Advanced Robotics

Vol. 21 No. 3
Articles
Recent advances in simultaneous localization and map-building using computer vision
Z. Chen, J. Samarabandu and R. Rodrigo
Reactive robot system using a haptic interface: an active interaction to transfer skills from the robot to unskilled persons
J. Solis, S. Marcheschi, A. Frisoli, C. A. Avizzano and M. Bergamasco
Posture control of robot manipulators with fuzzy voice commands using a fuzzy coach-player system
C. Jayawardena, K. Watanabe and K. Izumi
Development of a single-master multi-slave tele-micromanipulation system
G. Hwang, P. T. Szemes, N. Ando and H. Hashimoto
A practical and useful autonomous towed vehicle for port area inspection
J.-K. Choi, T. Shiraishi, T. Tanaka and H. Sakai
Improved design methodology for an existing automated transportation system with automated guided vehicles in a seaport container terminal
S. Hoshino, J. Ota, A. Shinozaki and H. Hashimoto
Wheeled mobile robot navigation using proportional navigation
F. Belkhouche and B. Belkhouche
Development of a novel crawler mechanism with polymorphic locomotion
G. Lan, S. Ma, K. Inoue and Y. Hamamatsu
Omnidirectional vision-based ego-pose estimation for an autonomous in-pipe mobile robot
J. Kim, M. Muramatsu, Y. Murata and Y. Suga
Experimental realization of dynamic walking for a human-riding biped robot, HUBO FX-1
J.-Y. Kim, J. Lee and J.-H. Oh
Robust force control strategy based on the virtual environment concept
P. Fraisse, P. Dauchez and F. Pierrot
Mechanical design and motion control of a biomimetic robotic dolphin
J. Yu, Y. Hu, R. Fan, L. Wang and J. Huo
Vol. 21 No. 5
Articles
Practical design of robots operating in radiation environments
T. Oomichi, Y. Isozaki and M. Kojima
Motion planning of manipulators regarding structural safety as a prior condition
D. Isobe and A. Komatsu
Autonomous navigation and obstacle avoidance using navigation laws with time-varying deviation functions
F. Belkhouche, B. Belkhouche and P. Rastgoufard
Management of parallel-manipulator singularities using joint-coupling
Theingi, I-Ming Chen, J. Angeles and C. Li
Acquisition of multi-modal expression of slip through pick-up experiences
Y. Tada and K. Hosoda
Gaussian mixture-sound field landmark model for robot localization applications
L.-W. Wu, W.-H. Liu, C.-C. Cheng and J.-S. Hu
Path-following control of a mobile robot in the presence of actuator constraints
N. Wada, S. Tagami and M. Saeki
Heterogeneous multisensor fusion for mapping dynamic environments
G. Huang, A. B. Rad, Y.-K. Wong and Y.-L. Ip
Compact laparoscopic assistant robot using a bending mechanism
S.-Y. Ko, J. Kim, W.-J. Lee and D.-S. Kwon
Unified nonsingular tracking and stabilization controller design for unicycle-type wheeled mobile robots
X. Zhu, G. Dong and D. Hu
Vol. 21 No. 7
Articles
Multiple mobile robot surveillance in unknown environments
T. Chomchana, J. Ota and T. Arai
Fast model-image registration using a two-dimensional distance map for surgical navigation system
Y. Iwashita, R. Kurazume, K. Konishi, M. Nakamoto, N. Aburaya, Y. Sato, M. Hashizume and T. Hasegawa
View planning for exploration via maximal C-space entropy reduction for robot mounted range sensors
P. Wang and K. Gupta
Kinematic modeling and singularity of wheeled mobile robots
L. Gracia and J. Tornero
Pilot control of an auto-balancing two-wheeled cart
M.-C. Tsai and J.-S. Hu
A general approach for sensibility analysis in visual servoing
M. Courdesses and V. Cadenat
Vol. 21 No. 8
Articles
A novel paradigm for patient-cooperative control of upper-limb rehabilitation robots
M. Mihelj, T. Nef and R. Riener
Closed-form inverse kinematic solution for fluoroscopic C-arms
L. Matthäus, N. Binder, C. Bodensteiner and A. Schweikard
The development of a fault-tolerant control approach and its implementation on a flexible arm robot
C. P. Tan and M. K. Habib
Vision-based hybrid control scheme for autonomous parking of a mobile robot
D. Amarasinghe, G. K. I. Mann and R. G. Gosine
Local rolling and tilting capability analysis of fully parallel linear actuated platform-type manipulators
L.-C. T. Wang and K.-T. Oen
Vol. 21 No. 9
Articles
Real-time area-based haptic rendering and the augmented tactile display device for a palpation simulator
S.-Y. Kim, K.-U. Kyung, J. Park and D.-S. Kwon
Acquisition of joint attention through natural interaction utilizing motion cues
H. Sumioka, K. Hosoda, Y. Yoshikawa and M. Asada
Synchronization control for physics-based collaborative virtual environments with shared haptics
J. Cheong, S.-I. Niculescu, A. M. Annaswamy and M. A. Srinivasan
An evolutionary algorithm for simultaneous localization and mapping (SLAM) of mobile robots
M. Begum, G. K. I. Mann and R. G. Gosine

https://doi.org/10.1017/S0269888909000174 Published online by Cambridge University Press

Comparison of various balance systems for energy conservation in a vertically articulated manipulator with three joints
T. Izumi, J. Amano and Y. Zhu
Synthesis of the forward kinematics problem algebraic modeling for the general parallel manipulator: displacement-based equations
L. Rolland
Vol. 21 No. 10
Preface
Articles
CB: a humanoid research platform for exploring neuroscience
G. Cheng, S.-H. Hyon, J. Morimoto, A. Ude, J. G. Hale, G. Colvin, W. Scroggin and S. C. Jacobsen
Integrating robotics and neuroscience: brains for robots, bodies for brains
M. Rucci, D. Bullock and F. Santini
A mechatronic platform for early diagnosis of neuro-developmental disorders
D. Campolo, C. Laschi, F. Keller and E. Guglielmelli
iCub: the design and realization of an open humanoid platform for cognitive and neuroscience research
N. G. Tsagarakis, G. Metta, G. Sandini, D. Vernon, R. Beira, F. Becchi, L. Righetti, J. Santos-Victor, A. J. Ijspeert, M. C. Carrozza and D. G. Caldwell
Incremental acquisition of behaviors and signs based on a reinforcement learning schemata model and a spike timing-dependent plasticity network
T. Taniguchi and T. Sawaragi
Parkinson's disease: a motor control study using a wrist robot
S. Levy-Tzedek, H. I. Krebs, J. L. Shils, D. Apetauerova and J. E. Arle
Reinforcement learning of a continuous motor sequence with hidden states
H. Arie, T. Ogata, J. Tani and S. Sugano
Vol. 21 No. 11
Articles
Robust motion/force control of nonholonomic mobile manipulators using hybrid joints
Z. Li, C. Yang, J. Luo, Z. Wang and A. Ming
Kinematic modeling of wheeled mobile robots with slip
L. Gracia and J. Tornero
Multi-hypothesis localization with a rough map using multiple visual features for outdoor navigation
J. Yun and J. Miura
Mechanical design of the humanoid robot platform, HUBO
I.-W. Park, J.-Y. Kim, J. Lee and J.-H. Oh
Rendering stiffer walls: a hybrid haptic system using continuous and discrete time feedback
H. Vasudevan, M. B. Srikanth and M. Muniyandi
Vol. 21 No. 12
Articles
Emergent transportation networks by considering interactions between agents and their environment
D. Kurabayashi, K. Urano and T. Funato
Experience-based imitation using RNNPB
R. Yokoya, T. Ogata, J. Tani, K. Komatani and H. G. Okuno
An omni-directional mobile millimeter-sized microrobot with 3-mm electromagnetic micromotors for a micro-factory
J. Li, Z. Li and J. Chen
A geometric constraint-based approach to force and motion coupling between real and virtual mechanisms
N. Zafer and G. R. Luecke
Feeling a rigid virtual world through an impulsive haptic display
E. B. Vander Poorten and Y. Yokokohji
Intention-based walking support for paraplegia patients with Robot Suit HAL
K. Suzuki, G. Mito, H. Kawamoto, Y. Hasegawa and Y. Sankai
Vol. 21 No. 14
Articles
Force and acceleration sensor fusion for compliant manipulation control in 6 degrees of freedom
T. Kröger, D. Kubus and F. M. Wahl
Planning and executing navigation among movable obstacles
M. Stilman, K. Nishiwaki, S. Kagami and J. J. Kuffner
Collision dynamics of a visual target marker for small-body exploration
T. Kubota, S. Sawai, T. Hashimoto and J. Kawaguchi
Effect of layer compliance on frictional behavior of soft robotic fingers
P. Tiezzi, I. Kao and G. Vassura
A 10-gram vision-based flying robot
J.-C. Zufferey, A. Klaptocz, A. Beyeler, J.-D. Nicoud and D. Floreano
Vol. 21 No. 15
Preface
T. Inamura
Articles
Action recognition and understanding through motor primitives
I. S. Vicente, V. Kyrki, D. Kragic and M. Larsson
Human–machine interaction as a model of machine–machine interaction: how to make machines interact as humans do
K. Prepin and A. Revel
Motion capture-based wearable interaction system and its application to a humanoid robot, AMIO
Y.-H. Seo, I.-W. Jeong and H. S. Yang
Copycat hand—robot hand imitating human motions at high speed and with high accuracy
K. Hoshino, E. Tamaki and T. Tanimoto
Robotics-assisted demining with Gryphon
M. Freese, T. Matsuzawa, Y. Oishi, P. Debenest, K. Takita, E. F. Fukushima and S. Hirose
Development of a robotic fish using electrostatic film motors: the Seidengyo II robot
Z. G. Zhang, N. Yamashita, A. Yamamoto and T. Higuchi

