (except Japan). In Japan, contact Woodbell Scope Incorporated, Mansui Bldg., 9-18, Kanda Surugadai 2-chome, Chiyoda-ku, Tokyo 101, Japan. Subscription rates in the US and possessions: Individual: One year—$45.00; Two years—$75.00; Three years—$105.00. Institutional: One year—$60.00; Two years—$100.00; Three years—$140.00; Canada: $15.00 additional each year; all other countries: $25.00 additional each year. Single copies of current issues may be obtained for $7.00, United States and possessions; $13.00 all other countries.

Change of address: Notice should be sent to the publisher six weeks in advance of effective date. Include old and new addresses with zip codes. The publisher cannot accept responsibility for undelivered copies. Second-class postage is paid at Thorofare, New Jersey 08086, and additional entry points. **Postmaster:** Send address changes to SLACK Incorporated, 6900 Grove Road, Thorofare, NJ 08086.

As of Volume 1, Number 1, INFECTION CONTROL AND HOSPITAL EPIDEMIOLOGY is listed in *Index Medicus, Current Contents—Clinical Practice, Hospital Literature Index,* and *Cumulative Index to Nursing and Allied Health Literature.*

Information for Authors

Manuscripts should consist of new material based on infection control activities within a health care facility or in the community, from the US or abroad. All clinical research must have been conducted in accordance with guidelines on the protection of human subjects as established by the US Department of Health and Human Services. Articles are accepted with the understanding that they are contributed solely to INFECTION CONTROL AND HOSPITAL EPIDEMIOLOGY and have not been published previously except in abstract form. *Authors will be requested to sign a standard release of copyright form.* The journal will cover the general topics of environmental monitoring, surveillance, prevention, immunization, regulation, education, and research related to infection control.

All manuscripts should be submitted in triplicate (with duplicates of figures and tables), typewritten on one side on 8 ½ × 11-inch paper, double-spaced with generous margins. The author should keep a complete copy of the manuscript.

The organization of the paper should be as follows: title page; abstract; introduction; methods; results; discussion; acknowledgments; references; tables; figures and figure legends. The main sections and subdivisions should be indicated by side headings flush with the left margin and two lines above the text. The Arabic numbering system should be used.

Clinical Trials: The Editor requests that authors reporting the results of clinical trials describe clearly the following: 1) eligibility criteria; 2) whether or not subjects were admitted before allocation to one of the study groups; 3) the method of randomization; 4) whether the study was "masked," what specific information was masked and whether subjects, clinicians and evaluators were all masked; 5) the method used to identify treatment complications; 6) an explanation and analysis of subjects lost to follow-up; 7) statistical methods employed; 8) information which led to the determination of the size of the study groups and the expected differences between groups; and 9) indicate that studies involving human subjects have been reviewed and approved by their institutional review board.

Rapid Publication: A request for rapid publication must be stated in the cover letter and manuscripts should not exceed ten double-spaced, typewritten pages. The editor will send the manuscript for rapid review only if the information contained is a unique, scholarly contribution of special importance. Such papers will be published within *three to four months* of acceptance. No comments will accompany rejected papers, but manuscripts may be resubmitted under the normal publication procedures.

Readers' Forum: Brief communications are encouraged of approximately four to six typewritten pages containing information which does not represent a formal study. They may reflect opinions, hypotheses, or impressions related to infection control or summarize unusual experiences in the field.

Title Page: A separate title page should include the following: title of manuscript; author(s); laboratory or institution of origin with city and state; acknowledgment of grant support; address to be used for reprint requests. An abbreviated title, to be used as a running head, should be included. This should not exceed four words. A preliminary report or abstract should be credited by use of a footnote to the title.

Abstract: The abstract, not to exceed 150 words, should summarize the significant information in the paper and be understandable without reference to the text. The use of abbreviations should be avoided.

Tables: Tables should be double-spaced, each on a separate page, and self-contained. Do not use vertical lines or ditto marks. The table number should be typed flush left, with the table title beneath it. Symbols for footnotes are listed below. Abbreviations used in a table should be explained at the bottom of the table after the footnotes.

Figures: Two sets of unmounted glossy prints should be enclosed in separate envelopes. Indicate lightly on the back margin of each figure the number, name of author, and top. Illustration costs in excess of $50 must be defrayed by the author.

Photographs: Two copies of each photograph should be submitted. *Any identifiable human subject must sign a release form before the photograph can be used.* Radiographs and other black-and-white material should be submitted as unmounted glossy print, 5″ × 7″ size preferred. A separate identification label should be pasted on each print; do not write directly on the print or use paper clips or staples. Photomicrographs or other color materials should be submitted as color transparencies. Actual magnification and staining method should be given where appropriate; electron photomicrographs should have internal scale markers.

Legends: Legends should be double-spaced, each on a separate page.

References: References should be double-spaced, and should be cited consecutively in the text with superscript numbers outside punctuation. A reference to a paper "in press" may be included. Citations such as "in preparation," "submitted for publication," "unpublished data," and "personal communication" should be given in parentheses in the text only. At the end of each article, references should be listed in the numerical order in which they appear in the text. No more than three authors should be listed for each citation; authors after the third should be designated *"et al." Abbreviations of the names of the journals should conform to the Index Medicus.* Journal titles should be cited as they existed at the time of publication. Unlisted journals should not be abbreviated. Authors are responsible for bibliographic accuracy.

Articles: Annuniziato D, Goldblum LM: Staphylococcal scalded skin syndrome: A complication of circumcision. *Am J Dis Child* 1978; 132:1187-1188.

Books: Hoeprich PD: *Infectious Diseases,* ed 2. New York, Harper & Row Pubs Inc, 1977, p 169.

Contributions to Books: Schaffner W: Psittacosis: Ornithosis, parrot fever, in Beeson PB, McDermott W, Wyngaarden JB (eds): *Cecil Textbook of Medicine,* ed 15. Philadelphia, WB Saunders Co, 1979, pp 336-338.

Footnotes: Footnotes to the text and tables should be as few as possible. Each should be typed at the foot of the appropriate page, separated from the text or table by a horizontal line. Designate footnotes by the following symbols in this order: *, †, ‡, **, ††, ‡‡.

Abbreviations and Nomenclature: Abbreviations should conform to the American Medical Association *Manual for Authors and Editors,* published by Lange Medical Publications, Los Altos, California. Abbreviations should be kept to a minimum, preferably confined to the tables. Symbols for units of measurement (*eg,* mm, ml) should not be followed by periods. Chemical or generic names of drugs are preferred. A proprietary name may be given only after it is preceded by the chemical name the first time it appears. Unfamiliar terms and abbreviations must be defined when first used.

Reviews: Each manuscript will be reviewed by the Editor and at least one other Editorial Board member. Authors will be notified as soon as possible regarding the acceptability of their manuscripts.

Galleys: Galley prints will be sent to the author for approval before the article is printed.

Reprints: The senior author will be sent five complimentary copies of the issue in which the article appears. An order form showing the price for reprints will be sent with the complimentary copies of the issue.
