Chicago

The Semantics of Syntax

A Minimalist Approach to Grammar

Denis Bouchard

In an elegant and powerful analysis, Bouchard proposes simple semantic representations and simple rules to relate linguistic levels. Focusing on a class of French verbs, he demonstrates that this approach simplifies the syntax at no cost to the descriptive power of the semantics, and he examines its consequences for standard syntactic theories.

***Paper $35.95 584 pages illus.**

Elements of Acoustic Phonetics Second Edition

Peter Ladefoged

This expanded edition provides a concise introduction to basic concepts of acoustics and digital speech processing that are important to linguists, phoneticians, and speech scientists.

"This is a unique textbook combining computation and acoustics for mathematically and computationally naive students in phonetics. It demonstrates how inherently mathematical concepts can be explained for a wide audience in humanities, and why they must be understood for handling phonetic data. It may change the basic attitude in phonetic studies."—Osamu Fujimura, Ohio State University

NOW IN PAPER

Hand and Mind

What Gestures Reveal about Thought

David McNeill

Hand and Mind persuasively argues that because gestures directly transfer mental images to visible forms, conveying ideas that language cannot always express, we must examine language and gesture together to unveil the operations of the mind.

"Provocative in the best sense of the word."—Susan D. Fischer, Language

The Lexicon in Acquisition

Eve V. Clark

"An elegant, clearly-written, and detailed account of Clark's work... bringing together theory and data from a number of different types of languages. Clark makes skillful use of the interplay of crosslinguistic data to illuminate all of the components of the theory as well as the role of the linguistic typology in [lexical] acquisition. A landmark book in the study of the lexicon, with special significance for acquisition theory." ***—Dan I. Slobin, University of California at Berkeley***

Speakers, Listeners and Communication

Explorations in Discourse Analysis

Gillian Brown

In this study Gillian Brown draws on a wide range of examples of discourse analysis to explore the ways in which speakers and listeners use language collaboratively to talk about what they can see in front of them and about a series of events. The focus of her attention is upon the listener's role, as the listener tries to make sense of what the speaker says in a highly constrained context.

Historical Syntax in Cross-Linguistic Perspective

Alice C. Harris and Lyle Campbell

This study utilizes a cross-linguistic approach to establish a general framework for the investigation of syntactic change. It reveals shared properties of changes across languages, determines what mechanisms lie behind them, and how they correlate to the overall explanation of syntactic change.

TWO VOLUMES IN THE HANDBOOK OF PERCEPTION AND COGNITION SERIES, SECOND EDITION

Speech, Language, and Communication

EDITED BY
Joanne L. Miller and
Peter D. Eimas

Speech, Language, and Communication provides an overview of research, theory, and methodology in human language, from the spoken signal and its perception, to acts of communication. Each chapter provides a mini-review of research findings. Coverage includes speech production and recognition, visual word recognition, sentence production and comprehension, the acquisition of language, the neurobiological foundations of language, and a summary chapter discussing language as a cooperative act of communication.

1995, 415 pp., $59.95
ISBN: 0-12-497770-7

Hearing

EDITED BY
Brian C.J. Moore

Hearing is a comprehensive, authoritative reference work covering both the physiological and perceptual aspects of hearing. Intended for researchers and advanced students in the field of hearing, it reviews major areas of research in addition to new discoveries, including active mechanisms in the cochlea, across-channel processes in auditory masking, and perceptual grouping processes.

KEY FEATURES
- Covers both physiological and perceptual aspects of hearing
- Authoritative reviews by experts in the field
- Comprehensive up-to-date coverage
- An integrated work with extensive cross-references between chapters

August 1995, 468 pp., $59.95
ISBN: 0-12-505626-5

Inhibitory Processes in Attention, Memory, and Language

EDITED BY
Dale Dagenbach and Thomas H. Carr

"THIS IS A STATE-OF-THE-ART MANIFESTO, AND AS SUCH, ESSENTIAL TO ANYONE SERIOUSLY ENGAGED IN THE EXPERIMENTAL PSYCHOLOGY OF COGNITION."