AI Magazine

Vol. 28 No. 2
Articles
The 22nd AAAI Conference: continuing the content-rich tradition in beautiful Vancouver, British Columbia, Canada
S. R. Hedberg
Seven aspects of mixed-initiative reasoning: an introduction to this special issue on mixed-initiative assistants
G. Tecuci, M. Boicu and M. T. Cox
Reflections on challenges and promises of mixed-initiative interaction
E. Horvitz
Mixed-initiative systems for collaborative problem solving
G. Ferguson and J. Allen
DiamondHelp: a generic collaborative task guidance system
C. Rich and C. L. Sidner
An intelligent personal assistant for task and time management
K. Myers, P. Berry, J. Blythe, K. Conley, M. Gervasio, D. McGuinness, D. Morley, A. Pfeffer, M. Pollack and M. Tambe
Mixed-initiative goal manipulation
M. T. Cox and C. Zhang
Mixed-initiative planning in space mission operations
J. L. Bresina and P. H. Morris
Appliance call-center: a successful mixed-initiative case study
W. Cheetham and K. Goebel

https://doi.org/10.1017/S0269888909000174 Published online by Cambridge University Press

The AAAI 2006 mobile robot competition and exhibition
P. E. Rybski, J. Forbes, D. Burhans, Z. Dodds, P. Oh, M. Scheutz and B. Avanzato
RoboCup: 10 years of achievements and future challenges
U. Visser and H.-D. Burkhard
Dialogue on dialogues—multidisciplinary evaluation of advanced speech-based interactive systems: a report on the interspeech 2006 satellite event
K. Jokinen, M. McTear and J. A. Larson
A report on the IJCAI-07 program
M. M. Veloso

Vol. 28 No. 3
Articles
Introduction to the special issue on innovative applications of artificial intelligence
B. Porter and W. Cheetham
Constraint-based random stimuli generation for hardware verification
Y. Naveh, M. Rimon, I. Jaeger, Y. Katz, M. Vinov, E. Marcus and G. Shurek
Machine translation for manufacturing: a case study at Ford Motor Company
N. Rychtyckyj
Expressive commerce and its application to sourcing: how we conducted $35 billion of generalized combinatorial auctions
T. Sandholm
Heuristic search and information visualization methods for school redistricting
M. desJardins, B. Bulka, R. Carr, E. Jordan and P. Rheingans
AWDRAT: a cognitive middleware system for information survivability
H. Shrobe, R. Laddaga, B. Balzer, N. Goldman, D. Wile, M. Tallis, T. Hollebeek and A. Egyed
The second international conference on human–robot interaction
A. C. Schultz, C. Breazeal, T. Fong and S. Kiesler
AAAI 2007 Spring Symposium Series Reports
T. Barkowsky, P. Bruza, Z. Dodds, O. Etzioni, G. Ferguson, P. Gmytrasiewicz, B. Hommel, B. Kuipers, R. Miller, L. Morgenstern, S. Parsons, H. Schultheis, A. Tapus and N. Yorke-Smith

Vol. 28 No. 4
AAAI News
C. Hamilton
Articles
Machine ethics: creating an ethical intelligent agent
M. Anderson and S. L. Anderson
Autonomy in space: current capabilities and future challenges
A. Jónsson, R. A. Morris and L. Pedersen
Current trends in automated planning
D. S. Nau
Representing and reasoning with preferences
T. Walsh
Meaning and links

The AAAI-07 Conference: focal point for AI research worldwide
S. R. Hedberg
AAAI-07 Workshop Reports
S. Anand, D. Bahls, C. Burghart, M. Burstein, H. Chen, J. Collins, T. Dietterich, J. Doyle, C. Drummond, W. Elazmeh, C. Geib, J. Goldsmith, H. Guesgen, J. Hendler, D. Jannach, N. Japkowicz, U. Junker, G. Kaminka, A. Kobsa, J. Lang, D. Leake, L. Lewis, G. Ligozat, S. Macskassy, D. McDermott, T. Metzler, B. Mobasher, U. Nambiar, Z. Nie, K. Orsvarn, B. O'Sullivan, D. Pynadath, J. Renz, R. Rodriguez, T. Roth-Berghofer, S. Schulz, R. Studer, Y. Wang and M. Wellman
Report on the Third Artificial Intelligence and Interactive Digital Entertainment (AIIDE-07) Conference
J. Schaeffer
The Artificial Intelligence and Interactive Digital Entertainment (AIIDE 2007) workshop on optimizing player satisfaction
G. N. Yannakakis and J. Hallam
The fourth international conference on informatics in control, automation, and robotics (ICINCO 2007)
J. Filipe
Report on the SAT 2007 Conference on theory and applications of satisfiability testing
J. Marques-Silva, K. Sakallah and I. Lynce
Report on the seventh international conference on case-based reasoning
R. Weber

Annals of Mathematics and Artificial Intelligence

Vol. 50 Nos. 3–4
Logics in AI: Post-Proceedings of JELIA06
Logics in AI: post-proceedings JELIA06 (Editorial)
M. Fisher and W. van der Hoek
Decision procedures for extensions of the theory of arrays
S. Ghilardi, E. Nicolini, S. Ranise and D. Zucchelli
An approach to automatic deductive synthesis of functional programs
Y. Korukhova
Comparing action descriptions based on semantic preferences
T. Eiter, E. Erdem, M. Fink and J. Senko
Partial equilibrium logic
P. Cabalar, S. P. Odintsov, D. Pearce and A. Valverde
External sources of knowledge and value invention in logic programming
F. Calimeri, S. Cozza and G. Ianni
An introduction to fuzzy answer set programming
D. Van Nieuwenborgh, M. De Cock and D. Vermeir
Distance semantics for database repair
O. Arieli, M. Denecker and M. Bruynooghe
A new approach to hybrid probabilistic logic programs
E. Saad and E. Pontelli

Vol. 51 No. 1
Articles
A new modal logic for reasoning about space: spatial propositional neighborhood logic
A. Morales, I. Navarrete and G. Sciavicco
On variable-weighted exact satisfiability problems
S. Porschen
On a decision procedure for quantified linear programs
K. Subramani

Vol. 51 Nos. 2–4
Preface
V. S. Subrahmanian
Articles
Model checking multi-agent systems with logic based Petri nets
T. M. Behrens and J. Dix
Complexity results for answer set programming with bounded predicate arities and implications
T. Eiter, W. Faber, M. Fink and S. Woltran
A three-valued semantics for querying and repairing inconsistent databases
F. Furfaro, S. Greco and C. Molinaro
Enhancing DLV instantiator by backjumping techniques
S. Perri, F. Scarcello, G. Catalano and N. Leone

https://doi.org/10.1017/S0269888909000174 Published online by Cambridge University Press

