# Linguistic Society of America

LANGUAGE, the journal of the Linguistic Society of America, carries technical articles dealing with problems of linguistic science, reviews of recently published linguistic works, and notes of interest to professional linguists.

As supplements to LANGUAGE, the Linguistic Society of America issues a series of occasional publications, LANGUAGE MONOGRAPHS. These are included in the subscription price of the journal, but may also be purchased separately. In the LANGUAGE MONOGRAPH series, the Society publishes independently subsidized studies which are too long to appear as articles or are otherwise unsuitable for publication in the journal. The method of application for admission to this series of supplements, and the terms of publication, may be secured from the Secretary of the Society.

SPECIAL PUBLICATIONS in the field of linguistic science are issued by the Society from time to time. These are not included in the subscription price of the journal.

MEETING HANDBOOKS, which contain program listings and abstracts of papers presented at LSA Annual Meetings, 1965 through 1971, may be purchased separately.

A list of publications in print is available from the Secretary of the Society. Current prices for LANGUAGE are as follows: Complete volume 43, $8.00; volume 45 onward, $16.00; single numbers currently in print from volumes 39–44, $3.00; volume 45 onward, $6.00. Reprint editions of volumes 1–42 and 44 of LANGUAGE, Monographs 1–21, 25–26, and Dissertations 1–57 are available from Kraus Reprint Corporation, 16 East 46th Street, New York, N.Y. 10017, and a price list can be obtained from that address.

**The Language & Thought Series**

under the general editorship of
Jerrold J. Katz, M.I.T. and the Graduate Center, CUNY;
D. Terence Langendoen, the Graduate Center, CUNY;
and Harris Savin, University of Pennsylvania.

**THE LANGUAGE OF THOUGHT**
Jerry A. Fodor

**AN INTEGRATED THEORY OF LINGUISTIC ABILITIES**
Thomas Bever, Jerrold J. Katz, and D. Terence Langendoen
(in preparation)

**INTRODUCTION TO LINGUISTIC SEMANTICS**
Charles J. Fillmore (in preparation)

**PROPOSITIONAL STRUCTURE: A STUDY OF THE CONTRIBUTION OF SENTENCE MEANING TO SPEECH ACTS**
Jerrold J. Katz (in preparation)

**SEMANTICS**
Janet Dean Fodor (in preparation)

**"There used to be a discipline called speculative psychology.** It wasn't quite philosophy because it was concerned with empirical theory construction. It wasn't quite psychology because it wasn't an experimental science. But it used the methods of both philosophy and psychology because it was dedicated to the notion that scientific theories should be both conceptually disciplined and empirically constrained." From the preface of the first book in this distinguished series,

**THE LANGUAGE OF THOUGHT**
**JERRY A. FODOR**

**214 pages $10 Cloth**

From the contents: Preface . . . Introduction: Two Kinds of Reductionism . . . First Approximations . . . Private Language, Public Languages: Why There Has To Be a Private Language . . . The Structure of the Internal Code: Some Linguistic Evidence . . . The Structure of the Internal Code: Some Psychological Evidence . . . Conclusion: Scope and Limits . . . Bibliography

For your examination copy of **The Language of Thought**, write on your letterhead to Phillip Leininger, Thomas Y. Crowell Company, 666 Fifth Avenue, New York, NY 10019

**Language Structure and Translation**

**Essays by Eugene A. Nida**

*Selected and Introduced by Anwar S. Dil.* Twelve essays by an eminent linguist and Bible scholar deal with aspects of the function of language structure, and especially semantic structure, in translational equivalence across languages and cultures. Topics include principles of translation, the problem of language and communication in multilingual societies, and the relevance of contemporary linguistics to Biblical scholarship. *Language Science and National Development Series.* $10.00

## EXPLORATIONS IN THE ETHNOGRAPHY OF SPEAKING

RICHARD BAUMAN and JOEL SHERZER, Editors

Through case studies of languages and cultures around the world, this volume attempts to identify and analyze the dynamic interrelationships among the elements involved in speech and to construct a descriptive theory of speaking as a cultural system tied to a particular society.

Cloth $27.50 Paper $8.95

## DYNAMICS OF A CREOLE SYSTEM

DEREK BICKERTON

In this extensive study the author assesses the implications of his findings on the generally accepted ideas about the nature of language, including Chomsky's competence-performance distinction and the distinction between synchronic and diachronic studies. His thorough research and analysis lead him to support theories of the Creole origins of the Black American dialect.

