Equal Opportunity Employer

Benefit: just the spot for a professional with a strong QA background.

Teaching hospital staff in all areas of infection control and prevention requires the skills of a dedicated professional, trained, or with a serious interest, in this important field. If that's you, let us hear from you.

Infection Control Practitioner
Full-time, days

To qualify, you must be a licensed RN or hold a BS in Nursing, Microbiology, Public Health or a related field. In addition, you must have at least five years' recent nursing or hospital work experience. Infection control experience and completion of CDC courses are preferred; strong organization and communication skills are essential.

Our salary and benefit package is comprehensive and competitive, and our work environment is recognized as one of the best in Connecticut. If your qualifications match our requirements, contact Peggy Dillinger, Recruitment Manager, at 789-3518 locally, or l-800/533-5546 out of the area. If you prefer, send her your confidential resume at the: Hospital of Saint Raphael, 1450 Chapel Street, New Haven, CT 06511. Either way, you won't have long to wait for a response.

Because treating professionals with respect is something else we do better. By design.

We are an Equal Opportunity Employer.

YOUR JOB CAN BE LESS OF A THREAT

"HANDS-OFF"

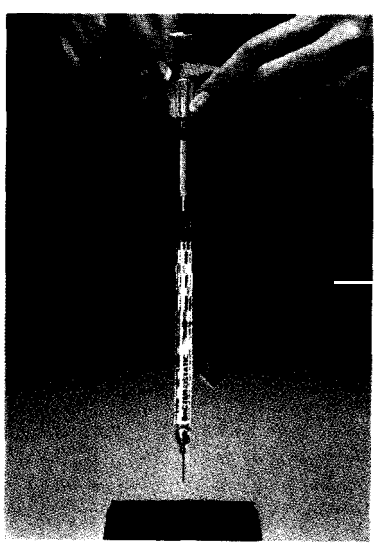

INJECTOR Tubex®

(closed injection system) Ayerst

TUBEX®, the unique, *safer,* hands-off injector that puts you farther from the needle and cartridge than any other injection system.

There's no touching.. .shaking. . . manipulation of cartridge or needle. Just twist and drop.

Nurses preferred TUBEX almost 3:1 for the prevention of accidental needle stick injuries in a study comparing TUBEX Injector and Carpuject.®*[1] Which is one more reason to

adopt TUBEX- the injection system designed as if your life depended on it.

FARTHER FROM THE POINT OF DANGER