On look-ahead heuristics in disjunctive logic programming
W. Faber, N. Leone, G. Pfeifer and F. Ricca
Reasoning about non-immediate triggers in biological networks
N. Tran and C. Baral
Computing most probable worlds of action probabilistic logic programs: scalable estimation for 1,030,000 worlds
S. Khuller, M. V. Martinez, D. S. Nau, A. Sliva, G. I. Simari and V. S. Subrahmanian

Applied Artificial Intelligence

Vol. 20 No. 10
Articles
Self-organizing contextualized mobile workforce management with collaborative art learning
S.-T. Yuan and M. Wu
Emotional and non-emotional persuasion
M. Miceli, F. de Rosis and I. Poggi
An enhanced ant colony optimization metaheuristic for the minimum dominating set problem
C. K. Ho, Y. P. Singh and H. T. Ewe
Vol. 21 No. 1
Articles
Railway passenger traffic volume prediction based on neural network
W. Zhuo, J. Li-Min, Q. Yong and W. Yan-hui
Improving gesture recognition in the Arabic sign language using texture analysis
O. M. Al-Jarrah and F. A. Al-Omari
Analysis of melody roots in Hungarian folk music using self-organizing maps with adaptively weighted dynamic time warping
Z. Juhász
Vol. 21 No. 2
Articles
On data structures for association rule discovery
X. Yan, S. Zhang and C. Zhang
An AI electrical ground support equipment for controlling and testing a space instrument
M. D. Rodríguez-Moreno, M. Prieto and D. Meziat
A taxonomy of strategies for multimodal persuasive message generation
M. Guerini, O. Stock and M. Zancanaro
A multi-agent system for university course timetabling
D. Strnad and N. Guid
Vol. 21 No. 3
Articles
A biologically inspired method for conceptual imitation using reinforcement learning
H. Mobahi, M. N. Ahmadabadi and B. N. Araabi
Comparison of two types of event Bayesian networks: a case study
S. F. Galán, G. Arroyo-Figueroa, F. J. Díez and L. E. Sucar
Combining multiple classifiers using Dempster's rule for text categorization
Y. Bi, D. A. Bell, H. Wang, G. Guo and J. Guan
Neuro-fuzzy controller implementation for an adaptive cathodic protection on Iraq–Turkey crude oil pipeline
M. A. Akcayol and S. Sagiroglu
Vol. 21 Nos. 4–5
Articles
State of applications in AI researches from AI*IA 2005
S. Bandini and S. Manzoni
AI turns fifty: revisiting its origins
R. Cordeschi
Building a wide coverage dynamic grammar
A. Mazzei and V. Lombardo
Incremental extraction of association rules in applicative domains
A. Gallo, R. Esposito, R. Meo and M. Botta
Relational data mining and ILP for document image understanding
M. Ceci, M. Berardi and D. Malerba
Imitation learning and anchoring through conceptual spaces
A. Chella, H. Dindo and I. Infantino
An ACL for specifying fault-tolerant protocols
N. Dragoni, M. Gaspari and D. Guidi
Using a theorem prover for reasoning on constraint problems
M. Cadoli and T. Mancini
Common-sense spatial reasoning for information correlation in pervasive computing
S. Bandini, A. Mosca and M. Palmonari
Substitutional adaptation in case-based reasoning: a general framework applied to P-truck curing
S. Manzoni, F. Sartori and G. Vizzari
Infrastructure for RBAC-MAS: an approach based on agent coordination contexts
M. Viroli, A. Omicini and A. Ricci
Managing responsive environments with software agents
F. S. C. da Silva and W. W. Vasconcelos
Vol. 21 No. 6
Articles
STRATUM: a methodology for designing heuristic agent negotiation strategies
I. Rahwan, L. Sonenberg, N. R. Jennings and P. McBurney
EC-XAMAS: supporting e-commerce activities by an XML-based adaptive multi-agent system
P. De Meo, D. Rosaci, G. M. L. Sarnè, D. Ursino and G. Terracina
A unified approach to grapheme-to-phoneme conversion for the plattos slovenian text-to-speech system
M. Rojc and Z. Kacic
Vol. 21 No. 7
Articles
EDA: an evolutionary decoding algorithm for statistical machine translation
E. Otto and M. C. R. Rojas
A keyhole plan recognition model for Alzheimer's patients: first results
B. Bouchard, S. Giroux and A. Bouzouane
Uncertain spatio-temporal reasoning for distributed transportation scheduling problem
M. Bouzid
Evolving neural-symbolic systems guided by adaptive training schemes: applications in finance
A. Tsakonas and G. Dounias
Vol. 21 No. 8
Articles
Artificial intelligence solution to electricity price forecasting problem
P. S. Georgilakis
A non-parametric approach to simplicity clustering
P. Hines, E. M. Pothos and N. Chater
A computational model of an intelligent narrator for interactive narratives
N. Szilas
Knowledge-based validation for hydrological information systems
R. Conejo, E. Guzmán and J.-L. Pérez-de-la-Cruz
Vol. 21 No. 9
Articles
Segmentation of multiple human objects in video sequences
H.-T. Yang, C.-S. Ouyang, L.-M. Huang and S.-J. Lee
Learning drifting negotiations
F. Enembreck, B. C. Ávila, E. E. Scalabrin and J.-P. A. Barthès
Independent component analysis of EEG recorded during two-person game playing
A. Flexer and S. Makeig

https://doi.org/10.1017/S0269888909000174 Published online by Cambridge University Press

Vol. 21 No. 10
Articles
Cooperative query rewriting for decision making support and recommender systems
N. Mirzadeh and F. Ricci
Towards optimizing entertainment in computer games
G. N. Yannakakis and J. Hallam:
Simulation and analysis of controlled multi-representational reasoning processes
T. Bosse, C. M. Jonker and J. Treur

Applied Intelligence

Vol. 26 No. 2
Special Issue on Innovations in Applied Artificial Intelligence
Introduction to the special issue
F. Esposito, D. Malerba and G. Semeraro
Real-time people localization and tracking through fixed stereo vision
S. Bahadori, L. Iocchi, G. R. Leone, D. Nardi and L. Scozzafava
Movement prediction from real-world images using a liquid state machine
H. Burgsteiner, M. Kröll, A. Leopold and G. Steinbauer
MyMap: generating personalized tourist descriptions
B. De Carolis, G. Cozzolongo, S. Pizzutilo and V. Silvestri
A decision support tool coupling a causal model and a multi-objective genetic algorithm
I. Blecic, A. Cecchini and G. A. Trunfio
An algorithm based on counterfactuals for concept learning in the semantic Web
L. Iannone, I. Palmisano and N. Fanizzi
Test minimization for human–computer interaction
F. Belli and C. J. Budnik
Vol. 26 No. 3
Articles
Particle swarm optimization and hill climbing for the bandwidth minimization problem
A. Lim, J. Lin and F. Xiao
Genetic operators for combinatorial optimization in TSP and microarray gene ordering
S. S. Ray, S. Bandyopadhyay and S. K. Pal
Evolutionary algorithms for route selection and rate allocation in multirate multicast networks
S. J. Kim and M. K. Choi
Development of decoupling scheme for high order MIMO process based on PSO technique
A. M. El-Garhy and M. E. El-Shimy
IMSP: an information theoretic approach for multi-dimensional sequential pattern mining
C.-H. Lee
Cancer classification using ensemble of neural networks with multiple significant gene subsets
S.-B. Cho and H.-H. Won
SR-30 turbojet engine real-time sensor health monitoring using neural networks, and Bayesian belief networks
C. Nott, S. M. Ölçmen, C. L. Karr and L. C. Trevino
Vol. 27 No. 1
Articles
Agent-oriented modeling of the dynamics of biological organisms
C. M. Jonker and J. Treur
A novel fuzzy compensation multi-class support vector machine
Y. Zhang, Z. Chi, X.-d. Liu and X.-h. Wang
A boosting approach for corporate failure prediction
E. A. Cortés, M. G. Martínez and N. G. Rubio
An intelligent method to block e-mail bombs
F. M. Chang
A framework for formal modeling and analysis of organizations
C. M. Jonker, A. Sharpanskykh, J. Treur and P. Yolum
Hiding collaborative recommendation association rules
S.-L. Wang, D. Patel, A. Jafari and T.-P. Hong
Semi-parametric optimization for missing data imputation
Y. Qin, S. Zhang, X. Zhu, J. Zhang and C. Zhang
Dynamic vehicle routing using genetic algorithms
F. Hanshar and B. M. Ombuki-Berman
Vol. 27 No. 2
Articles
A comparative study of stochastic optimization methods in electric motor design
T. Tusar, P. Korosec, G. Papa, B. Filipic and J. Silc
RTTES: real-time search in dynamic environments
C. Undeger and F. Polat
Specification, analysis and simulation of the dynamics within an organisation
C. M. Jonker, J. Treur and W. C. A. Wijngaards
Prediction of MHC II-binding peptides using rough set-based rule sets ensemble
A. Zeng, D. Pan and J.-b. He
The Hopfield-tank neural network applied to the mobile agent planning problem
C.-H. Lin and J.-F. Wang
Vol. 27 No. 3
Articles
Computational intelligence in medicine and biology
G. D. Magoulas and G. Dounias
A genetically optimized level set approach to segmentation of thyroid ultrasound images
D. K. Iakovidis, M. A. Savelonas, S. A. Karkanis and D. E. Maroulis
Clinical data analysis based on iterative subgroup discovery: experiments in brain ischaemia data analysis
D. Gamberger, N. Lavrac, A. Krstacic and G. Krstacic
An adaptive evolutionary algorithm with intelligent mutation local searchers for designing multidrug therapies for HIV
F. Neri, J. Toivanen and R. A. E. Mäkinen
A novel fuzzy clustering algorithm for the analysis of axillary lymph node tissue sections
X.-Y. Wang, J. M. Garibaldi, B. Bird and M. W. George
A layered approach to learning coordination knowledge in multiagent environments
G. Erus and F. Polat
A neural network approach to audio data hiding based on perceptual masking model of the human auditory system
H. Lari-Najafi
Composite of adaptive support vector regression and nonlinear conditional heteroscedasticity tuned by quantum minimization for forecasts
B. R. Chang and H. F. Tsai
A specification language for organisational performance indicators
V. Popova and J. Treur

