Instructions to Publishers

1. Complete and file one copy of this form with your postmaster annually on or before October 1. Keep a copy of the completed form for your records.

2. In cases where the stockholder or security holder is a trustee in items 10 or 11, include the name of the person or corporation for whom the trustee is acting. Also include in item 10 the names and addresses of all stockholders owning or holding one (1) percent or more of the total amount of stock. If not owned by a corporation, give the name and address of each individual owner. If owned by a partnership or other unincorporated firm, give its name andaddress as well as the name and address of each individual owner. If the publication is published by a nonprofit organization, give its name and address and complete item 12. In item 11, include all bondholders, mortgagees, and other security holders owning or holding one (1) percent or more of the total amount of bonds, mortgages, or other securities. If none, check the box. Use blank sheets if more space is required.

3. Be sure to furnish all circulation information called for in item 15. Free Non-Requested circulation must be shown in item 15d.

4. Item 15g, Copies not Distributed, must include (1) newsstand copies returned to the publisher, (2) estimated returns from news agents, and (3), copies for office use, leftovers, spoiled, and all other copies not distributed.

5. If the publication had Periodicals authorization as a general publication, this Statement of Ownership, Management, and Circulation must be published, i.e., it must be printed in an issue that's primary mailed distribution is produced not later than October 10 for publications issued more frequently than weekly; or not later than October 31 for publications issued weekly or less frequently but more frequently than monthly; or in the first issue that's primary mailed distribution is produced after October 1 for all other publications.

6. In item 16, check the box if electronic copies are being included in your total distribution and complete line items 16a through d.

7. In item 17, report the date of the issue in which this Statement of Ownership will be published, if applicable.

8. Item 17 must be signed.

Failure to file or publish a statement of ownership may lead to suspension of periodicals authorization.

STUDIES IN SECOND LANGUAGE ACQUISITION
Information for Contributors

For guidelines and requirements regarding manuscript submission, please consult the *SSLA* website at http://journals.cambridge.org/sla. Click on the Journal Information tab which will lead you to Information for Contributors. Potential authors are advised that all manuscripts are internally reviewed for both content and formatting/style in order to determine their suitability for external evaluation.

Research Article. These manuscripts may be essays or empirical studies, either of which must be motivated by current theoretical issues in second and subsequent language acquisition or heritage language acquisition, including methodological issues in research design and issues related to the context of learning. Maximum length is 11,000 words all-inclusive (i.e., abstract, text, tables, figures, references, notes, and appendices intended for publication must all fall within the 10,000 word limit).

Research Report. These manuscripts are shorter empirical studies motivated by current theoretical issues in second and subsequent language acquisition or heritage language acquisition, including methodological issues in research design. Very often, these are narrowly focused studies or they present part of the results of a larger project in progress. The background and motivation sections are generally shorter than research articles. Maximum length is 6,000 words all-inclusive (i.e., abstract, text, tables, figures, references, notes, and appendices intended for publication must all fall within the 6,000 word limit).

Replication Study. These manuscripts are empirical studies that replicate the research design and methods of a previously published study, with or without changes. The study selected for replication should have impacted empirical and/or theoretical work relevant to SLA. Replications can be direct (exact, close, approximate) or conceptual, and should identify and motivate the study selected for replication as well as any changes made. The maximum length is 10,000 words all-inclusive (i.e., abstract, text, tables, figures, references, notes, and appendices intended for publication).

State-of-the-Scholarship Article. These manuscripts are essays that review the extant research on a particular theme or theoretical issue, offering a summary of findings and making critical observations on the research to date. Manuscripts in this category typically fall within the 10,000-word limit; however, longer manuscripts may be considered on a case-by-case basis.

Critical Commentary. These manuscripts are shorter essays (i.e., non-empirical) motivated by current theory and issues in second and subsequent language acquisition or heritage language acquisition, including methodological issues in research design and issues related to the context of learning. Maximum length is 6,000 words all-inclusive (i.e., abstract, text, tables, figures, references, notes, and appendices intended for publication must all fall within the 6,000 word limit).

Methods Forum. Recognizing the need to discuss and advance SLA research methods, these manuscripts seek to advance methodological understanding, training, and practices in the field. Submissions can be conceptual or empirical; we also encourage articles introducing novel techniques. All research paradigms, epistemologies, ontologies, and theoretical frameworks relevant to SLA are welcome. The target length is up to 10,000 words, although longer manuscripts will be considered with justification.

Data Reports. Data Reports describe an openly available dataset that could be used by others in the field for subsequent analysis. Examples of the types of data that authors might present in such a paper include a tagged corpus of L2 writing with detailed metadata, a set of speech stimuli, or a list of vocabulary items normed for frequency. In addition to a thorough description of how the data were collected, coded, prepared, and so forth, such submissions might also include brief demonstrations of the types of questions the data set can be used to address. There must be strong potential for the data to be used by others in a variety of ways. The target length is 10,000 words but shorter submissions are also very welcome.

All manuscripts in all categories are peer reviewed and subject to the same high standards for publication in *SSLA*.
