Infection Control & Hospital Epidemiology

Volume 47 2026 Number 8

CONTENTS

Commentary

757 Call to action: ambulatory infection prevention
Rebecca Stern, Natalya Beneschott, Jerry Jacob, Sara Keller and Rachael Lee

Original Articles

761 Assessing current capabilities and barriers to performing routine laboratory tests on patients with suspected high consequence infectious disease at frontline acute care hospitals
Madeline A. DiLorenzo, Anthony Joseph Lo Piccolo, Jared Bosk, Dina Shapiro-Luft, Paul Biddinger, Nahid Bhadelia, Tani Jausurawong, Christopher Sulmonte, Dana Mazo, Michael Phillips, Jessica L. Jacobson, Vikramjit Mukherjee and Justin Chan

767 Prospective validation and implementation of a model to identify patients with carbapenem-resistant Enterobacterales (CRE) carriage on admission to acute care hospitals
Hyun Bin Kim, Radhika Prakash-Asrani, Chris W. Bower, Chad Robichaux, Barney Chan, Sarah W. Satola, Madeleine Boulis, Alexandra Rios, Twinkle Trehan, Kripa Michalin, Jesse T. Jacob, Scott K. Fridkin and Jessica Howard-Anderson

774 Rectal versus groin screening for multidrug-resistant organisms: pathogen-specific diagnostic yield in a tertiary-care hospital
Athena Myrou, Simeon Metallidis and Christos Savopoulos

778 Integrating patient in-hospital transfer patterns into automated outbreak detection systems: a single-center retrospective study
Susanne Pinto, Marieke A.M. Harmelink-de Zoete and Maaike S.M. van Mourik

786 Impact of copper-coated surfaces on healthcare-associated infections and microbial load in a pediatric tertiary care setting: an observational cohort study
Quentin Michalchuk, Qian Zhang, Jun C. Collet, Susanna Piasecki, Celia Walker, Titus Wong, David M. Goldfarb and Jocelyn A. Srigley

793 Effectiveness of chlorine treatment of hospital water systems in reducing the incidence of nosocomial legionellosis: a quasi-experimental study
Jiwon Jung, Seongman Bae, Sun-Kyung Kim, Jae Lim Jo, Jeeyoon Kim, Won Il Choi, Sung Hoon Lee, Kwang Hoon Cho and Yong Pil Chong

798 Effectiveness of gaseous ozone in reducing microbial contamination: evaluation of environmental disinfection in healthcare settings
Riccardo Mastrantonio, Alessia Romantini, Camilla Lombardo, Angela Civisca, Mario Muselli, Annalucia Moretti, Giovanna Micolucci and Leila Fabiani

805 Comparing rapid molecular and culture methods for detecting fungal contamination in healthcare environments
Bobby G. Warren, Amanda Graves, Aaron Barrett, Guerbine Fils-Aime, Matthew Stiegel, Becky A. Smith, Ilan Schwartz and Deverick J. Anderson

815 Healthcare personnel masking: current practices and gaps in standardized thresholds
Kevin M. Gibas, Thomas Head, Marissa Broadley and Leonard A. Mermel

Cover image: ***A Victim of Outside Forces,*** **2021**

https://doi.org/10.1017/ice.2025.10282 Published online by Cambridge University Press

823 Collaborative approaches to masking: statewide threshold development and performance across three respiratory seasons
Jessica Nerby, Wendy Berg, Mindy McFarren and Frank Rhame

830 Exploring unconventional antimicrobial stewardship models: options beyond traditional prospective audit and feedback
Alyssa B. Christensen, Gary L. Cochran, Sean N. Avedissian, Brent Footer, Zachary Nelson, Maxx Enzmann and Sarah Rebecca Peglow

