THE MAKING OF AN IMPERIAL POLITY

Bringing to life the interaction between America, its peoples, and metropolitan gentlemen in early seventeenth-century England, this book argues that colonization did not just operate on the peripheries of the political realm, and confronts the entangled histories of colonialism and domestic status and governance. The Jacobean era is reframed as a definitive moment in which the civil self-presentation of the elite increasingly became implicated in the imperial. The tastes and social lives of statesmen contributed to this shift in the English political gaze. At the same time, bringing English political civility in dialogue with Native American beliefs and practices speaks to inherent tensions in the state's civilizing project and the pursuit of refinement through empire. This significant reassessment of Jacobean political culture reveals how colonizing America transformed English civility and demonstrates how metropolitan politics and social relations were uniquely shaped by territorial expansion beyond the British Isles. This is a series of monographs and studies covering many aspects of the history of the British Isles between the late fifteenth century and the early eighteenth century. It includes the work of established scholars and pioneering work by a new generation of scholars. It includes both reviews and revisions of major topics and books which open up new historical terrain or which reveal startling new perspectives on familiar subjects. All the volumes set detailed research within broader perspectives, and the books are intended for the use of students as well as of their teachers.