—W. TRAMMELL NEILL IN PERCEPTION

Small Clauses

VOLUME 28 of Syntax and Semantics

EDITED BY
Anna Cardinaletti and
Maria Teresa Guasti

"THE TOPICS AND LANGUAGES COVERED IN THIS BOOK ARE VERY IMPRESSIVE. THERE IS A NICE MIX OF SEMANTIC AND SYNTACTIC CONTRIBUTIONS. I HAVE LITTLE DOUBT THAT THIS WILL BE A VERY INFLUENTIAL COLLECTION OF PAPERS."

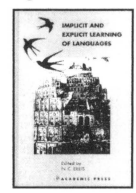

—NORBERT HORNSTEIN, UNIVERSITY OF MARYLAND

KEY FEATURES
- Surveys the problems raised by small clauses in light of recent developments in the principles and parameter model
- Data is drawn from Danish, Dutch, English, Finnish, French, German, Hebrew, Hungarian, Icelandic, Irish, Italian, Norwegian, Portuguese, Russian, Slovak, and Swedish
- The contributions share theoretical assumptions about small clauses
- The cross-linguistic comparison offers the potential for defining variable and static elements of small clauses, as well as distinguishing ways that they resemble full clauses

August 1995, 333 pp., $79.95
ISBN: 0-12-613528-2

Implicit and Explicit Learning of Languages

EDITED BY
Nick C. Ellis

Reasoning that no single discipline is responsible for the learning process, the editor employs a cognitive approach to combine contributions from specialists in disciplines such as psychology, linguistics, neuroscience, and computing. The book presents a general study of how learning takes place and applies this knowledge.

KEY FEATURES
- Concerns human learning generally and the ability to acquire languages in particular, bringing together the disciplines of psychology, linguistics, neuroscience, and computing
- Examines one type of learning—language acquisition—drawing together some of the principal scientists and ideas in the area

Covers all the world's scripts — from hieroglyphics to shorthand

the world's writing systems

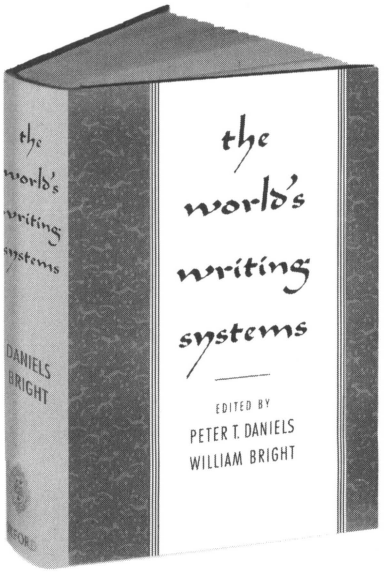

Edited by PETER T. DANIELS and WILLIAM BRIGHT

Ranging from cuneiform to shorthand, from archaic Greek to modern Chinese, from Old Persian to modern Cherokee, this is the only available work in English to cover all of the world's writing systems from ancient times to the present. Describing scores of scripts in use now or in the past around the world, this unusually comprehensive reference offers a detailed exploration of the history and typology of writing systems. More than eighty articles by scholars from over a dozen countries explain and document how a vast array of writing systems work—how alphabets, ideograms, pictographs, and hieroglyphics convey meaning in graphic form.

The work is organized in thirteen parts, each dealing with a particular group of writing systems defined historically, geographically, or conceptually. An introductory article provides the social and cultural context in which each group of writing systems was developed. Articles on individual scripts detail the historical origin of the writing system, its structure, and its relationship to the phonology of the corresponding spoken language. Each writing system is illustrated by a passage of text, and accompanied by a romanized version, a phonetic transcription, and a modern English translation.

Matched by no other work in English, *The World's Writing Systems* is the only comprehensive resource covering every major writing system. This is a reference that no linguist or philologist will want to be without.

