THE ROYAL INSTITUTE OF NAVIGATION

Aims and Objects

The objects of the Institute are to unite in one body those who are concerned with or who are interested in navigation and to further its development. Navigation is conceived as applying to locomotion of all kinds and is perceived as encompassing aspects of: command and control, psychology and zoology, operational research, risk analysis, theoretical physics, operation in hostile environments, instrumentation, ergonomics, financial planning and law as well as electronics, astronomy, mathematics, cartography and other subjects traditionally associated with navigation.

The aims of the Institute are to encourage the creation and dissemination of knowledge through research and development, to co-ordinate information from all the disciplines involved, to provide a forum in which new ideas and new products can have the benefit of informed and professional scrutiny and to further education and communication. The Institute initiates conferences and symposia on specific subjects and has a programme of meetings at which lectures are given and discussed. There are standing Special Interest Groups (SIGs), which keep under constant review pertinent aspects of navigation. The success of these Special Interest Groups is crucially dependent on the active involvement of members.

The SIGs include: Land Navigation and Location Group (LN&L), General Aviation Navigation Group (GANG), History of Air Navigation Group (HANG), Civil and Military Air Group (CMAG), Marine Traffic & Navigation Group (MT&NG), Small Craft Group (SCG), Space Group (Space), Animal Navigation Group (ANG) and Research & Development Group (R&D).

The Institute publishes *The Journal of Navigation* six times a year. It contains papers which have been presented at meetings, other original papers and selected papers and reports from Special Interest Groups. The Institute also publishes *Navigation News* six times a year which contains a full account of the Institute's proceedings and activities. This includes Branch News, a record of current navigational work, a diary of events, topical articles, news about Membership and advertising. A great deal of the Institute's work is international in character and is coordinated with that of similar organisations in other countries.

Membership

There are nine classes of membership under which individuals or organisations may apply to join the Institute. Details of the various membership criteria and current subscriptions are available on the RIN website (Home / Join the RIN / Membership Types http://www.rin.org.uk/general.aspx?ID=59) and from the Membership Secretary (membership@rin.org.uk Tel: +44(0)20 7591 3130 Fax: 44(0)20 7591 3131).

(1) Ordinary Membership
(2) Associate Membership
(3) Associate Fellow Membership
(4) Student Membership
(5) Junior Associate Membership
(6) Corporate Membership
(7) Small Business Membership
(8) Affiliate College University Membership
(9) Affiliate Club Membership

Additional membership classes of Fellowship, Honorary Fellowship, Retired Membership and Affiliate Membership also exist and details are available from the Membership Secretary.

The subscription price (excluding VAT) to The *Journal* (ISSN 0373–4633) for Volume 75, 2022, which includes print and electronic access, is £759 (USA, Canada and Mexico US $1368) and includes delivery by air; single parts are available at £140 (USA, Canada and Mexico US $252) plus postage. The electronic-only price available to institutional subscribers is £570 (USA, Canada and Mexico US $1041). EU subscribers (outside the UK) who are not registered for VAT should add VAT at their country's rate. VAT registered subscribers should provide their VAT registration number. The *Journal* is issued free to all Members of the Institute. Orders, which must be accompanied by payment, may be sent to any bookseller or subscription agent or direct to the publishers: Cambridge University Press, UPH, Shaftesbury Road, Cambridge CB2 8BS, or in the USA, Canada and Mexico to Cambridge University Press, Journals Fulfillment Department, 1 Liberty Plaza, Floor 20, New York, NY 10006, USA. Japanese prices for institutions are available from Kinokuniya Company Ltd, P.O. Box 55, Chitose, Tokyo 156, Japan.

THE JOURNAL OF NAVIGATION

VOLUME 75 • NUMBER 3 • MAY 2022

CONTENTS

Logical grouping of data and control functions on the displays of shipboard navigation systems 507
Viet Dung Vu, Margareta Lutzhoft and Marius Imset

Proficiency of allocentric and egocentric wayfinding: a comparison of schoolchildren with young adults and older adults 528
Klara Rinne, Daniel Memmert and Otmar Bock

A novel partial ambiguity method for multi-GNSS real-time kinematic positioning 540
Haiyang Li, Guigen Nie, Jing Wang, Shuguang Wu and Yuefan He

H_i/H_∞-optimised fault detection for a surface vessel integrated navigation system 554
Muzhuang Guo, Chen Guo and Chuang Zhang

A method to identify and rank objects and hazardous interactions affecting autonomous ships navigation 572
Victor Bolbot, Gerasimos Theotokatos and Lars Andreas Wennersberg

Graph-optimisation-based self-calibration method for IMU/odometer using preintegration theory 594
Shiyu Bai, Jizhou Lai, Pin Lyu, Yiting Cen, Bingqing Wang and Xin Sun

Numerical Adaptations of Captain Sumner's 1837 journey: a context for teaching celestial navigation 614
Tom Bensky

Multi-DMEs for alternative position, navigation and timing (A-PNT) 625
Xiao Liang, Carl Milner, Christophe Macabiau and Philippe Estival

A review of flight trajectory optimisations 646
Octavian Thor Pleter and Cristian Emil Constantinescu

A spacecraft attitude manoeuvre planning algorithm based on improved policy gradient reinforcement learning 662
Bing Hua, Shenggang Sun, Yunhua Wu and Zhiming Chen

Energy optimised D* AUV path planning with obstacle avoidance and ocean current environment 685
Bing Sun, Wei Zhang, Shiqi Li and Xixi Zhu

SIMU/Triple star sensors integrated navigation method of HALE UAV based on atmospheric refraction correction 704
Ziqian Gao, Haiyong Wang, Weihong Wang and Yuan Xu

Effect of perception difference between first- and third-person perspectives on local and global situation recognition in ship handling 727
Yuki Kato and Tomoya Horiguchi

A novel speed optimisation scheme for unmanned sailboats by sliding mode extremum seeking control without steady-state oscillation 745
Zhipeng Shen, Xuechun Fan, Haomiao Yu, Chen Guo and Saisai Wang
