Infection Control & Hospital Epidemiology

Volume 47 2026 Number 9

CONTENTS

Commentary

863 Does AI know how to choose wisely? Do not trust and definitely verify when using generative AI in stewardship operations
Amy V. Dora, Lawrence N. Benjamin, Christopher J. Graber, and Westyn Branch-Elliman

Original Articles

866 Shifting surveillance: the federalization of healthcare-associated infection reporting in the U.S.
Julie Kay Reagan, Monika Pogorzelska-Maziarz, Tara Schmidt, Pamela de Cordova, Rodney E. Rohde, Patrick Moeller, Sam Swift, Jilian DeGraw and Victoria Zellar

872 Pediatric gastrointestinal surgical site infections: a case–control study
Vicky Khoury, Erika P. Viana Cardenas, Grace M. Lee, Julianne E. Burns, Jessica Tran, Sneha Krishna, Amy Valencia, Wanda Davis, Gowri Madhavan, Stephanie Chao, Ayelet Rosenthal, Jorge L. Salinas and Roshni Mathew

881 Evaluation of the impact of a novel surgical handwashing method on reformation of microbial flora on surgeons' hands
Abbas Tokyay, Şehmuz Kaya, Sezai Özkan, Necip Güven, Tülin Türközü, Cihan Adanaş, Mehmet Parlak, Kübra Nur Doğan, Mehmet Ata Gökalp and Gülsüm Kaya

885 The impact on airborne isolation duration utilizing GeneXpert versus acid-fast bacilli smears to guide discontinuation among individuals with suspected pulmonary tuberculosis: a systematic review and meta-analysis
David Campbell, Chanhee Seo, Alexander A. Leung, Paul E. Ronksley and Rachel K. Lim

894 Natural ventilation performance for airborne diseases management in a deployable treatment facility
Luca Fontana, Gino Cortellessa, Giorgio Grossi, Anna Silenzi, Michele Di Marco, Antoine Chaillon, Robert Wunderlich, and Giorgio Buonanno

901 PATHogen PREValence on paper-packaged supplies in PICU bedside supply carts: the PATH-PREV study
Shellie Severson, Cathy Sheppard, Angela Bates, Christine MacDonald, Kimberley Dang and Ari R. Joffe

908 The SCANNED rule: derivation and validation of a two-step rule for blood culture stewardship in patients presenting with suspected infection
Zhenghong Liu, Maehanyi Frances Rajendram, Li Yan Julia Jaffar, Xiang Yin Tan, Myriam Hamtiaux, Siew Yee Thien, Frank Scheuermeyer and Robert Stenstrom

915 Updating CMV protocols in lung transplant patients: a single-center case study modeling use of generative AI for antimicrobial stewardship protocol development and economic impact analysis
Kyle T. Enriquez, Augusto Dulanto Chiang, Casey Smiley and Milner Staub

923 Trends in antibiotic prescribing patterns in sixteen in-center dialysis units
Ankur Shah, Cheston Cunha, Filipe Monteiro and Erika Dagata

Cover image: ***A Victim of Outside Forces,*** **2021**

https://doi.org/10.1017/ice.2025.10284 Published online by Cambridge University Press

931 Evaluating a nurse-led, audit-based antimicrobial stewardship in the medical emergency unit of a tertiary level hospital
Rupamdeep Kaur, Soumya Vij, Kamini Walia, Sonam Vijay, Asheema Khosla, Simranjit Kaur, Pawan Kumar, Priya, Naveen Kumar, Priya Choudhary, Mahesh Kumar Balasundaram, Navneet Sharma, Ritin Mohindra, Manisha Biswal, Pankaj Arora, Ashok Pannu, Neelam Taneja and Nusrat Shafiq

938 Development of risk-standardized metrics for benchmarking hospitals on their inpatient antibiotic use
Daniel J. Livorsi, James A. Merchant, Hyunkeun Cho, Heather Davila, Tamar F. Barlam, Sara E. Cosgrove, Dimitri Drekonja, Kelly Echevarria, Matthew Bidwell Goetz, Kevin Hsueh, Kari A. Mergenhagen, Lindsay Taylor and Michihiko Goto

949 Validation of an ICD-10-based algorithm for identifying inappropriate antibiotic prescribing for pediatric outpatients
Samantha Ratner, Ziyi Wang, Torsten Joerger, Yun Li and Jeffrey S. Gerber

Concise Communications

956 Complications in patients with midlines compared to peripherally inserted central catheters for outpatient parenteral antimicrobial therapy
Justin J. Kim, Guadalupe Ordaz-Nielsen, James B. Vu, Kim L. Tran, Ho D. Kim, Michael Schoeny and Michael Y. Lin

959 From bottlenecks to better practices: systemwide electronic clinical decision support for blood culture stewardship
Jessica Seidelman, Michael Yarrington, Stefani Dubea and Jonathon Bae

962 Sustained reduction in blood culture utilization following a crisis-driven diagnostic stewardship intervention
Lior Cohen-Yatziv, Alfredo Mena Lora, Alan E. Gross, Jenna Adams, Nahed Ismail, and Scott Borgetti

Research Brief

966 Parent and caregiver preferences toward antibiotic allergy delabeling in children
Alistair Thorpe, Rachael A. Lee, William B. Petty, Adam L. Hersh, Angela Fagerlin, Valerie M. Vaughn and Julia E. Szymczak

Subscriptions
The individual subscription prices for 2026 are: Print & Online: $411; Online Only: $288. Individuals have the option to order directly from Cambridge University Press. Institutional print + electronic and e-only subscriptions are available from Cambridge University Press and include unlimited online access; rates are tiered according to an institution's type and research output and may be reviewed at the journal's homepage on Cambridge Core: cambridge.org/ICHE.