Concise Communications

836 Multidrug-resistant organism (MDRO) contamination of nursing home staff hands and forearms when entering the breakroom or going home
Kevin Nguyen, Cassiana E. Bittencourt, Gabrielle M. Gussin, Julie A. Shimabukuro, Raveena D. Singh, Raheeb Saavedra and Susan S. Huang

840 Association between social vulnerability index and rates of carbapenem-resistant enterobacterales infections in the Denver metropolitan region, 2016–2019
Alyssa Beck, Jennifer Driscoll, Karlie Hoetzer, Alison G. Abraham, Rebecca Conway, Johnna Bakalar, Helen Johnston and Christopher A. Czaja

843 Dust-driven transmission of carbapenem-resistant *Acinetobacter baumannii* during replacing bed linens: a hidden airborne route
Li Wei, Yu Feng, Lin Cai, Yuhua Deng, Jing Huang, Hongxia Wen, Lina Liu, Meilin Li, Xiaopan Guo, Fu Qiao and Zhiyong Zong

846 Colonization with multidrug-resistant organisms (MDROs) including *Candidozyma auris* among residents in ventilator-designated versus non-ventilator-designated beds at skilled nursing facilities (SNFs)
Seongeun Kim, Gabrielle M. Gussin, Ken Kleinman, Raveena D. Singh, Cassiana E. Bittencourt and Susan S. Huang

850 Perioperative approaches to *Candida auris* colonization in surgical and transplant patients: insights from an EIN Quick Query
Dana Hassneiah, Dana Pepe, Preeti Mehrotra, Susan Beekmann, Philip Polgreen and Matthew Lee

853 Testing rates and outcomes in *Clostridioides difficile* infection between REM (racially and ethnically minoritized) and non-REM patients
Daniel Li, Katie Moore, Noreen Mollon, Amanda Valyko, Laraine Washer and Anastasia Wasylyshyn

Research Brief

858 Clinically important antimicrobial-resistant bacteria present in publicly accessible locations of a tertiary-care hospital
Megan Walters, Madison Tracy, Dixie Mollenkopf, Dimitria Mathys and Thomas Wittum

Letter to the Editor

861 Donor-derived and nosocomial-acquired *Candida auris* transmission involving solid organ transplant recipients
Adam Lowe, Courtney E. Harris, Evan Rivere, Eric G. Meissner, Alexandra Mills, Adrienne Lorek McGarity, and Scott R. Curry

Subscriptions
The individual subscription prices for 2026 are: Print & Online: $411; Online Only: $288. Individuals have the option to order directly from Cambridge University Press. Institutional print + electronic and e-only subscriptions are available from Cambridge University Press and include unlimited online access; rates are tiered according to an institution's type and research output and may be reviewed at the journal's homepage on Cambridge Core: cambridge.org/ICHE.

Please direct subscription inquiries and requests for back issues to Customer Services at Cambridge University Press, e-mail: subscriptions_newyork@cambridge.org (USA, Canada, and Mexico) or journals@cambridge.org (outside of USA, Canada, and Mexico).

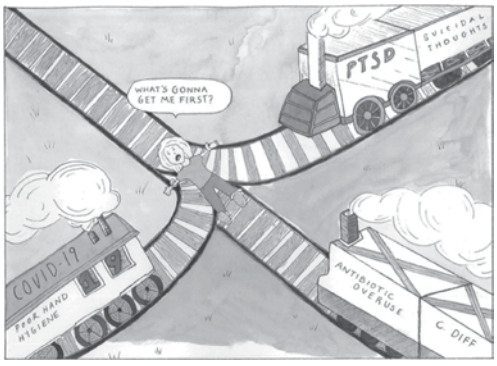

Postmaster: Send address changes to *Infection Control & Hospital Epidemiology*, Cambridge University Press, One Liberty Plaza, New York, NY 10006 USA.