$18.50

## LEXICAL RECONSTRUCTION

The Case of the Proto-Athapaskan Kinship System

ISIDORE DYEN and DAVID F. ABERLE

"A quite important contribution. . . . It presents explicit methodology for reconstruction, it carries through the logic and canons of its methodology and shows what the results are—and does so on the side of linguistic reconstruction and on the side of cultural/social interpretation."—Dell Hymes, *Professor of Folklore and Linguistics, University of Pennsylvania* $27.50

*Cambridge Paperbacks in Linguistics*

### EARLY SYNTACTIC DEVELOPMENT

A Cross-Linguistic Study with Special Reference to Finnish

MELISSA BOWERMAN $7.95

### TRANSFORMATIONAL GRAMMAR AS A THEORY OF LANGUAGE ACQUISITION

BRUCE L. DERWING $8.95

### PIDGINIZATION AND CREOLIZATION OF LANGUAGES

DELL HYMES, Editor $7.95

### MORPHOLOGY

An Introduction to the Theory of Word-Structure

P. H. MATTHEWS $4.95

### LINGUISTIC EVOLUTION WITH SPECIAL REFERENCE TO ENGLISH

M. L. SAMUELS $5.50

# APPLYING LINGUISTICS TO LANGUAGE TEACHING

## SEMANTIC THEORY

*Donald L. F. Nilson and Alleen Pace Nilson.* In this lucid investigation of language form and meaning, the Nilsons show you how to use universal semantic theory to relate linguistics to other disciplines. Unlike most specialists, they treat *meaning* as central and form as peripheral to the concerns of the student (and thus the teaching). Assuming no prior knowledge of linguistics on the student's part, this text examines meaning on the progressive levels of the word, the sentence, and the discourse — treating such subtleties as ambiguity and paraphrase as they arise. Eclectic, interdisciplinary, and pre-tested in the classroom, *Semantic Theory* is designed as a primary text for Introduction to Linguistics, Structure of English, or Communication Theory courses — and an important supplement for Introduction to Philosophy. ☐ $11.95; ☐ paper, $6.95.

## LANGUAGE STRUCTURES IN CONTRAST

*Robert J. DiPietro.* Offering a bridge between contrastive linguistics and foreign language teaching, this undogmatically-transformational reference provides teachers the linguistic foundations needed to make best use of current pedagogical devices in foreign language or ESL teaching. Discussion topics and problems for students are presented after each chapter.
☐ $6.95.

## GENERATIVE GRAMMAR, STRUCTURAL LINGUISTICS, AND LANGUAGE TEACHING

*Karl C. Diller.* Subjecting the traditional, repetitive audiolingual drill approach in language teaching to critical scrutiny, Diller presents the case for the more rationalistic approach championed by the new school of generative grammarians — with some provocative comparisons of results achieved by the two methods. ☐ paper, $4.95.

## TOPICS IN APPLIED LINGUISTICS

*Ronald Wardhaugh.* This wide-ranging collection of papers is designed to update the perspective of the teacher of reading or English-as-a-Second Language regarding useful linguistic insights which relate to language . . . spelling . . . reading . . . second-language teaching . . . contrastive analysis . . . and language variation. ☐ $10.95; ☐ paper, $6.95.

# A remarkable textbook addressed to students with no prior training in linguistics.

Contents

1 Introduction
2 English Morphology
3 English Constituent Structure
4 English Phrase-Structure Rules
5 Transformational Syntax of English Simple Sentences: I
6 Transformational Syntax of English Simple Sentences: II
7 Transformational Syntax of English Complex Sentences
8 Expanding the Grammar: Practice in Syntactic Research
9 English Semantics
10 English Phonology

Makes clear not only the conflict between American Structural Linguistics and Generative-Transformational Linguistics but also the contributions of both theories to our understanding of language. Throughout, the strategy is to give prime consideration to the facts of language which create the need for concepts and systems, not the reverse. The book features an unusually strong treatment of morphology.

1975 272 pp. $7.50 hardcover

# Syntax and Semantics

edited by JOHN P. KIMBALL

SYNTAX AND SEMANTICS is an important series that provides comprehensive coverage of the latest studies in contemporary linguistics. Each volume discusses topics at the frontiers of linguistic research —including the semantics of natural language and the theoretical bases of linguistics—and presents recent advances in transformational linguistics.

**VOLUME 3/Speech Acts**
edited by PETER COLE and JERRY MORGAN

CONTENTS: *D. W. Stampe*, Meaning and Truth in the Theory of Speech Acts. *H. P. Grice*, Logic and Conversation. *J. R. Searle*, Indirect Speech Acts. *D. Gordon and G. P. Lakoff*, Conversational Postulates. *G. M. Green*, How to Get People to Do Things with Words: The Whimperative Question. *A. Davison*, Indirect Speech Acts and What to Do with Them. *B. Fraser*, Hedged Performatives. *S. F. Schmerling*, Asymmetric Conjunction and Rules of Conversation. *J. R. Ross*, Where to Do things with Words. *P. Cole*, The Synchronic and Diachronic Status of Conversational Implicature. *J. Morgan*, Some Interactions of Syntax and Pragmatics. *R. T. Garner*, Meaning. *R. A. Wright*, Meaning and Conversational Implicature. *J. M. Sadock*, The Soft, Interpretive Underbelly of Generative Semantics.