December 1995 800 pp. $135.00

FEATURES:

- Covers all scripts officially used throughout the world—as well as their historical antecedents
- Clearly explains and demonstrates how writing systems convey meaning
- Includes more than eighty articles written by sixty leading scholars from a dozen countries
- Articles offers text samples with full explanation, useful bibliographies
- No comparable work in English exists

Syntactic Iconicity and Linguistic Freezes

The Human Dimension

1995. 23 x 15,5 cm. IX, 444 pages. Cloth DM 238.00/approx. US$ 170.00
ISBN 3-11-014227-9
(Studies in Anthropological Linguistics 9)
Mouton de Gruyter

Taking into account the fact that a person's choice of words and their serial order is defined not only by the phonological, prosodic, semantic or syntactic constraints within a particular speech context, but also by unconscious mental processes and states (e.g. motivation), enhanced (anthropological) linguistic insights may enable better communicative techniques revealing hidden truths in the speaker's language. The augmented understanding this affords the attentive reader or listener can be of invaluable usefulness, for instance in personality development, speech therapy, remedial treatment of the aphasias, psychoanalytic interpretation of communication, psychotherapy, second language teaching, text analysis, discourse analysis, literary criticism, translation and translation theory, and, last but not least, general communicative competence as a factor of speech behavior.

Lisa Block de Behar

A Rhetoric of Silence and Other Selected Writings

1995. 23 x 15,5 cm. XII, 328 pages. Cloth DM 198.00/approx. US$ 141.00
ISBN 3-11-014425-5
(Approaches to Semiotics 122)
Mouton de Gruyter

The author sets off with the question "What does the reader do while he reads?". Her answer is: "He makes silence!" The discussion on *A Rhetoric of Silence* investigates the meaning of silence in the literary reading process. Rhetorics, a discipline which has from its beginning been interpreted ambivalently, stands here in both its senses: as the study of the dialectic speculations of the mind and the art of saying. The study on rhetorics in this case is applied to verbal silence. The author's hypothesis is based on the assumption that the reader "formulates this silence", meaning that although silence operates with the suspension of words, words are not articulated, not uttered, but are, nevertheless, present.

The results of this investigation into the semiotic meaning of silence are grounded on extensive research in France, Italy, Israel, the United States, and South America.

Cognitive Linguistics in the Redwoods

The Expansion of a New Paradigm in Linguistics

1995. 23 x 15,5 cm. XI, 1011 pages. Cloth. DM 358.00/approx. US$ 255.00
ISBN 3 11 014 358 5
(Cognitive Linguistics Research 6)

Mouton de Gruyter

Illustrating a variety of approaches within the general framework of Cognitive Grammar, the twenty-eight papers of the present book touch on a variety of topics in morphology, syntax, the lexicon and pragmatics in a number of well-known European languages as well as in several little-known Amerindian languages. These papers illustrate that cognitive linguistics incorporates empirical findings from other disciplines and concerns itself with describing and accounting for the content of human conceptual knowledge, and is not content with just describing the architecture of such knowledge.

Discrimination through Language in Africa?

Perspectives on the Namibian Experience

1995. 23 x 15,5 cm. X, 338 pages. Cloth DM 178.00/approx. US$ 127.00
ISBN 3-11-014817-X
(Contributions to the Sociology of Language 69)

Mouton de Gruyter

The volume presents a comprehensive survey of the language contact and language conflict situations in many African states with special reference to the newly-independent state of Namibia. It focusses on the general problems of linguistic inequality viz. the unbalanced relationship between the official language(s) and the autochthonous languages in most sub-Saharan African states. The book gives a detailed account of the complex interaction between language and the cultural, socio-historical, and ideological factors pertaining to the nation-building processes in anglophone, francophone, and lusophone nations of Africa. The eighteen articles show that the implementation of an adequate language policy for multilingual nations in Africa is an enormous and difficult task linked to the theme of "empowerment through language", i.e. the revalorization and promotion of indigenous languages in Africa.

