INDEX

Because of the nature of the intelligence reports included in this volume, an exhaustive index of every last place and person named in the text and notes would be unmanageable and unnecessary. In compiling the current index, therefore, the editor has highlighted only the more important places and persons, particularly those occurring more than once. In so doing, the editor has needed to go one step further than did Daniel Rogers in his own 'discourse', where he noted (at p. 121 of this volume), 'There are manie other fertile Islandes, whose names I will onlie rite, for to describe them all would be to longe'.
