visual neuroscience

Volume 28 **January 2011** **Number 1**

CONTENTS

Introduction

Scott Nawy and Henrique von Gersdorff **1** Bipolar cells in the vertebrate retina: from form to function

Bipolar cell form and circuitry

Research Articles

Stan Schein, Ivy Tran Ngo,Teresa M. Huang, Karl Klug, Peter Sterling, and Steve Herr **3** Cone synapses in macaque fovea: I. Two types of non-S cones are distinguished by numbers of contacts with OFF midget bipolar cells

Steve Herr, Ivy Tran Ngo, Teresa M. Huang, Karl Klug, Peter Sterling, and Stan Schein **17** Cone synapses in macaque fovea: II. Dendrites of OFF midget bipolar cells exhibit Inner Densities similar to their Outer synaptic Densities in basal contacts with cone terminals

Hannah R. Joo, Beth B. Peterson, Toni J. Haun, and Dennis M. Dacey **29** Characterization of a novel large-field cone bipolar cell type in the primate retina: Evidence for selective cone connections

Ulrike Grünert, Patricia R. Jusuf, Sammy C.S. Lee, and Dung Than Nguyen **39** Bipolar input to melanopsin containing ganglion cells in primate retina

Review Article

Christian Puller and Silke Haverkamp **51** Bipolar cell pathways for color vision in non-primate dichromats

Bipolar cell function

Research Article

E. Brady Trexler, Alexander R.R. Casti, and Yu Zhang **61** Nonlinearity and noise at the rod—rod bipolar cell synapse

Review Articles

Dwight A. Burkhardt **69** Contrast processing by ON and OFF bipolar cells

V.P. Connaughton **77** Bipolar cells in the zebrafish retina

Erika D. Eggers and Peter D. Lukasiewicz **95** Multiple pathways of inhibition shape bipolar cell responses in the retina

Qun-Fang Wan and Ruth Heidelberger **109** Synaptic release at mammalian bipolar cell terminals

https://doi.org/10.1017/S0952523811000484 Published online by Cambridge University Press

Volume 28 March 2011 Number 2

CONTENTS

Research Articles

Andrea Fabiano, Isabella Panfoli, Daniela Calzia, Maurizio Bruschi, Silvia Ravera, Angela Bachi, Angela Cattaneo, Alessandro Morelli, and Giovanni Candiano **121** Catalytic properties of the retinal rod outer segment disk ADP-ribosyl cyclase

Jan Kremers, Neil R.A. Parry, Athanasios Panorgias, and Ian J. Murray **129** The influence of retinal illuminance on L- and M-cone driven electroretinograms

Bryan A. Daniels and William H. Baldridge **137** The light-induced reduction of horizontal cell receptive field size in the goldfish retina involves nitric oxide

Eyal Margalit, Norbert Babai, Jianmin Luo, and Wallace B. Thoreson **145** Inner and outer retinal mechanisms engaged by epiretinal stimulation in normal and rd mice

R.S. Wang, P.L. Lv, W.J. Wang, X.D. Wang, X.J. Zhang, S.N. Li, J.Z. Wang, and Y.J. Zeng **155** Establishing an experimental model of photodynamically induced anterior ischemic optic neuropathy

Janelle M.P. Pakan, David J. Graham, Cristián Gutiérrez-Ibáñez, and Douglas R. Wylie **163** Organization of the cerebellum: Correlating zebrin immunochemistry with optic flow zones in the pigeon flocculus

Brief Communication

Bradly Q. Vo, A. Joseph Bloom, and Susan M. Culican **175** *Phr1* is required for proper retinocollicular targeting of nasal–dorsal retinal ganglion cells

https://doi.org/10.1017/S0952523811000484 Published online by Cambridge University Press

Volume 28 **May 2011** **Number 3**

CONTENTS

Research Articles

Dwight A. Burkhardt, Theodore M. Bartoletti, and Wallace B. Thoreson	**183**	Center/surround organization of retinal bipolar cells: High correlation of fundamental responses of center and surround to sinusoidal contrasts
Xin Chen, Hain Ann Hsueh and Frank S. Werblin	**193**	Amacrine-to-amacrine cell inhibition: Spatiotemporal properties of GABA and glycine pathways
Martin Wilson, Nick Nacsa, Nathan S. Hart, Cynthia Weller, and David I. Vaney	**205**	Regional distribution of nitrergic neurons in the inner retina of the chicken
Bruce C. Hansen, Theodore Jacques, Aaron P. Johnson, and Dave Ellemberg	**221**	From spatial frequency contrast to edge preponderance: the differential modulation of early visual evoked potentials by natural scene stimuli
Sophie M. Wuerger, Alexa Ruppertsberg, Stephanie Malek, Marco Bertamini, and Jasna Martinovic	**239**	The integration of local chromatic motion signals is sensitive to contrast polarity
Yelda Alkan, Bharat B. Biswal, Paul A. Taylor, and Tara L. Alvarez	**247**	Segregation of frontoparietal and cerebellar components within saccade and vergence networks using hierarchical independent component analysis of fMRI

https://doi.org/10.1017/S0952523811000484 Published online by Cambridge University Press

