An Official Journal of The Society for Healthcare Epidemiology of America

INFECTION CONTROL AND HOSPITAL EPIDEMIOLOGY™

EDITORIAL

The A, B, C, D, and E of Vial Hepatitis: Spelling Out the Risks for Healthcare Workers 77
LUDWIG A. LETTAU, MD, MPH

ORIGINAL ARTICLES

Seroprevalence of Antibodies to Hepatitis C Virus in High-Risk Hospital Personnel 82
BRIAN W. COOPER, MD; ALLAN KRUSELL, MD; RICHARD C. TILTON, PHD; RANDOLPH GOODWIN, MD; ROBERT E. LEVITZ, MD

Molecular Epidemiology of Coagulase-Negative Staphylococci Isolated From Immunocompromised Patients 86
LOREEN A. HERWALDT, MD; RICHARD J. HOLLIS, MS; LINDA D. BOYKEN, BS; ICHAEL A. PFALLER, MD

Nursing Home Outbreak of Influenza A (H3N2): Evaluation of Vaccine Efficacy and Influenza Case Definitions 93
JEAN LIN TAYLOR, MPH; DIANE M. DWYER, MD; THELMA COFFMAN, RN; CARMELA GROVES, RN, MS; JAGDISH PATEL, PHD; EBENEZER ISRAEL, MD, MPH

Reduction in the Incidence of Clostridium dificile-Associated Diarrhea in an Acute Care Hospital and a Skilled Nursing Facility Following Replacement of Electronic Thermometers With Single-Use Disposables 98
STEVEN E. BROOKS, PHD; REBECCA O. VEAL, AAS; MARTIN KRAMER, MD; LAURA DORE, RN; NICOLE SCHUPF, PHD, MPH, MASASUMI ADACHI, MD, ScD

TOPICS IN CLINICAL MICROBIOLOGY

Ehrlichiosis 104
ERIC TAYLOR, BS; JOHN T. SINNOTT, IV, MD, FACP

AIDS

A Second Look at the Cost of Mandatory Human Immunodeficiency Virus and Hepatitis B Virus Testing for Healthcare Workers Performing Invasive Procedures 107
GERARD Russo, PHD; SUMNER J. LA CROIX, PHD

PRODUCT COMMENTARY

Peracetic Acid Sterilization: A Timely Development for a Busy Healthcare Industry 111
SUE CROW, MSN, RN, CIC

READERS' FORUM

Introduction of a "Safety" Intravenous Catheter for Use in an Emergency Department: A Pediatric Hospital's Experience 114
LEONARD R. FRIEDLAND, MD; ROBERT BROWN, RN

LETTERS TO THE EDITOR

Minimize risks with the Tempa•DOT® Single-Use Clinical Thermometer System

Sterile

Disposable, single-use Tempa•DOT Thermometers provide an unsurpassed degree of safety for your patients, affording a decisive advantage over other temperature measurement systems. Each sterile Tempa•DOT Thermometer is used only once and then discarded-minimizing the risk of passing harmful microorganisms from one patient to another. The specially-designed peel-down package assures that a new, clean thermometer is used each and every time.

Accurate

Tempa•DOT Thermometers incorporate 45 individual thermometer "dots," each one calibrated to change color at a specific temperature. This innovative thermometric technology provides consistently exact readings. With millions in use each year, Tempa•DOT Thermometers are the choice of prestigious hospitals and organizations across the country.

Fast

Tempa•DOT Thermometers give oral readings in just 60 seconds! Since there's no need to hold the thermometer, the nurse is free to take other vital signs simultaneously, maximizing efficient patient care. Tempa•DOT Thermometers—in individual, easy-to-open, sterile packages -are *always* available,

Versatile

Used throughout your institution, Tempa•DOT Thermometers-in Fahrenheit or Celsius versions --eliminate the need for backup systems. Soft, flexible, nontoxic Tempa•DOT Thermometers are perfect for oral and axillary use, even with newborns and children. For rectal temperature measurement, try disposable Tempa•DOT PLUS Thermometers.