Artificial Intelligence

Vol. 171, Nos. 10–15
Argumentation in Artificial Intelligence
Argumentation in artificial intelligence
T. J. M. Bench-Capon and P. E. Dunne
Computing ideal sceptical argumentation
P. M. Dung, P. Mancarella and F. Toni

https://doi.org/10.1017/S0269888909000174 Published online by Cambridge University Press

On principle-based evaluation of extension-based argumentation semantics
P. Baroni and M. Giacomin
Computational properties of argument systems satisfying graph-theoretic constraints
P. E. Dunne
On the merging of Dung's argumentation systems
S. Coste-Marquis, C. Devred, S. Konieczny, M.-C. Lagasquie-Schiex and P. Marquis
An application of formal argumentation: fusing Bayesian networks in multi-agent systems
S. H. Nielsen and S. Parsons
An executable specification of a formal argumentation protocol
A. Artikis, M. J. Sergot and J. Pitt
Negotiating using rewards
S. D. Ramchurn, C. Sierra, L. Godo and N. R. Jennings
Subjective logic and arguing with evidence
N. Oren, T. J. Norman and A. D. Preece
Practical reasoning as presumptive argumentation using action based alternating transition systems
K. Atkinson and T. J. M. Bench-Capon
The Carneades model of argument and burden of proof
T. F. Gordon, H. Prakken and D. Walton
Laying the foundations for a World Wide Argument Web
I. Rahwan, F. Zablith and C. Reed
Argument based machine learning
M. Mozina, J. Zabkar and I. Bratko

Vol. 171 Nos. 16–17
Articles
Introducing possibilistic logic in ILP for dealing with exceptions
M. Serrurier and H. Prade
Metatheory of actions: beyond consistency
A. Herzig and I. J. Varzinczak
Exploiting functional dependencies in declarative problem specifications
T. Mancini and M. Cadoli
Bounded model checking for knowledge and real time
A. Lomuscio, W. Penczek and B. Wozna
Mining competent case bases for case-based reasoning
R. Pan, Q. Yang and S. J. Pan
PickPocket: a computer billiards shark
M. Smith

Vol. 171 No. 18
Special Review Issue
Editorial note
D. Perlis and M.-A. Williams
Symposium on Margaret Boden, mind as machine: a history of cognitive science, Oxford (2006) two volumes
N. Chomsky
Theory and experiment in cognitive science
P. Thagard
Her story of cognitive science

Spartacus attending the 2005 AAAI conference
F. Michaud, C. Côté, D. Létourneau, Y. Brosseau, J. M. Valin, E. Beaudry, C. Raïevsky, A. Ponchon, P. Moisan, P. Lepage, Y. Morin, F. Gagnon, P. Giguère, M. A. Roux, S. Caron, P. Frenette and F. Kabanza
Socially distributed perception: GRACE plays social tag at AAAI 2005
M. P. Michalowski, S. Sabanovic, C. F. DiSalvo, D. Busquets, L. M. Hiatt, N. A. Melchior and R. G. Simmons
Using a hand-drawn sketch to control a team of robots
M. Skubic, D. Anderson, S. Blisard, D. Perzanowski and A. C. Schultz
First steps toward natural human-like HRI
M. Scheutz, P. W. Schermerhorn, J. F. Kramer and D. Anderson
Dual-coding representations for robot vision programming in Tekkotsu
D. S. Touretzky, N. S. Halelamien, E. J. Tira-Thompson, J. J. Wales and K. Usui
Vol. 23 No. 1
Editorial
G. A. Bekey
Articles
Independent traction control for uneven terrain using stick-slip phenomenon: application to a stair climbing robot
H. D. Choi, C. K. Woo, S. H. Kim, Y. K. Kwak and S. Yoon
An integrated particle filter and potential field method applied to cooperative multi-robot target tracking
R. Mottaghi and R. T. Vaughan
Adaptive behavior in turning of an oscillator-driven biped robot
S. Aoi and K. Tsuchiya
Linear estimation of the physical odometric parameters for differential-drive mobile robots
G. Antonelli and S. Chiaverini
Mobile robot team forming for crystallization of proteins
Y. F. Zheng and W. Chen
Socially distributed perception: GRACE plays social tag at AAAI 2005. 79
M. P. Michalowski, S. Sabanovic, C. F. DiSalvo, D. Busquets, L. M. Hiatt, N. A. Melchior and R. G. Simmons
Vol. 23 No. 2
Editorial
G. S. Sukhatme
Articles
Hybrid image plane/stereo (HIPS) manipulation for robotic space applications
M. L. Robinson, E. T. Baumgartner, K. Nickels and T. E. Litwin
A comparison of line extraction algorithms using 2D range data for indoor mobile robotics
V. Nguyen, S. Gächter, A. Martinelli, N. Tomatis and R. Siegwart
Guiding robots' behaviors using pheromone communication
A. H. Purnamadjaja and R. A. Russell
Analysis results and tools for the control of planar bipedal gaits using hybrid zero dynamics
E. R. Westervelt, B. Morris and K. D. Farrell
Numerical comparison of steering geometries for robotic vehicles by modeling positioning error
J. Gutiérrez, D. Apostolopoulos and J. L. Gordillo
Vol. 23 No. 3
Articles
Structure-based color learning on a mobile robot under changing illumination
M. Sridharan and P. Stone
Metric embedding of view-graphs
W. Hübner and H. A. Mallot
Vision-based motion planning for an autonomous motorcycle on ill-structured roads
D. Song, H. N. Lee, J. Yi and A. Levandowski
Analysis of wave gaits for energy efficiency
M. S. Erden and K. Leblebicioglu
Visual homing in environments with anisotropic landmark distribution
R. Möller, A. Vardy, S. Kreft and S. Ruwisch
Vol. 23 No. 4
Articles
Improving walking-robot performances by optimizing leg distribution
P. G. de Santos, E. Garcia and J. Estremera
Behaviors for physical cooperation between robots for mobility improvement
A. Deshpande and J. E. Luntz
Environment adaptation of a new staircase-climbing wheelchair
R. Morales, A. González, V. B. Feliu and P. Pintado
Map building through pseudo-dense scan matching using visual sonar data
Y.-H. Choi and S.-Y. Oh
Guidance of a mobile robot using an array of static cameras located in the environment
I. Fernández, M. Mazo, J. L. Lázaro, D. Pizarro, E. Santiso, P. Martín and C. Losada

