PRENTICE-HALL EXPLORES:

5 diverse texts offering a progressive approach to the field of LINGUISTICS

GENERATIVE PHONOLOGY—Sanford A. Schane, Editor
(University of California, San Diego)

INTRODUCING—The theory and methodology of generative phonology, this new text surveys the principles of phonology for the beginning student. A concise outline and review of the common principles of all languages is included to increase understanding. The readings include the current works of Chomsky and Halle and a discussion of theoretical points of reference with examples from various languages.
1973 approx. 178 pp. cloth (013-350967-2) $7.95 paper (013-350959-1) $3.95

TRANSRACIAL COMMUNICATION—Arthur L. Smith
(University of California, Los Angeles)

NEW—This book describes a pattern for communication between different races and ethnic groups. Relevant issues are discussed applying a basic model of transracial communication within the framework of traditional communication theory. Topics covered prepare the student to approach interpersonal relationships with an awareness of the concepts of ethnicity and communication. Innovative material on symbolism in society and multi-cultural communication is included.
March 1973 approx. 128 pp. cloth (013-929505-4) $6.95 paper (013-929497-X) $3.50

MODERN THEORIES OF LANGUAGE—Philip W. Davis (Rice University)

NEW—A text presenting the essential features of nine 20th Century theories of language. Each theory is discussed in terms of the philosophy of science providing a background for comparison and a perspective for evaluation. Modern notations of language are offered allowing the reader to make his own evaluation of the theories presented.
October 1973 approx. 496 pp. cloth (013-598987-6) $12.95

GOALS OF LINGUISTIC THEORY—Stanley Peters, Editor
(University of Texas, Austin)

Discusses new and important positions on generative grammar, including the controversy over generative grammar and interpretative semantics. Other topics discussed include the place of semantic description in grammar, problems in empirically validating grammar, evaluation measures and an explanation of phonology.
1972 227 pp. cloth (013-357095-9) $9.95

LANGUAGE AND CULTURAL DIVERSITY IN AMERICAN EDUCATION—Roger D. Abrahams and Rudolph C. Troike (University of Texas, Austin)

A new anthology of readings that furnishes the teacher of minorities with a progressive approach to the problems of linguistic and cultural differences in the classroom. Teachers are instructed in the basic concepts of cultural and linguistic analysis and are then taught to recognize that these analytic tools must be used to gain an understanding of the public attitudes complicating effective results in education.
1972 339 pp. cloth (013-522896-4) $7.95 paper (013-522888-3) $4.95

FUNCTIONS OF LANGUAGE IN THE CLASSROOM

Edited by COURTNEY CAZDEN, VERA JOHN, and DELL HYMES

Much of the difficulty in American classrooms today arises out of conflict and confusion on the part of both teachers and students about norms for interpreting communication. The papers in this volume address themselves to this problem from several disciplinary perspectives — anthropology, linguistics, psychology, and sociology. The crucial issue for these authors is not so much a better understanding of how language is structured, but a better understanding of how language is used; not so much what language is, as what language is for.

Cambridge Studies in Linguistics

New Titles:

5. LINGUISTIC EVOLUTION

with Special Reference to English
M. L. SAMUELS

Presents a theory of linguistic change which is comprehensive enough to cover any type of change, including complex cases of multiple conditioning. The application of a proposed method of handling the problem of interpenetration is demonstrated from the history of English. $14.50

6. INFLECTIONAL MORPHOLOGY

A Theoretical Study Based on Aspects of Latin Verb Conjugation
P. H. MATTHEWS

The most thorough discussion of morphological theory to appear in many years, and the first major one within the framework of generative grammar as developed by Chomsky and others. While it is based on Latin, the book is addressed to theoretical and descriptive linguists in general and does not assume knowledge of Latin. $28.50

7. PHONOLOGICAL RULES AND DIALECT VARIATION

A Study of the Phonology of Lumasaaba
GILLIAN BROWN

Examines the functions of different types of rules in the phonological component of a generative grammar exemplifying especially from Lumasaaba, a Bantu language of eastern Uganda. The author shows that variation in dialects can be attributed to the difference in application within each dialect of a very small common set of phonological rules. $19.00