G. Tucker Childs

A Grammar of Kisi

A Southern Atlantic Language

1995. 24 x 16 cm. XVI, 370 pages. Cloth DM 218.00/approx. US$ 156.00
ISBN 3-11-014356-9
(Mouton Grammar Library 16)

Mouton de Gruyter

This book represents the first detailed description and analysis of the Kisi language, an Atlantic language spoken by nearly half a million people in Guinea but also in Sierra Leone and Liberia. It describes in detail the phonology (including tone), the rich morphology (noun classes, verb extensions), and the syntax, illustrating each of these areas with attested examples. Of particular interest is the full discussion of ideophones, an expressive and expansive word category found in most African languages, yet most often ignored in traditional and formal treatments. Although the description is bound to no theory, the approach is a thoroughly modern one, especially with regard to phonology. The Kisi language is of interest because of its typologically interesting and 'mixed' features, many of which have arisen from contact with the Mande languages by which it is surrounded today.

Schrift und Schriftlichkeit/ Writing and Its Use

Ein interdisziplinäres Handbuch internationaler Forschung
An Interdisciplinary Handbook of International Research

Two Volumes

Edited by Hartmut Günther, Otto Ludwig
Together with Jürgen Baurmann, Florian Coulmas, Konrad Ehlich, Peter Eisenberg, Heinz W. Giese, Helmut Glück, Klaus B. Günther, Ulrich Knoop, Bernd Pompino-Marschall, Eckart Scheerer, Rüdiger Weingarten

First Volume:

1994. 27,0 x 19,0 cm. XLVIII, 902 pages. With approx. 210 figures and 20 plates. Cloth DM 850,-; approx. US$ 654.00 ISBN 3-11-011129-2
(Handbücher zur Sprach- und Kommunikationswissenschaft/Handbooks of Linguistics and Communication Science/Manuels de linguistique et des sciences de communication, Vol. 10.1)

The Handbook presents a compendium of present knowledge on writing sytems, reading and writing. It contains some 150 articles giving the history of writing together with cultural, sociological, psychological and linguistic aspects of writing and its use, the acquisition of written language and special writing systems. Indexes (in the second volume) give focused access to the information from a wide variety of disciplines.

Namenforschung Name Studies Les noms propres

Ein internationales Handbuch zur Onomastik
An International Handbook of Onomastics
Manuel international d'onomastique

Three Volumes

Edited by Ernst Eichler, Gerold Hilty, Heinrich Löffler, Hugo Steger, Ladislav Zgusta

Volume 1:

1995. 27,0 x 19,0 cm. XLVI, 977 pages. With 7 illustrations and 30 maps. Cloth DM 780,-; approx. US$ 600.00 ISBN 3-11-011426-7
(Handbücher zur Sprach- und Kommunikationswissenschaft/Handbooks of Linguistics and Communication Science/Manuels de linguistique et des sciences de communication, Vol. 11.1)

Proper names are linguistic signs of a particular kind. They are words according to their form, naming and identifying individual things, persons, groups, places, mountains, oceans, buildings, animals and other matters and relationships. Various disciplines are concerned with their properties as signs and as system, such as philosophy, general, comparative and language-specific linguistics. Name-giving and name use as reflections of present and historical social mentalities are relevant for folklorists, ethnologists, lawyers, psychologists, and historians. In more than 200 articles the problem complex of proper names is treated by authors from all over the world. The situation of particular languages, countries, and cultures are exemplified, overview of important languages outside Europe being given as well. The abundant name material is made accessible by numerous indexes (volume 3).

The Indo-Aryans of Ancient South Asia

Language, Material Culture and Ethnicity

Edited by George Erdosy

1995. 23,0 x 15,5 cm. XXII, 417 pages.
Cloth DM 248,-; approx. US$ 191.00
ISBN 3-11-014447-6
(Indian Philology and South Asian Studies, Vol. 1)

The volume offers a range of papers concerning archaeological and linguistic approaches to a study of the emergence of Indo-Aryan speakers in the 2nd millennium BC. Its underlying theme is the need to reconcile the approaches of these two disciplines towards ethnicity, migrations and social evolution since much of the current confusion regarding the "Aryan problem" stems from mutual misunderstandings of the subject matter, aims, approaches and limitations of archaeology and linguistics. The aim of the papers, thus, is to outline avenues to a solution of the problem, rather than to grope for the solutions themselves.