Data Mining and Knowledge Discovery

Vol. 14 No. 1
Articles
An efficient approach to external cluster assessment with an application to martian topography
R. Vilalta, T. F. Stepinski and M.-K. Achari
The complexity of non-hierarchical clustering with instance and cluster level constraints
I. Davidson and S. S. Ravi
Locally adaptive metrics for clustering high dimensional data
C. Domeniconi, D. Gunopulos, S. Ma, B. Yan, M. Al-Razgan and D. Papadopoulos
Compression-based data mining of sequential data
E. J. Keogh, S. Lonardi, C. A. Ratanamahatana, L. Wei, S.-H. Lee and J. Handley
Privacy-preserving boosting
S. Gambs, B. Kégl and E. Aïmeur
Non-derivable itemset mining
T. Calders and B. Goethals
Vol.14 No. 2
Articles
Two topographic maps for data visualisation
C. Fyfe
Evaluation of ordinal attributes at value level
M. Robnik-Sikonja and K. Vanhoof
Genetic process mining: an experimental evaluation
A. K. A. de Medeiros, A. J. M. M. Weijters and W. M. P. van der Aalst
Vol. 14 No. 3
Articles
Duplicate detection in adverse drug reaction surveillance
G. N. Norén, R. Orre, A. Bate and I. R. Edwards
Differential prioritization in feature selection and classifier aggregation for multiclass microarray datasets
C. H. Ooi, M. Chetty and S. W. Teng
A fast and effective method to find correlations among attributes in databases
E. P. M. de Sousa, C. Traina Jr., A. J. M. Traina, L. Wu and C. Faloutsos

https://doi.org/10.1017/S0269888909000174 Published online by Cambridge University Press

Using metarules to organize and group discovered association rules
A. Berrado and G. C. Runger
Vol. 15 No. 1
10th Anniversary Issue
Editorial
G. I. Webb
Articles
On data mining, compression, and Kolmogorov complexity
C. Faloutsos and V. Megalooikonomou
Toward knowledge-rich data mining
P. Domingos
Exploratory mining in cube space
R. Ramakrishnan and B.-C. Chen
Frequent pattern mining: current status and future directions
J. Han, H. Cheng, D. Xin and X. Yan
Future trends in data mining
H.-P. Kriegel, K. M. Borgwardt, P. Kröger, A. Pryakhin, M. Schubert and A. Zimek
Data mining and knowledge discovery 1996 to 2005: overcoming the hype and moving from "university" to "business" and "analytics"
G. Piatetsky-Shapiro
Vol. 15 No. 2
Articles
Experiencing SAX: a novel symbolic representation of time series
J. Lin, E. J. Keogh, L. Wei and S. Lonardi
Mining process models with non-free-choice constructs
L. Wen, W. M. P. van der Aalst, J. Wang and J. Sun
Efficient mining of understandable patterns from multivariate interval time series
F. Mörchen and A. Ultsch
Data mining with temporal abstractions: learning rules from time series
L. Sacchi, C. Larizza, C. Combi and R. Bellazzi
Relational peculiarity-oriented mining
M. Ohshima, N. Zhong, Y. Yao and C. Liu
Detecting inconsistency in biological molecular databases using ontologies
Q. Chen, Y.-P. P. Chen and C. Zhang
Vol. 15 No. 3
Articles
Classification of multi class dataset using wavelet power spectrum
S. Prabakaran, R. Sahu and S. Verma
CrossClus: user-guided multi-relational clustering
X. Yin, J. Han and P. S. Yu
Tree-Traversing Ant Algorithm for term clustering based on featureless similarities
W. Wong, W. Liu and M. Bennamoun
Mining for trigger events with survival analysis
E. C. Malthouse

Electronic Commerce Research

Vol. 7 No. 2
Articles
Privacy and e-commerce: a consumer-centric perspective
R. Smith and J. Shao
The effect of Internet general privacy concern on customer behavior
J. A. Castañeda and F. J. Montoro
A methodology for verification of digital items in fair exchange protocols with active trustee
A. Bottoni, G. Dini and T. Stabell-Kulø
An integrated model exploring sellers' strategies in eBay auctions
J. Song and J. Baker
Vol. 7 Nos. 3–4
Articles
Enabling assisted strategic negotiations in actual-world procurement scenarios
J. Cerquides, M. López-Sánchez, A. Reyes-Moro and J. A. Rodríguez-Aguilar
Specification and execution of composite trading activities
Y.-W. Si, D. Edmond, M. Dumas and A. H. M. ter Hofstede
Explaining differences in access to home computers and the Internet: A comparison of Latino groups to other ethnic and racial groups
R. W. Fairlie
Understanding collaborative filtering parameters for personalized recommendations in e-commerce
H. J. Lee, J. W. Kim and S. J. Park
Investigating antecedents of technology acceptance of initial eCRM users beyond generation X and the role of self-construal
Q. Chen, H.-M. Chen and R. Kazman
A quantitative foundation for defining and manipulating deals to facilitate automated e-commerce
B. Golany and O. Shmueli
Factors influencing impulse buying during an online purchase
S. A. Jeffrey and R. Hodge
An "S-string" scheme for business-oriented peer-to-peer networks
M. Zghaibeh and F. C. Harmantzis

IEEE Transactions on Evolutionary Computation

Vol. 10 No. 6
Articles
Biasing coevolutionary search for optimal multiagent behaviors
L. Panait, S. Luke and R. P. Wiegand
Self-adapting control parameters in differential evolution: a comparative study on numerical benchmark problems
J. Brest, S. Greiner, B. Boskovic, M. Mernik and V. Zumer
A multiobjective optimization-based evolutionary algorithm for constrained optimization
Z. Cai and Y. Wang
Evolutionary design of neural network architectures using a descriptive encoding language
J.-Y. Jung and J. A. Reggia
Clearance of nonlinear flight control laws using hybrid evolutionary optimization
P. P. Menon, J. Kim, D. G. Bates and I. Postlethwaite
Improved heuristics for the minimum label spanning tree problem
Y. Xiong, B. L. Golden and E. A. Wasil

https://doi.org/10.1017/S0269888909000174 Published online by Cambridge University Press