Please direct subscription inquiries and requests for back issues to Customer Services at Cambridge University Press, e-mail: subscriptions_newyork@cambridge.org (USA, Canada, and Mexico) or journals@cambridge.org (outside of USA, Canada, and Mexico).

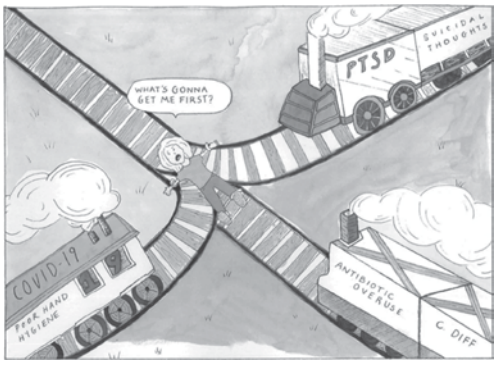

Postmaster: Send address changes to *Infection Control & Hospital Epidemiology*, Cambridge University Press, One Liberty Plaza, New York, NY 10006 USA.

About the cover:

Beginning with volume 43 (January 2022), the cover of *Infection Control & Hospital Epidemiology* (ICHE) will feature art inspired by or reflective of topics within the scope of the journal and their impact on patients, healthcare personnel and our society. These topics include healthcare-associated infections, antimicrobial resistance, and healthcare epidemiology. The intent is to feature original artwork that has been created by individuals who have a personal connection to one or more of these topics through their clinical work, research, or experience as a patient or an affected patient's family member, friend or advocate. The goal is to provide readers with a visual reminder of the human impact of the topics addressed in the journal and the importance of the work being done by those who read or contribute to ICHE and by all who are trying to make healthcare safer through the elimination of healthcare-associated infections.

For more information about the ICHE cover and how to submit artwork for consideration for a future cover, please visit the ICHE website: https://www.cambridge.org/core/journals/infection-control-and-hospital-epidemiology/front-covers

2026

Title: *A Victim of Outside Forces,* 2021
Artist: Lois Bence-Ehlke, RN, BS
Medium: pen and ink sketch

Mrs. Bence-Ehlke spoke to ICHE about her artwork.
What was the inspiration for this artwork?
I am a member of the Patients Engaged in Education and Research (PEER) Group at the University of Wisconsin-Madison. At a meeting in 2021, the group leader encouraged us to think of ways we could use art to highlight the importance of infection prevention in healthcare settings. Not too long after that, I was admitted to a hospital with sepsis. This was relatively early in the COVID-19 pandemic. I saw that the staff were tired and that they had more to do than time to do it. I wondered if I would get the help I needed and worried about getting another infection before I was well enough to go home.

I thought of the idea for this cartoon and sketched it out while I was in my hospital bed. I wanted to make people think about what patients experience while they are in the hospital or receiving medical care in other settings. They are dealing not only with the physical and mental health conditions that initially brought them in but also with many outside forces that may worsen their existing problems or create new ones. These threats include poor hand hygiene by healthcare personnel, overuse of antibiotics, and infections like *C. difficile* and respiratory viruses that can be spread by other patients, healthcare personnel, and the healthcare environment. Patients have little to no control over these forces and may not even be aware of these threats. Even if they are aware of them, many patients are not comfortable raising their concerns to their doctors, nurses, or other care providers. They are simply left to wonder "which of these things is going to get me first?"

What is your personal connection to the content of *ICHE*?
I had a long career as a registered nurse. I began my career as a psychiatry nurse. I was then hired to be the very first infection prevention nurse in a small community hospital after an outbreak of *Staphylococcus aureus* infections occurred in the hospital's newborn nursery. I spent 20 years in infection prevention. During that time, I saw firsthand the many challenges one encounters when trying to implement changes that will make healthcare safer. I also witnessed increasing recognition that healthcare-associated infections are preventable and tremendous growth in our ability to prevent many of these infections. Unfortunately, we still have a long way to go.

Cover image: *A Victim of Outside Forces,* 2021

https://doi.org/10.1017/ice.2025.10284 Published online by Cambridge University Press

In addition to my professional connections to ICHE, I also have personal connections. My first husband developed pneumonia as a complication of leukemia and its treatment. I currently have friends who are unable to live their lives in the way that they want due to recurrent *C. difficile* infections they developed because of antibiotic therapy that may have been unnecessary.

Given the scope of the journal, why is this work appropriate for the cover of *Infection Control & Hospital Epidemiology*?
This sketch shows, from the patient's perspective, the importance of identifying and eliminating the infection-related threats we all currently experience when we receive health care.

Lois Bence-Ehlke lives in Wisconsin with her two miniature schnauzers. She is a member of the Patient and Family Advisory Council and the Patients Engaged in Education and Research (PEER) Group at the University of Wisconsin-Madison. She developed the concept and initial sketch for this comic. It was later enhanced by the PEER coordinator, Sydney Hoel. *The project was supported by the NIH National Center for Advancing Translational Sciences (NCATS), grant UL1TR002373. The content is solely the responsibility of the artist and does not represent the opinion of the NIH or the University of Wisconsin.*