"There is certainly no introductory text like it on the market."—Frederick Newmeyer, *University of Washington*

"Most introductory books cover much more, which no instructor has time to discuss in one semester...hers would be vastly superior." —Geraldine Legendre, *University of Colorado*

An introduction to linguistic methodology and theory, this unique text introduces students to the study of language and to the manner in which linguists think and approach their material. It differs from similar books in that rather than attempting to treat the full range of associated topics (including areas such as language acquisition, psycholinguistics, and computational linquistics, which few instructors can cover in one semester), Napoli focuses on the five core topics of linguistics: phonetics, phonology, morphology, syntax, and semantics. She also discusses conversational interactions and historical and comparative linguistics. These areas are treated in depth, from the perspective of current scholarship, and in a manner easily accessible to students. Problem sets are included at the end of each chapter.

New!

AN INTRODUCTION TO THE LANGUAGES OF THE WORLD

ANATOLE V. LYOVIN

"The author succeeds in covering a broad range of important and interesting information, and I am not aware of any other work that could serve as an all-round textbook for a course on the Languages of the World." —Bernard Comrie, *University of Southern California,* author of *The World's Major Languages*

Designed to introduce linguistics students to the variety of the languages of the world, this text begins by explaining the classification of languages and writing systems, discussing not only genetic classification but typological and sociolinguistic classification as well. Lyovin devotes a chapter to each of the world's continents, with in-depth analyses of representative languages of Europe, Asia, Africa, Oceania, and America. Each chapter includes student exercises and suggestions for further reading.

New edition!

THE PHILOSOPHY OF LANGUAGE

Third Edition

A. P. MARTINICH

"An excellent text; easily the best such collection now available." (on the previous edition)
—James Page, *University of Kansas*

This updated edition of the best-selling text in philosophy of language collects thirty-nine of the most important articles in the field, covering all the central issues and making this anthology the most comprehensive volume of its kind. Several new essays are featured, including recent influential work by Saul Kripke, David Kaplan, Donald Davidson, John Searle, and Noam Chomsky, along with an entirely new section on interpretation and translation. Other selections include classic articles by such distinguished philosophers as Gottlob Frege, Bertrand Russell, J.L. Austin, W.V. Quine, and P.F. Strawson. Introductions to each of the sections provide background to the issues and discuss the connections between them.

OXFORD UNIVERSITY PRESS

ENGLISH VOCABULARY ELEMENTS

KEITH DENNING and WILLIAM R. LEBEN

"The best introduction to the study of English words available. This linguistically-informed and highly readable text...is not only ideal as an introduction to the structure of English (words or more generally), but is also usable as a practical introduction to basic linguistic notions. The authors have managed to convey sophisticated linguistic concepts while focusing on the most universally interesting and accessible aspect of language: words."
—Suzanne Kemmer, *Rice University*

1995 272 pp.; 8 illus. paper $14.95

SYNTAX

Theory and Problems

DONNA JO NAPOLI

"Well written and lively, with interesting problem sets. Professor Napoli has managed to make intelligible a difficult subject without talking down to students, or assuming vast prior knowledge."—Marilyn Silva, *California State University, Hayward*

"A splendid textbook. I especially like Ms. Napoli's tone and her inductive approach.... I also like the fact that [she] consistently presents one theory and does not try to be eclectic; her emphasis is on analysis and drawing conclusions. Great!"—R.M.R. Hall, *Queens College, City University of New York*