8. THE GENERATIVE INTERPRETATION OF DIALECT

A Study of Modern Greek Phonology
BRIAN NEWTON

A description of the phonology of modern Greek dialects from the point of view of their historical development insofar as this may be reconstructed from their modern form. Morphological alterations which often arise from the action of sound change are also discussed. $21.00

9. THE DYIRBAL LANGUAGE OF NORTH QUEENSLAND

R. M. W. DIXON

A comprehensive grammar of an aboriginal language in which the author gives the basic facts independently of any particular linguistic theory and then describes Dyirbal syntax in terms of the latest ideas of transformational grammar. Includes some aboriginal texts and a vocabulary. $28.50

GUIDE TO TRANSFORMATIONAL GRAMMAR: History, Theory, Practice
John T. Grinder, University of California, Santa Cruz
Suzette Haden Elgin, California State University at San Diego
A basic introductory text in transformational grammar designed specifically for students without previous exposure to linguistics and including numerous pretested exercises.
CONTENTS:
Why Linguistics Is Worth Doing. The Task of the Linguist. The Historical Antecedents of TG. The Beginning of Generative Grammar. Early Transformational Syntax. Families of Transformations. Early Semantics. The First Complete Model, Chomsky's *Aspects*. The Cycle. Generative Semantics versus the Extended Standard Theory. The Application of TG to Literary Analysis. Generative Phonology. Universal Grammar.
Published: January, 1973 224 pages

THE MAJOR SYNTACTIC STRUCTURES OF ENGLISH
Robert P. Stockwell, UCLA
Paul Schachter, UCLA
Barbara Hall Partee, University of Massachusetts
This text presents a synthesis of transformational theory with lexicalist and case-grammar versions of the theory. Emphasis is placed on formulating a full and coherent grammar of English from this point of view.
Published: January 1973 Paperback 864 pages

READINGS IN APPLIED TRANSFORMATIONAL GRAMMAR, Second Edition
Mark Lester, University of Hawaii
This new edition offers more extensive and updated material on the applications of TG to Reading, English as a Second Language, and Black English. There are also sections on TG and Language Acquisition, and TG as applied to Literature and to Composition.
February 1973 Paperback 350 pages

A VARIOUS LANGUAGE: Perspectives on American Dialects
Juanita Williamson, LeMoyne-Owen College
Virginia M. Burke, University of Wisconsin, Milwaukee
Introduced by Hans Kurath, a collection of the best papers on historical, literary, regio-social, and socio-economic viewpoints about dialects. This text also makes available abstracts of 30 recent dissertations. 736 pages

HISTORICAL AND COMPARATIVE LINGUISTICS: A Reader
Allan R. Keiler, University of Michigan
A collection of 20 selections providing comprehensive coverage of Linguistic Reconstruction; Theory of Sound Change; Diachronic Syntax; Dialectology; Universals and Typology. 370 pages

A HISTORY OF ENGLISH SYNTAX
Elizabeth Closs Traugott, Stanford University
An introduction to the history of English sentence structure from the latter half of the ninth century to the present day, written from the transformational point of view with an emphasis on case grammar, and a postscript on the position of Black English in the history of the English Language.

Seminar Press presents the definitive English grammar for the second half of the twentieth century . . .

A GRAMMAR OF CONTEMPORARY ENGLISH

by RANDOLPH QUIRK, Quain Professor of English, Univ. of London, SIDNEY GREENBAUM, Professor of English, Univ. of Wisconsin, Milwaukee, GEOFFREY LEECH, Reader of English, Univ. of Lancaster, and JAN SVARTVIK, Professor of English, Univ. of Lund

From the Preface: ". . . there have been very few attempts at so comprehensive a coverage as is offered in the present work. Fewer still in terms of synchronic description. And none at all so comprehensive or in such depth has been produced within an English speaking country. Moreover, our **Grammar** aims at this comprehensiveness and depth in treating English irrespective of frontiers: our field is no less than the grammar of educated English current in the second half of the twentieth century in the major English-speaking communities in the world."