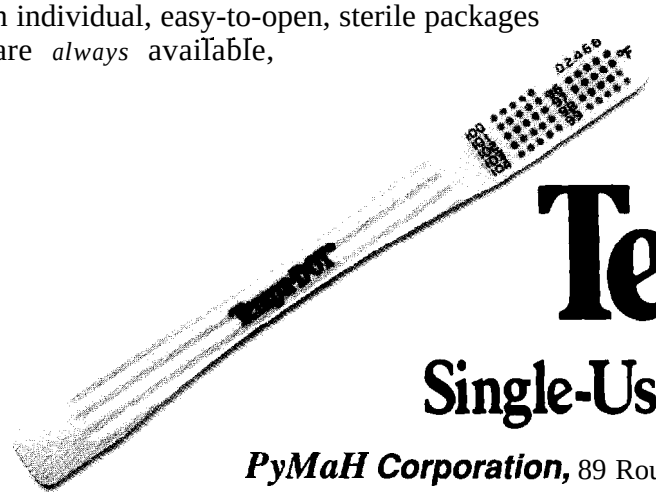

Economical

Tempa•DOT Single-Use Clinical Thermometers enhance patient safety and clinical efficiency—yet cost no more than other systems. Tempa•DOT Thermometers provide economy by eliminating glass and electronic thermometer maintenance, cleaning, and replacement costs. And sterile Tempa•DOT Thermometers may reduce the incidence of extended hospital stays due to thermometer-acquired infections.

1. Smith, Leon; Prince, Herbert N.; Johnson, Edward: Bacteriologic Studies on Electronic Hospital Thermometers: Infection Control 1981; Vol. 2, No. 4: p. 316

For a free Tempa•DOT Thermometer trial, call 1-800-526-3538.

(In New Jersey, call 908-526-1222)

SOME PEOPLE TAKE DRUG ABUSE TO HEART.

Most cocaine users are so dedicated to the drug that what it does to their hearts never enters their minds. They don't realize that every time they use cocaine, they put themselves at risk for such potentially fatal cardiovascular complications as hypertensive crisis.. . myocarditis.. .myocardial infarction . . .ventricular tachycardia.. . ventricular fibrillation.. .even cardiac arrest.

Chances are, at least some of these people are your patients. And many of them may feel more comfortable telling a nurse what they can't-or won't-tell a doctor. That's why your role becomes critical in helping suspected drug abusers understand what illegal drug use does to their bodies.

As key members of the health care team, nurses can make a difference in helping to curb drug abuse, and in preventing some of its deadliest consequences. The next time you suspect a patient may be using cocaine-or any illegal substance—have a heart-to-heart talk about the damage these drugs can do.

A short talk can go a long way.

WE'VE MAGNIFIED THE PROBLEMS OF NEEDLESTICK INJURIES TO MAKE A POINT.

AIDS VIRUS

HEPATITIS B VIRUS

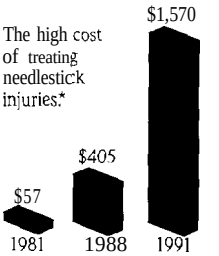

THE PROTECTIV™
I.V.CATHETERSAFETYSYSTEM
Call and request a free copy of the informational brochure "The Implications Of Needlesticks': *Dollar figures taken from different studies. References available upon request.

It's not a pretty picture. The risks of your healthcare workers contracting Hepatitis B or AIDS from a needlestick injury are greater than ever. And so is the cost of treatment.

Consider that in 1981, before AIDS was recognized, the cost of treating a healthcare worker exposed to a blood-borne disease averaged about $57. Today, the cost is over $1,500.

And that's just for the medical treatment. There are also indirect costs to consider. The cost of lost workdays. Of reduced productivity due to psychological stress. Ofrecruitment. Not to mention the possibility of OSHA fines, effects on insurance, and legal implications.

Fortunately, there is a way to virtually eliminate the risk of accidental needlesticks from I.V. catheters before they occur. With the new PROTECTIV'" I.V. Catheter Safety System.

YOUR BEST DEFENSE **IN** THE *WAR* **AGAINST** KEEDLESTICKS.

The PROTECTIV I.V. Catheter Safety System offers needlestick protection during and after use. The catheter contains a protective guard that glides over the contaminated needle. A reassuring "click" lets the user know when the needle is locked safely inside the guard.

THE PROTECTIV" *SAFETY* SYSTEM.
TBE **POINT** OF **MAXIMUM** PBOTECTIOK.

Protect your employees by turning your hospital into a protective environment. Encourage your Infection Control Supervisor to call Critikon for a free cost/benefit analysis today. And make the financial risk of needlestick injuries disappear.

CRITIKON