Vol. 11, No. 1
Articles
Nonlinear least square regression by adaptive domain method with multiple genetic algorithms
S. Tomioka, S. Nishiyama and T. Enoto
An investigation on preference order ranking scheme for multiobjective evolutionary optimization
F. di Pierro, S.-T. Khu and D. A. Savic
Combining neural networks and genetic algorithms to predict and reduce diesel engine emissions
J. M. Alonso, F. Alvarruiz, J. M. Desantes, L. Hernandez and V. Hernández, G. Moltó
An evolutionary approach to multiobjective clustering
J. Handl and J. D. Knowles
Christiansen grammar evolution: grammatical evolution with semantics
A. Ortega, M. de la Cruz and M. Alfonseca
The Dandelion code: a new coding of spanning trees for genetic algorithms
E. Thompson, T. Paulden and D. K. Smith
An immune algorithm for protein structure prediction on lattice models
V. Cutello, G. Nicosia, M. Pavone and J. Timmis
Synapsing variable-length crossover: meaningful crossover for variable-length genomes
B. Hutt and K. Warwick
Vol. 11 No. 2
Guest editorial: convergent approaches to the understanding of autonomous mental development
J. L. McClelland, K. Plunkett and J. Weng
Articles
Computational modeling in developmental psychology
D. Mareschal and M. S. C. Thomas
A survey of artificial cognitive systems: implications for the autonomous development of mental capabilities in computational agents
D. Vernon, G. Metta and G. Sandini
Developing complex systems using evolved pattern generators
V. K. Valsalam, J. A. Bednar and R. Miikkulainen
HMM-based concept learning for a mobile robot
K. M. Squire and S. E. Levinson
Autonomous language development using dialogue-act templates and genetic programming
J.-H. Hong, S. Lim and S.-B. Cho
Task transfer by a developmental robot
Y. Zhang and J. Weng
Evolutionary development of hierarchical learning structures
S. Elfwing, E. Uchibe, K. Doya and H. I. Christensen
Intrinsic motivation systems for autonomous mental development
P.-Y. Oudeyer, F. Kaplan and V. V. Hafner
Vol. 11 No. 3
In Memoriam: Dr. Lawrence J. Fogel
X. Yao
In Memoriam: Dr. Lawrence J. Fogel
G. H. Burgin
Articles
Imperfect evolutionary systems
G. Kendall and Y. Su
Learning finite-state transducers: evolution versus heuristic state merging
S. M. Lucas and T. J. Reynolds
Clustering-based adaptive crossover and mutation probabilities for genetic algorithms
J. Zhang, H. S.-H. Chung and W.-L. Lo
An evolutionary algorithm-based approach to automated design of analog and RF circuits using adaptive normalized cost functions
A. Somani, P. P. Chakrabarti and A. Patra
An investigation on noisy environments in evolutionary multiobjective optimization
C. K. Goh and K. C. Tan
Emerging cooperation with minimal effort: rewarding over mimicking
G. N. Yannakakis, J. Levine and J. Hallam
Finding feasible timetables using group-based operators
R. Lewis and B. Paechter
Interactive evolutionary computation-based hearing aid fitting
H. Takagi and M. Ohsaki
Vol. 11 No. 4
Articles
Time series forecasting for dynamic environments: the DyFor Genetic Program model
N. Wagner, Z. Michalewicz, M. J. Khouja and R. R. McGregor
Where are the niches? Dynamic fitness sharing
A. D. Cioppa, C. De Stefano and A. Marcelli
Natural encoding for evolutionary supervised learning
J. S. Aguilar-Ruiz, R. Giráldez and J. C. Riquelme Santos
Evolutionary gradient search revisited
D. V. Arnold and R. Salomon
Learning classifier system ensembles with rule-sharing
L. Bull, M. Studley, A. J. Bagnall and I. Whittley
Applying genetic parallel programming to synthesize combinational logic circuits
S. M. Cheang, K.-H. Lee and K.-S. Leung
Revisiting the foundations of artificial immune systems for data mining
A. A. Freitas and J. Timmis
Coarse-grained dynamics for generalized recombination
C. R. Stephens and R. Poli
Vol. 11 No. 5
Articles
Evolving problems to learn about particle swarm optimizers and other search algorithms
W. B. Langdon and R. Poli
An evolutionary algorithm for global optimization based on level-set evolution and Latin squares
Y. Wang and C. Dang
Analog genetic encoding for the evolution of circuits and networks
C. Mattiussi and D. Floreano
A runtime analysis of evolutionary algorithms for constrained optimization problems
Y. Zhou and J. He
Solving the register allocation problem for embedded systems using a hybrid evolutionary algorithm
H. R. Topcuoglu, B. Demiröz and M. T. Kandemir
Visual learning by evolutionary and coevolutionary feature synthesis
K. Krawiec and B. Bhanu
Classification with ant colony optimization
D. Martens, M. De Backer, R. Haesen, J. Vanthienen, M. Snoeck and B. Baesens
Fault tolerance using dynamic reconfiguration on the POEtic tissue
W. Barker, D. M. Halliday, Y. Thoma, E. Sanchez, G. Tempest and A. M. Tyrrell
Vol. 11 No. 6
Articles
Multiple choices and reputation in multiagent interactions
S. Y. Chong and X. Yao
MOEA/D: a multiobjective evolutionary algorithm based on decomposition
Q. Zhang and H. Li
On the invariance of ant colony optimization
M. Birattari, P. Pellegrini and M. Dorigo
Properties of symmetric fitness functions
S.-S. Choi, Y.-K. Kwon and B. R. Moon
Evolving compositionality in evolutionary language games
J. F. Fontanari and L. I. Perlovsky
On the evolutionary optimization of many conflicting objectives
R. C. Purshouse and P. J. Fleming

IEEE Transactions on Knowledge and Data Engineering

Vol. 19 No. 8
Articles
Toward exploratory test-instance-centered diagnosis in high-dimensional classification
C. C. Aggarwal
Hot topic extraction based on timeline analysis and multidimensional sentence modeling
K.-Y. Chen, L. Luesukprasert and S.-c. T. Chou
An entropy weighting *k*-means algorithm for subspace clustering of high-dimensional sparse data
L. Jing, M. K. Ng and J. Z. Huang
Frequent closed sequence mining without candidate maintenance
J. Wang, J. Han and C. Li
Maintaining strong cache consistency for the domain name system
X. Chen, H. Wang, S. Ren and X. Zhang
Efficient skyline and top-k retrieval in subspaces
Y. Tao, X. Xiao and J. Pei
A method for estimating the precision of placename matching
M. Doerr and M. Papagelis
Ontology-based service representation and selection
M. Sensoy and P. Yolum
A family of directional relation models for extended objects
S. Skiadopoulos, N. Sarkas, T. K. Sellis and M. Koubarakis
On three types of covering-based rough sets
W. Zhu and F.-Y. Wang
Localized outlying and boundary data detection in sensor networks
W. Wu, X. Cheng, M. Ding, K. Xing, F. Liu and P. Deng

Vol. 19 No. 9
Articles
Continuous clustering of moving objects
C. S. Jensen, D. Lin and B. C. Ooi
Compressed hierarchical mining of frequent closed patterns from dense data sets
L. Ji, K.-L. Tan and A. K. H. Tung
Discovering frequent generalized episodes when events persist for different durations
S. Laxman, P. S. Sastry and K. P. Unnikrishnan
A low-granularity classifier for data streams with concept drifts and biased class distribution
P. Wang, H. Wang, X. Wu, W. Wang and B. Shi
WhiteWater: distributed processing of fast streams
I. Stanoi, G. A. Mihaila, T. Palpanas and C. A. Lang
Using punctuation schemes to characterize strategies for querying over data streams
P. A. Tucker, D. Maier, T. Sheard and P. Stephens
A generalized associative Petri net for reasoning
D.-H. Shih, H.-S. Chiang and B. Lin
On the optimal robot routing problem in wireless sensor networks
B. Yuan, M. E. Orlowska and S. W. Sadiq
On the customization of components: a rule-based approach
J. Zhou, K. Cooper, H. Ma and I.-L. Yen
Topic signature language models for ad hoc retrieval
X. Zhou, X. Hu and X. Zhang
Engineering a policy-based system for federated health-care databases
R. Bhatti, A. Samuel, M. Y. Eltabakh, H. Amjad and A. Ghafoor

Vol. 19 No. 10
EIC Editorial: 2007 TKDE Editorial Board changes
X. Wu
Articles
Failure detection in large-scale internet services by principal subspace mapping
H. Chen, G. Jiang and K. Yoshihira
An evaluation of the robustness of MTS for imbalanced data
C.-T. Su and Y.-H. Hsiao
Community mining from signed social networks
B. Yang, W. Cheung and J. Liu
Clustering over multiple evolving streams by events and correlations
M.-Y. Yeh, B.-R. Dai and M.-S. Chen
GrubJoin: an adaptive, multi-way, windowed stream join with time correlation-aware CPU load shedding
B. Gedik, K.-L. Wu, P. S. Yu and L. Liu
Efficiently querying large XML data repositories: a survey
G. Gou and R. Chirkova
Efficient process of top-k range-sum queries over multiple streams with minimized global error
H.-P. Hung, K.-T. Chuang and M.-S. Chen
Using ranked nodes to model qualitative judgments in Bayesian networks
N. E. Fenton, M. Neil and J. G. Caballero
MULS: a general framework of providing multilevel service quality in sequential data broadcasting
H.-P. Hung and M.-S. Chen
Correction to "a family of directional relation models for extended objects"
S. Skiadopoulos, N. Sarkas, T. K. Sellis and M. Koubarakis