About the cover:

Beginning with volume 43 (January 2022), the cover of *Infection Control & Hospital Epidemiology* (ICHE) will feature art inspired by or reflective of topics within the scope of the journal and their impact on patients, healthcare personnel and our society. These topics include healthcare-associated infections, antimicrobial resistance, and healthcare epidemiology. The intent is to feature original artwork that has been created by individuals who have a personal connection to one or more of these topics through their clinical work, research, or experience as a patient or an affected patient's family member, friend or advocate. The goal is to provide readers with a visual reminder of the human impact of the topics addressed in the journal and the importance of the work being done by those who read or contribute to ICHE and by all who are trying to make healthcare safer through the elimination of healthcare-associated infections.

For more information about the ICHE cover and how to submit artwork for consideration for a future cover, please visit the ICHE website: https://www.cambridge.org/core/journals/infection-control-and-hospital-epidemiology/front-covers

2026

Title: *A Victim of Outside Forces,* 2021
Artist: Lois Bence-Ehlke, RN, BS
Medium: pen and ink sketch

Mrs. Bence-Ehlke spoke to ICHE about her artwork.
What was the inspiration for this artwork?
I am a member of the Patients Engaged in Education and Research (PEER) Group at the University of Wisconsin-Madison. At a meeting in 2021, the group leader encouraged us to think of ways we could use art to highlight the importance of infection prevention in healthcare settings. Not too long after that, I was admitted to a hospital with sepsis. This was relatively early in the COVID-19 pandemic. I saw that the staff were tired and that they had more to do than time to do it. I wondered if I would get the help I needed and worried about getting another infection before I was well enough to go home.

I thought of the idea for this cartoon and sketched it out while I was in my hospital bed. I wanted to make people think about what patients experience while they are in the hospital or receiving medical care in other settings. They are dealing not only with the physical and mental health conditions that initially brought them in but also with many outside forces that may worsen their existing problems or create new ones. These threats include poor hand hygiene by healthcare personnel, overuse of antibiotics, and infections like *C. difficile* and respiratory viruses that can be spread by other patients, healthcare personnel, and the healthcare environment. Patients have little to no control over these forces and may not even be aware of these threats. Even if they are aware of them, many patients are not comfortable raising their concerns to their doctors, nurses, or other care providers. They are simply left to wonder "which of these things is going to get me first?"

What is your personal connection to the content of *ICHE*?
I had a long career as a registered nurse. I began my career as a psychiatry nurse. I was then hired to be the very first infection prevention nurse in a small community hospital after an outbreak of *Staphylococcus aureus* infections occurred in the hospital's newborn nursery. I spent 20 years in infection prevention. During that time, I saw firsthand the many challenges one encounters when trying to implement changes that will make healthcare safer. I also witnessed increasing recognition that healthcare-associated infections are preventable and tremendous growth in our ability to prevent many of these infections. Unfortunately, we still have a long way to go.

Cover image: *A Victim of Outside Forces,* 2021

https://doi.org/10.1017/ice.2025.10282 Published online by Cambridge University Press

In addition to my professional connections to ICHE, I also have personal connections. My first husband developed pneumonia as a complication of leukemia and its treatment. I currently have friends who are unable to live their lives in the way that they want due to recurrent *C. difficile* infections they developed because of antibiotic therapy that may have been unnecessary.

Given the scope of the journal, why is this work appropriate for the cover of *Infection Control & Hospital Epidemiology*?
This sketch shows, from the patient's perspective, the importance of identifying and eliminating the infection-related threats we all currently experience when we receive health care.

Lois Bence-Ehlke lives in Wisconsin with her two miniature schnauzers. She is a member of the Patient and Family Advisory Council and the Patients Engaged in Education and Research (PEER) Group at the University of Wisconsin-Madison. She developed the concept and initial sketch for this comic. It was later enhanced by the PEER coordinator, Sydney Hoel. *The project was supported by the NIH National Center for Advancing Translational Sciences (NCATS), grant UL1TR002373. The content is solely the responsibility of the artist and does not represent the opinion of the NIH or the University of Wisconsin.*
