BIBLIOGRAPHY

Publications on financial history 2005

SERGE NOIRET
European University Institute, Florence

This bibliography covers publications that appeared during 2005 and 2004 when they were not known before the deadline of last year's bibliography. In that case the year of publication is mentioned in the citation.

It follows previous criteria being divided into two broad areas: *general literature in financial history* in section 1, and *specialised material* in section 2. Section 2 is then subdivided chronologically, and further by geographical area (the complete classification scheme was published in the *FHR*, volume 1, part 2, October 1994, pp. 157–60). Where there are no entries for a particular section, the heading has been omitted. Abbreviations have been kept to a minimum, but standard abbreviations such as *J.* for *Journal*, *Q.* for *Quarterly*, *Rev.* for *Review/Revue/Revista*, have been used throughout. Short titles are used for references to edited volumes within the section in which they are listed; elsewhere they are cited in full. Doctoral theses and working papers are not included. Papers published in edited books are mentioned only if the bibliographer accessed the index of the book before the publication deadline. English translations of some titles in European, Asian and African languages are used in the bibliography only when the source of the bibliographic citation made them available. All URLs for website citations were accessed in June–July 2007.

The bibliographer is pleased to receive suggestions of any kind for compiling this bibliography at the following address: <serge.noiret@eui.eu>.