Vol. 19 No. 11
Articles
TKDE guidelines for survey papers
C. W. Clifton, X. Wu and C. Faloutsos
Fast nearest neighbor condensation for large data sets classification
F. Angiulli
Graph-based analysis of human transfer learning using a game testbed
D. J. Cook, L. B. Holder and G. M. Youngblood
Semisupervised regression with cotraining-style algorithms
Z.-H. Zhou and M. Li
Evaluating universal quantification in XML
S. Al-Khalifa, B. Liu and H. V. Jagadish
Efficient and scalable algorithms for inferring likely invariants in distributed systems
G. Jiang, H. Chen and K. Yoshihira
Wildcard search in structured peer-to-peer networks
Y.-J. Joung and L.-W. Yang
A logical formulation of probabilistic spatial databases
A. Parker, V. S. Subrahmanian and J. Grant
Approximate query processing in cube streams
M.-J. Hsieh, M.-S. Chen and P. S. Yu
Optimal scheduling and placement of internet banner advertisements
S. Kumar, M. Dawande and V. S. Mookerjee
Semisupervised query expansion with minimal feedback
M. Okabe and S. Yamada

Vol. 19 No. 12
Articles
Distributed nearest neighbor-based condensation of very large data sets
F. Angiulli and G. Folino
Top-down parameter-free clustering of high-dimensional categorical data
E. Cesario, G. Manco and R. Ortale
Maximal biclique subgraphs and closed pattern pairs of the adjacency matrix: a one-to-one correspondence and mining algorithms
J. Li, G. Liu, H. Li and L. Wong
Combining subclassifiers in text categorization: a DST-based solution and a case study
K. Sarinnapakorn and M. Kubat
To select or to weigh: a comparative study of linear combination schemes for superparent-one-dependence estimators

IEEE Transactions on Neural Networks

Vol. 18 No. 1
Articles
Reduced support vector machines: a statistical theory
Y.-J. Lee and S.-Y. Huang
Backpropagation algorithms for a broad class of dynamic networks
O. De Jesus and M. T. Hagan
A kernel-based two-class classifier for imbalanced data sets
X. Hong, S. Chen and C. J. Harris
A fuzzy min-max neural network classifier with compensatory neuron architecture
A. V. Nandedkar and P. K. Biswas
Dynamics of winner-take-all competition in recurrent neural networks with lateral inhibition
Z.-H. Mao and S. G. Massaquoi
Basic difference between brain and computer: integration of asynchronous processes implemented as hardware model of the retina
A. W. Przybyszewski, P. S. Linsay, P. Gaudiano and C. M. Wilson
Design of asymptotic estimators: an approach based on neural networks and nonlinear programming
A. Alessandri, C. Cervellera and M. Sanguineti
The AIC criterion and symmetrizing the Kullback–Leibler divergence
A.-K. Seghouane and S.-i. Amari
Distribution modeling of nonlinear inverse controllers under a Bayesian framework
R. Herzallah and D. Lowe
Nonlinear adaptive wavelet control using constructive wavelet networks
J.-X. Xu and Y. Tan
Uncertainty estimation using fuzzy measures for multiclass classification
K. E. Graves and R. Nagarajah
A kernel approach for semisupervised metric learning
D.-Y. Yeung and H. Chang
A method of face recognition based on fuzzy *c*-means clustering and associated sub-NNs
J. Lu, X. Yuan and T. Yahagi
Reducing and filtering point clouds with enhanced vector quantization
S. Ferrari, G. Ferrigno, V. Piuri and N. Alberto Borghese
Face recognition using total margin-based adaptive fuzzy support vector machines
Y.-H. Liu and Y.-T. Chen
Model risk for European-style stock index options
R. Gencay and R. Gibson
Direction-dependent learning approach for radial basis function networks
P. Singla, K. Subbarao and J. L. Junkins
Bayesian neural networks for Internet traffic classification
T. Auld, A. W. Moore and S. F. Gull
The impact of arithmetic representation on implementing MLP-BP on FPGAs: a study
A. W. Savich, M. Moussaa and S. Areibi
Dynamically reconfigurable silicon array of spiking neurons with conductance-based synapses
R. J. Vogelstein, U. Mallik, J. T. Vogelstein and G. Cauwenberghs
An experimental study on nonlinear function computation for neural/fuzzy hardware design
K. Basterretxea, J. M. Tarela, I. del Campo and G. Bosque
Density-induced support vector data description
K. Y. Lee, D.-W. Kim, K. H. Lee and D. Lee
Rival-model penalized self-organizing map
Y.-m. Cheung and L.-T. Law
On the almost periodic solution of cellular neural networks with distributed delays
Y. Liu, Z. You and L. Cao
Nonlinear knowledge in kernel approximation
O. L. Mangasarian and E. W. Wild
Sparse model identification using a forward orthogonal regression algorithm aided by mutual information
S. A. Billings and H.-L. Wei
New delay-dependent stability criteria for neural networks with time-varying delay
Y. He, G. Liu and D. Rees
Vol. 18 No. 2
Articles
Efficient optimal linear boosting of a pair of classifiers
V. Boyarshinov and M. Magdon-Ismail
A pyramidal neural network for visual pattern recognition
S. L. Phung and A. Bouzerdoum
Anticipation-based temporal sequences learning in hierarchical structure
J. A. Starzyk and H. He
Support vector echo-state machine for chaotic time-series prediction
Z. Shi and M. Han
Multifeedback-layer neural network
A. Savran
Self-organizing and self-evolving neurons: a new neural network for optimization
S. Wu and T. W. S. Chow
Incremental hierarchical discriminant regression
J. Weng and W.-S. Hwang
Stability and Hopf bifurcation in a simplified BAM neural network with two time delays
J. Cao and M. Xiao
MCES: a novel Monte Carlo evaluative selection approach for objective feature selections
K. H. Quah and C. Quek
Performance-oriented antiwindup for a class of linear control systems with augmented neural network controller
G. Herrmann, M. C. Turner and I. Postlethwaite
A recurrent neural network for hierarchical control of interconnected dynamic systems
Z.-G. Hou, M. M. Gupta, P. N. Nikiforuk, M. Tan and L. Cheng
Several extensions in methods for adaptive output feedback control
N. Kim and A. J. Calise
Robust output feedback tracking control for time-delay nonlinear systems using neural network
C. Hua, X. Guan and P. Shi
Weighted piecewise LDA for solving the small sample size problem in face verification
M. Kyperountas, A. Tefas and I. Pitas
Neuromorphic excitable maps for visual processing
C. Rasche

Sensor integration for satellite-based vehicular navigation using neural networks
R. Sharaf and A. Noureldin
New chaotic PSO-based neural network predictive control for nonlinear process
Y. Song, Z. Chen and Z. Yuan
Neurocomputing model for computation of an approximate convex hull of a set of points and spheres
S. Pal and S. Hattacharya
Comments on "pruning error minimization in least squares support vector machines"
A. Kuh and P. De Wilde
Correction to "gradient-based manipulation of nonparametric entropy estimates" [July 04 828–837]
N. N. Schraudolph
Image processing: principles and applications [book review]
F. Camastra
Intelligent control systems using computational intelligence [book review]
D. V. Prokhorov