*Volume 3/1975, in preparation*

**VOLUME 4**
edited by JOHN P. KIMBALL

CONTENTS: *A. Zwicky and J. M. Sadock*, Ambiguity Tests and How to Fail Them. *G. Ioup*, Some Universals for Quantifier Scope. *T. Givon*, Cause and Control: On the Semantics of Interpersonal Manipulation. *J. B. Hooper*, On Assertive Predicates. *P. Lysvag*, Verbs of Hedging. *J. P. Kimball*, Predictive Analysis and Over-the-Top Parsing. *L. Talmy*, Semantic Structures in English and Atsugewi. *J. Grinder and S. H. Elgin*, Bully for Us. *E. S. Williams*, Small Clauses in English.

*Volume 4/1975, in preparation*

**VOLUME 5/Japanese Generative Grammar**
edited by MASAYOSHI SHIBATANI

TENTATIVE CONTENTS: *S.-Y. Kuroda*, Subject. *S. Kuno*, Subject Raising. *N. A. McCawley*, Reflexivization: A Transformational Approach. *K. Inoue*, Reflexivization: An Interpretive Approach. *I. Howard and A. M. Niyekawa-Howard*, Passivization. *M. Shibatani*, Causativization. *J. D. McCawley*, Relativization. *L. S. Josephs*, Complementation. *N. H. McGloin*, Negation. *M. Nakau*, Tense, Aspect, and Modality. *S. Makino*, Nominal Compounds. *S. I. Harada*, Honorifics.

*Volume 5/1975, in preparation*

# A Word Geography of England

by HAROLD ORTON and NATHALIA WRIGHT

This book contains 251 word maps showing clearly how elderly, dialect-speaking English men and women use different dialect words for common notions. This is done by means of boundary lines or isoglosses, drawn onto a base map, enclosing areas throughout which a particular expression was recorded.

Readers will find that the introduction which describes the procedures used to produce the maps, as well as explaining their significance, is not only useful in conjunction with the maps, but is fascinating in its own right.

*1974, 320 pp., $26.00/ £9.80*

Prices subject to change without notice.

# speech and reading

# Syntax and Semantics

**An Introduction to the Principles of Transformational Syntax**
*by Adrian Akmajian and Frank Heny*

Noam Chomsky has stated that "Akmajian and Heny have undertaken a difficult and challenging task and have, I believe, succeeded admirably in carrying it out. Their *Introduction to the Principles of Transformational Syntax* proceeds systematically from simple examples to problems of considerable complexity that are often near or at the borders of research in the field. Each stage of the presentation is careful and lucid. The basis is developed at each stage for posing the natural problems that arise at the next level of complexity. The authors show how to formulate plausible, if sometimes controversial, solutions to these problems. A student who works through this material with care will have an excellent grasp of work in transformational syntax and the problems that motivate it. I think it is an excellent text."

**$14.95**

**The Psychology of Reading**
*by Eleanor J. Gibson and Harry Levin*

In this book, two psychologists apply principles of cognitive psychology to understanding reading. Unlike most other books on the subject, this one presents a consistent theoretical point of view and applies it to the acquisition of reading and what the skilled reader does.

The first part of *The Psychology of Reading* covers perceptual learning, the development of cognitive strategies, the development of language, the nature of writing systems, and an extensive review of the research on word recognition.

In the second part of the book, the authors look closely at abilities that children bring to school before learning to read. They describe the acquisition of initial reading skills and transition to skilled reading, the nature of the reading process in adult readers, and the ways people learn from reading.

The book's third part takes up questions people frequently ask about reading—such as reading by deaf children, dyslexia, the influence of nonstandard dialects on learning to read, comparison of reading achievement across different nations and different languages, and the debatable virtues of "speed reading."

**$18.95**

**The Role of Speech in Language**
*edited by James F. Kavanagh and James E. Cutting*

Is our understanding of language increased when we take into account that it is spoken? This question served as the point of departure for the twenty-eight papers and commentaries contained in *The Role of Speech in Language.*

In three parts—"The Development of Speech in Man and Child," "Language without Speech," and "Phonology and Language"—the book takes up the problems of how and within what limits the acoustic signal, the articulation that produces it, and the phonetic message it conveys are related to the rest of the language system.

**$15.00**