Volume 28 July 2011 Number 4

CONTENTS

Introduction

Barbara L. Finlay and Daniel C. Osorio **263** Comparative, ecological, and developmental aspects of visual system design and function

Evolution and eye design

Review Articles

M. Desmond Ramirez, Daniel I. Speiser, M. Sabrina Pankey, and Todd H. Oakley **265** Understanding the dermal light sense in the context of integrative photoreceptor cell biology

S.E. Temple **281** Why different regions of the retina have different spectral sensitivities: A review of mechanisms and functional significance of intraretinal variability in spectral sensitivity in vertebrates

Research Articles

Stefan Fischer, Carsten H.G. Müller, and V. Benno Meyer-Rochow **295** How small can small be: The compound eye of the parasitoid wasp *Trichogramma evanescens* (Westwood, 1833) (Hymenoptera, Hexapoda), an insect of 0.3- to 0.4-mm total body size

Scott M. Taylor, Ellis R. Loew, and Michael S. Grace **309** Developmental shifts in functional morphology of the retina in Atlantic tarpon, *Megalops atlanticus* (Elopomorpha: Teleostei) between four ecologically distinct life-history stages

James M. Morrow, Savo Lazic, and Belinda S.W. Chang **325** A novel rhodopsin-like gene expressed in zebrafish retina

Perception and representation

Perspective

Martin Wilson and Sarah H. Lindstrom **337** What the bird's brain tells the bird's eye: the function of descending input to the avian retina

Research Articles

Hie Rin Lee and Keely M. Bumsted O'Brien **351** Morphological and behavioral limit of visual resolution in temperate (*Hippocampus abdominalis*) and tropical (*Hippocampus taeniopterus*) seahorses

Maja Stojcev, Nils Radtke, Daniele D'Amaro, Adrian G. Dyer, and Christa Neumeyer **361** General principles in motion vision: Color blindness of object motion depends on pattern velocity in honeybee and goldfish

Daniel J. Graham and Ming Meng **371** Artistic representations: Clues to efficient coding in human vision

https://doi.org/10.1017/S0952523811000484 Published online by Cambridge University Press

Volume 28 **September 2011** **Number 5**

CONTENTS

Research Articles

William N. Grimes, Rebecca P. Seal, Nicholas Oesch, Robert H. Edwards, and Jeffrey S. Diamond	**381**	Genetic targeting and physiological features of VGLUT3+ amacrine cells
T.P. Middleton and D.A. Protti	**393**	Cannabinoids modulate spontaneous synaptic activity in retinal ganglion cells
Walter F. Heine and Christopher L. Passaglia	**403**	Spatial receptive field properties of rat retinal ganglion cells
Zuley Rivera-Alvidrez, Ichi Lin, and Charles M. Higgins	**419**	A neuronally based model of contrast gain adaptation in fly motion vision
Thomas Fitzgibbon and Nick Kikuchi	**433**	Projections from cingulate cortex to the cat's thalamic reticular nucleus
Samuel W. Cheadle and Semir Zeki	**445**	Masking within and across visual dimensions: Psychophysical evidence for perceptual segregation of color and motion

https://doi.org/10.1017/S0952523811000484 Published online by Cambridge University Press

Volume 28 November 2011 Number 6

CONTENTS

Review Article

Aaron J. Mercer and Wallace B. Thoreson **453** The dynamic architecture of photoreceptor ribbon synapses: Cytoskeletal, extracellular matrix, and intramembrane proteins

Research Articles

Alan D. Springer, David Troilo, Daniel Possin and Anita E. Hendrickson **473** Foveal cone density shows a rapid postnatal maturation in the marmoset monkey

Sadaharu Miyazono, Tomoki Isayama, François C. Delori and Clint L. Makino **485** Vitamin A activates rhodopsin and sensitizes it to ultraviolet light

I.I. Pushchin, T.A. Podugolnikova and S.L. Kondrashev **499** A multivariate approach to structural heterogeneity of retinal ganglion cells

Ana Karla Jansen-Amorim, Bruss Lima, Mario Fiorani and Ricardo Gattass **513** GABA inactivation of visual area MT modifies the responsiveness and direction selectivity of V2 neurons in *Cebus* monkeys

Benoit Musel, Ruxandra Hera, Sylvie Chokron, David Alleysson, Christophe Chiquet, Jean-Paul Romanet, Nathalie Guyader and Carole Peyrin **529** Residual abilities in age-related macular degeneration to process spatial frequencies during natural scene categorization

Brief Communication

Golnaz Shahabi and Glen Jeffery **543** Glatiramer acetate elevates cell production in the mature retinal pigment epithelium

Announcement

547 2011 Young Investigator Award

549 Acknowledgment to Reviewers

553 Author/Keyword Index to Volume 28, 2011

557 Contents to Volume 28