1993 616 pp.; 114 illus. paper $35.00

ENGLISH IN ITS SOCIAL CONTEXTS

Essays in Historical Sociolinguistics

Edited by TIM WILLIAM MACHAN and CHARLES T. SCOTT

"Provides a valuable counterbalance to the traditional emphasis on the written standard in works on the history of English....It offers a varied feast of methodological approaches and theoretical attitudes that mirrors the feast of language varieties and attitudes toward them that are its subject....It is richly informative and thoroughly enjoyable."
—Elizabeth C. Traugott, *Stanford University*

(Oxford Studies in Sociolinguistics)

1992 288 pp.; 5 illus.
paper $17.95 / cloth $55.00

PRAGMATICS

A Reader

Edited by STEVEN DAVIS

"Terrific collection! All classics plus those that deserve to be."—Alice G.B. ter Meulen, *Indiana University*

1991 608 pp. paper $35.00

COMPUTERS AND HUMAN LANGUAGE

GEORGE W. SMITH

"The book's coverage is...impressive, both in terms of its depth and the breadth of the topics covered....Smith's grasp of the field and bibliographic thoroughness are remarkable. His references are all up-to-date and carefully chosen."—*Word*

1991 496 pp; 87 illus. paper $18.95

Directory of Programs in Linguistics in the United States & Canada

1995 edition

The ninth edition of the *Directory* is now available. Entries for 180 institutions include the number and kind of degrees granted 1992-93 and 1993-94, faculty and their specialties, special institution resources, uncommonly taught languages offered during the last two years, the number of students enrolled in linguistics, and the academic year system. The *Directory* also provides information on 18 organizations engaged in linguistic research and on 38 linguistic societies and related organizations around the world. Indexes of staff and uncommonly taught languages complement this collection. (8 1/2" x 11", spiral bound, 200 pages)

Price: $20.00 US (includes postage and handling)

LINGUISTICS

Lexical Issues in Language Learning
BIRGIT HARLEY
Focuses on the assessment of lexical development in bilinguals at different points in the lifespan; the psycholinguistic factors that determine the learnability of second language lexis; and the conditions on communication tasks that promote the learning and retention of second language vocabulary or lead to different strategies for handling lexical problems.
Pb: iv, 318 pp. 1-55619-715-2 $29.95

Georgian: A Structural Reference Grammar
B. G. HEWITT *(School of Oriental and African Studies, University of London)*
This work represents the first Reference Grammar of this challenging language to appear in English and is the summation of 20 years of intensive study by its author.
Hb: xviii, 716 pp. 1-55619-726-8 $143.00

On Subject and Theme
A discourse functional perspective
RUQAIYA HASAN *(Macquarie University)* and PETER H. FRIES *(Central Michigan University)* (eds.)
Using the systemic functional model as their point of departure, the ten papers in the present volume consider the two notions in a wider context by relating them to the interpersonal and textual metafunctions of language.
Hb: xii, 414 pp. 1-55619-572-9 $95.00

Semitic and Indo-European: The Principal Etymologies
With observations on Afro-Asiatic
SAUL LEVIN
(State University of New York at Binghamton)
This volume presents the key examples of morphological correspondences between Indo-European and Semitic languages. Its focus is on shared morphology embodied in the cognate vocabulary.
Hb: xxii, 514 pp. 1-55619-583-4 $97.00

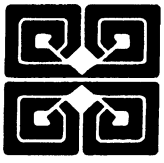

Historical Pragmatics
Pragmatic developments in the history of English
ANDREAS H. JUCKER (ed.)
The volume, which contains 22 original articles, starts with an introduction that is both a state-of-the-art account of historical pragmatics and a programmatic statement of its future potential and its different subfields.
Hb: xvi, 624 pp. 1-55619 328 9 $97.00

The Current State of Interlanguage
Studies in honor of William E. Rutherford
LYNN EUBANK, LARRY SELINKER & MICHAEL SHARWOOD-SMITH (eds.)
This state-of-the-art volume presents an outstanding collection of 22 studies on current issues facing research in second-language acquisition (SLA). The introduction is a concise yet detailed overview of research in the field over the past 10 years.
Hb: vii, 301 pp. 1-55619-506-0 $57.00