1972, 1120 pp., $24.50

SYNTAX AND SEMANTICS, Volume 1

edited by JOHN KIMBALL

This volume is the first of a series covering the most recent research in transformational linguistics. Based on a Summer Conference in Linguistics held at the University of California, Santa Cruz, on July 17-18, 1971, Volume 1 discusses in detail several areas at the frontiers of linguistic research. It deals with various aspects of the semantics of natural language, including modality and presupposition, as well as the current controversy involving generative and interpretive semantics — a controversy that centers around the lexical decomposition hypothesis maintained by proponents of generative semantics. Other topics discussed in Volume 1 include: alternatives to the transformation cycle in syntax, lexicalization in a transformational grammar, and the use of lexical items to replace complex subtrees in the process of lexical insertion.

MARXISM AND THE PHILOSOPHY OF LANGUAGE

by VALENTIN NIKOLAEVIC VOLOŠINOV

translated by I. R. TITUNIK and LADISLAV MATEJKA

A Volume in the STUDIES IN LANGUAGE Series

"Vološinov's book, **Marxism and the Philosophy of Language,** is one of the important international publications of the last 50 years in linguistic and semiotic theory and in the analysis of discourse. The book consists of three parts, the first two penetratingly discuss problems of philosophy of language; in particular, the question of relations between language and ideology, the place of language in the light of general semiotics, the relation between linguistics and psychology, the inner speech, and problems of introspection as well as dialectic of language. Saussurian doctrine and the Crocean trend are submitted to a profound comparative analysis.

"The third part, entitled, 'To the History of Utterance Forms in Linguistic Constructions', offers a masterful investigation of syntactic problems and in particular of the intersentential relations. . . ." — ROMAN JAKOBSON, Harvard University.

African Language Structures
William E. Welmers
Drawing on 30 years of experience in African languages, Professor Welmers surveys a wide range of structural characteristics, both phonological and grammatical, of the languages of sub-Saharan Africa. He has organized the volume by linguistic topics with extensive discussions of tonal systems, noun classifications, and verbal constructions.

Linguistic Change
And the Great Vowel Shift in English
Patricia M. Wolfe
One of the most striking phenomena in the history of English is the Great Vowel Shift of the 15th Century when many of the long vowel sounds acquired their present values. Dr. Wolfe re-examines the different theories concerning the development of certain Middle English vowels, the nature of those traditionally analyzed as long vowels, and the validity of exchange rules as formulations of a sound change.

PUBLICATIONS

of the

Linguistic Society of America

LANGUAGE, the journal of the Linguistic Society of America, carries technical articles dealing with problems of linguistic science, reviews of recently published linguistic works, and notes of interest to professional linguists.

As supplements to LANGUAGE, the Linguistic Society of America issues a series of occasional publications, LANGUAGE MONOGRAPHS. These are included in the subscription price of the journal, but may also be purchased separately. In the LANGUAGE MONOGRAPH series, the Society publishes independently subsidized studies which are too long to appear as articles or are otherwise unsuitable for publication in the journal. The method of application for admission to this series of supplements, and the terms of publication, may be secured from the Secretary of the Society.

SPECIAL PUBLICATIONS in the field of linguistic science are issued by the Society from time to time. These are not included in the subscription price of the journal.

MEETING HANDBOOKS, which contain program listings and abstracts of papers presented at LSA Annual Meetings, 1965 through 1972, may also be purchased separately.

A list of publications in print is available from the Secretary of the Society. Current prices for LANGUAGE are as follows: Complete volume 43, $8.00; volume 45 onward, $16.00; single numbers currently in print from volumes 39–44, $3.00; volume 45 onward, $6.00. Reprint editions of volumes 1–42 and 44 of LANGUAGE, Monographs 1–21, 25–26, and Dissertations 1–57 are available from Kraus Reprint Corporation, 16 East 46th Street, New York, N.Y. 10017, and a price list can be obtained from that address.