Vol. 18 No. 3

Articles

Deterministic learning and rapid dynamical pattern recognition
C. Wang and D. J. Hill
Continuous-time adaptive critics
T. Hanselmann, L. Noakes and A. Zaknich
Sparse distributed memory using rank-order neural codes
S. B. Furber, G. Brown, J. Bose, J. M. Cumpstey, P. Marshall and J. L. Shapiro
Stability analysis and the stabilization of a class of discrete-time dynamic neural networks
K. Patan
Training winner-take-all simultaneous recurrent neural networks
X. Cai, D. V. Prokhorov and D. C. Wunsch II
Fast sparse approximation for least squares support vector machine
L. Jiao, L. Bo and L. Wang
Boolean factor analysis by attractor neural network
A. A. Frolov, D. Húsek, I. P. Muraviev and P. Yu. Polyakov
RCMAC hybrid control for MIMO uncertain nonlinear systems using sliding-mode technology
C.-M. Lin, L.-Y. Chen and C.-H. Chen
An approach to estimating product design time based on fuzzy nu-support vector machine
H.-S. Yan and D. Xu
Simultaneous pattern classification and multidomain association using self-structuring kernel memory networks
T. Hoya and Y. Washizawa
Unsupervised learning of Gaussian mixtures based on variational component splitting
C. Constantinopoulos and A. Likas
A weighted voting model of associative memory
X. Mu, P. Watta and M. H. Hassoun
A class of single-class minimax probability machines for novelty detection
J. T. Kwok, I. W.-H. Tsang and J. M. Zurada
Explicit magnification control of self-organizing maps for "forbidden" data
E. Merényi, A. Jain and T. Villmann
A spatially constrained generative model and an EM algorithm for image segmentation
A. Diplaros, N. A. Vlassis and T. Gevers
A minimum-range approach to blind extraction of bounded sources
F. Vrins, J. A. Lee and M. Verleysen
Higher-order-statistics-based radial basis function networks for signal enhancement
B.-S. Lin, F.-C. Chong and F. Lai
Hierarchical singleton-type recurrent neural fuzzy networks for noisy speech recognition
C.-F. Juang, C.-T. Chiou and C.-L. Lai
Iterative least squares functional networks classifier
E. A. El-Sebakhy, A. S. Hadi and K. A. Faisal
A hybrid neurogenetic approach for stock forecasting
Y.-K. Kwon and B. R. Moon
An improved dynamic neurocontroller based on Christoffel symbols
J. I. M. Martínez
Feedforward neural network implementation in FPGA using layer multiplexing for effective resource utilization
S. Himavathi, D. Anitha and A. Muthuramalingam
Real-time neural network inversion on the SRC-6e reconfigurable computer
R. W. Duren, R. J. Marks II, P. D. Reynolds and M. L. Trumbo
Performance of the Bayesian online algorithm for the perceptron
E. A. de Oliveira and R. C. Alamino
Variational Bayesian approach to canonical correlation analysis
C. Wang
Determination of the number of principal directions in a biologically plausible PCA model
J. Lv, Z. Yi and K. K. Tan
A convex approach to validation-based learning of the regularization constant
K. Pelckmans, J. A. K. Suykens and B. De Moor
Neural-network-based nonlinear adaptive dynamical decoupling control
Y. Fu and T. Chai
Knowledge extraction from neural networks using the all-permutations fuzzy rule base: the LED display recognition problem
E. Kolman and M. Margaliot
Blind image deconvolution through support vector regression
D. Li, R. M. Mersereau and S. J. Simske
An empirical evaluation of the fuzzy kernel perceptron
G. C. Cawley
Neural network learning with global heuristic search
I. Jordanov and A. Georgieva
A geometrical method to improve performance of the support vector machine
P. Williams, S. Li, J. Feng and S. Wu
Global asymptotic stability of delayed cellular neural networks
H. Zhang and Z. Wang
Packet loss rate prediction using the sparse basis prediction model
A. F. Atiya, S. G. Yoo, K. T. Chong and H. Kim
Gabor-like image filtering using a neural microcircuit
C. Mayr, A. Heittmann and R. Schüffny
Comparing support vector machines and feedforward neural networks with similar hidden-layer weights
E. Romero and D. Toppo

Vol. 18 No. 4

Guest editorial special issue on neural networks for feedback control systems
F. L. Lewis, J. Huang, T. Parisini, D. V. Prokhorov and D. C. Wunsch II

Articles

Kernel-based least squares policy iteration for reinforcement learning
X. Xu, D. Hu and X. Lu

Robust reinforcement learning control using integral quadratic constraints for recurrent neural networks
C. W. Anderson, P. M. Young, M. R. Buehner, J. N. Knight, K. A. Bush and D. C. Hittle

Training recurrent neurocontrollers for real-time applications
D. V. Prokhorov

SVM-based tree-type neural networks as a critic in adaptive critic designs for control
A. K. Deb, Jayadeva, M. Gopal and S. Chandra

Least squares solutions of the HJB equation with neural network value-function approximators
Y. Tassa and T. Erez

Neural network control for position tracking of a two-axis inverted pendulum system: experimental studies
S. Jung, H. T. Cho and T. C. Hsia

Neural network adaptive output feedback control for intensive care unit sedation and intraoperative anesthesia
W. M. Haddad, J. M. Bailey, T. Hayakawa and N. Hovakimyan

Fault detection in mechanical systems with friction phenomena: an online neural approximation approach
A. Papadimitropoulos, G. A. Rovithakis and T. Parisini

Neural network controller development and implementation for spark ignition engines with high EGR levels
J. B. Vance, A. Singh, B. C. Kaul, S. Jagannathan and J. A. Drallmeier

Neural control of fast nonlinear systems- application to a turbocharged SI engine with VCT
G. Colin, Y. Chamaillard, G. Bloch and G. Corde

Robust/optimal temperature profile control of a high-speed aerospace vehicle using neural networks
V. Yadav, R. Padhi and S. N. Balakrishnan

Semiglobal ISpS disturbance attenuation with output tracking via direct adaptive design
S. S. Ge and T.-T. Han

Adaptive control of a class of nonaffine systems using neural networks
B.-J. Yang and A. J. Calise

Novel L1 neural network adaptive control architecture with guaranteed transient performance
C. Cao and N. Hovakimyan

Active state estimation for nonlinear systems: a neural approximation approach
L. Scardovi, M. Baglietto and T. Parisini

Discrete-time adaptive backstepping nonlinear control via high-order neural networks
A. Y. Alanis, E. N. Sanchez and A. G. Loukianov

Neural-network-based approximate output regulation of discrete-time nonlinear systems
W. Lan and J. Huang

Support vector networks in adaptive friction compensation
G. L. Wang, Y. F. Li and D. X. Bi

Self-organizing approximation-based control for higher order systems
Y. Zhao and J. A. Farrell

Self-organizing adaptive fuzzy neural control for a class of nonlinear systems
C.-F. Hsu

Characterization of analog local cluster neural network hardware for control
J. Sitte, L. Zhang and U. Rückert

Application of neural network to hybrid systems with binary inputs
W. Holderbaum

Vol. 18 No. 5

Articles

DD-HDS: a method for visualization and exploration of high-dimensional data
S. Lespinats, M. Verleysen, A. Giron and B. Fertil

Sensitivity analysis of the split-complex valued multilayer perceptron due to the errors of the i.i.d. Inputs and Weights
S.-S. Yang, C.-L. Ho and S. Siu

Localized generalization error model and its application to architecture selection for radial basis function neural network
D. S. Yeung, W. W. Y. Ng, D. Wang, E. C. C. Tsang and X. Wang

Polytope ARTMAP: pattern classification without vigilance based on general geometry categories
D. G. Amorim, M. F. Delgado and S. B. Ameneiro

Markov and semi-Markov switching of source appearances for nonstationary independent component analysis
J. Hirayama, S.-i. Maeda and S. Ishii

Discrete-time analogs for a class of continuous-time recurrent neural networks
P. Liu and Q.-L. Han

Separating points by parallel hyperplanes-characterization problem
S. Ghilezan, J. Pantovic and J. D. Zunic

Collective behavior of a small-world recurrent neural system with scale-free distribution
Z. Deng and Y. Zhang

Delayed standard neural network models for control systems
M. Liu

Robust adaptive observer design for uncertain systems with bounded disturbances
V. Stepanyan and N. Hovakimyan

Local model network identification with Gaussian processes
G. Gregorcic and G. Lightbody

A modified probabilistic neural network for partial volume segmentation in brain MR image
T. Song, M. M. Jamshidi, R. R. Lee and M. Huang

Maximization of mutual information for supervised linear feature extraction
J. M. Leiva-Murillo and A. Artés-Rodríguez

Bilinear analysis for kernel selection and nonlinear feature extraction
S. Yang, S. Yan, C. Zhang and X. Tang

Weighted Mahalanobis distance kernels for support vector machines
D. Wang, D. S. Yeung and E. C. C. Tsang

String tightening as a self-organizing phenomenon
B. Banerjee

Implementing spiking neural networks for real-time signal-processing and control applications: a model-validated FPGA approach
M. J. Pearson, A. G. Pipe, B. Mitchinson, K. N. Gurney, C. Melhuish, I. Gilhespy and M. Nibouche

Neural network implementation using bit streams
N. D. Patel, S. K. Nguang and G. G. Coghill

Analysis and online realization of the CCA approach for blind source separation
W. Liu, D. P. Mandic and A. Cichocki

Stochastic gradient-adaptive complex-valued nonlinear neural adaptive filters with a gradient-adaptive step size
S. L. Goh and D. P. Mandic

Blind source extraction using generalized autocorrelations
Z. Shi and C. Zhang

A quick assessment of topology preservation for SOM structures
D. Vidaurre and J. Muruzábal

Connections between score matching, contrastive divergence, and pseudolikelihood for continuous-valued variables
A. Hyvärinen