ANTHROPOLOGICAL LINGUISTICS

Anthropological Linguistics, a quarterly journal founded in 1959, provides a forum for the full range of scholarly study of the languages and cultures of the peoples of the world, and especially the native peoples of the Americas. Embracing the field of language and culture broadly defined, the editors welcome articles and research reports addressing cultural, historical, and philological aspects of linguistic study, including analyses of texts and discourse; studies of semantic systems and cultural classifications; onomastic studies; ethnohistorical papers that draw significantly on linguistic data; studies of linguistic prehistory and genetic classification, both methodological and substantive; discussions and interpretations of archival material; edited historical documents; and contributions to the history of anthropological linguistics. The journal also actively reviews new publications in the field.

INFORMATION FOR CONTRIBUTORS

LANGUAGE, the journal of the Linguistic Society of America, carries technical articles dealing with problems of linguistic science, reviews of recently published linguistic works, and notes of interest to professional linguists.

MANUSCRIPTS for publication and exchange JOURNALS should be sent to the Editor of LANGUAGE (Mark Aronoff, Dept. of Linguistics, SUNY Stony Brook, Stony Brook, NY 11794-4376) BOOKS for review should be sent to the Review Editor (Edwin Battistella, 209 Humanities, Wayne State College, Wayne, NE 68787). Manuscripts of articles and reviews should be submitted in FOUR copies; they will not be returned. LSA membership is not required for publication and manuscripts from non-LSA members are welcome.

An abbreviated LSA Style Sheet is provided below. For the complete Style Sheet, see the December LSA Bulletin or write to the editors.

Manuscript form. Manuscripts should be typed double-spaced throughout (including footnotes, quotations, and reference list) on $8\frac{1}{2} \times 11$ inch heavy-weight bond paper (ONE SIDE ONLY), with no less than 1 inch margins on all four sides. Type size should not be smaller than 12 characters per inch. Tables, charts, diagrams, extended quotations, and other passages to be set in smaller type (though not simple rules, examples, or formulae) must each appear on a separate sheet. All pages of the manuscript must be in a single pagination.

Abstract. Each manuscript submitted for publication should be accompanied by an abstract of about 100 words, summarizing the conceptual content of the article. It should be typed on a separate sheet of paper.

Text. Use only single quotation marks—never double except for quotes within quotes. Use a single straight underscore to indicate *italic type*, a double underscore for SMALL CAPITALS. Use normal capitalization. A letter, word, phrase, or sentence cited as a linguistic example or subject of discussion appears in *italics*—or else in phonetic or phonemic transcription, enclosed in square brackets or in slant lines.

Citations. Brief citations given in the text should take such forms as 'Examples are given in Nichols 1986', 'Bloomfield (1933:264) introduced the term ...', or 'Many coastal languages of the Northwest had sounds intermediate between nasal and voiced oral stops (Kinkade 1985).'

Footnotes. All footnotes must be typed (with double spacing) on a sheet or series of sheets following the main text. They must never appear on the same sheet with the text.

References. Full citation of literature referred to should be given in a bibliography at the end of each article or review, beginning on a separate page with the heading REFERENCES, and arranged alphabetically by surnames of authors. The format should be consistent with the following examples:

Bloomfield, Leonard. 1933. Language. New York: Holt.

Bolinger, Dwight. 1965. The atomization of meaning. Language 41.555–73.

Brugmann, Karl. 1906. Grundriss der vergleichenden Grammatik der indogermanischen Sprachen. 2nd edn., vol. 2, part 1. Strassburg: Trübner.

Campbell, Lyle, and Alice C. Harris. 1983. Review of historical morphology, ed. by Jacek Fisiak. Language 59.191–4.

Hockett, Charles F. 1964. The Proto Central Algonquian kinship system. Explorations in cultural anthropology, ed. by Ward Goodenough, 239–58. New York: McGraw-Hill.

Hymes, Dell (ed.) 1971. Pidginization and creolization of languages. Cambridge: Cambridge University Press.
