Tables

Table 1.1	Characteristics of the recipient roles Responsive Recipient and Co-constructive Recipient	*page* 11
Table 2.1	Distribution of male and female participants in the narrative components of the NC	41
Table 2.2	Distribution of narrative participants in the narrative component according to social class	41
Table 2.3	Distribution of participants in the narrative component according to age group	42
Table 2.4	Narrative Corpus – basic statistics	43
Table 2.5	Distribution of the 531 narratives in the NC across narrative types	48
Table 2.6	Participant values in narrative components	54
Table 2.7	Quotatives and their tags in the NC	56
Table 3.1	Possible turn trigrams in three-party conversational narrative	81
Table 3.2	Turn trigrams in KE1-N1	84
Table 3.3	Number of trigrams and N-notN-N trigrams in data (21 three-party narratives)	86
Table 3.4	Number of words per turn and TSF coefficients in the pre-narrative, narrative, and post-narrative components of text KB9-N2	94
Table 3.5	Medians and IQRs for components of text KB9-N2	97
Table 3.6	Data analyzed for turn size fluctuation	98
Table 3.7	Average medians and IQRs of TSF coefficients	100
Table 3.8	Median lengths of narrator and recipient turn pairs	102
Table 4.1	Number of interjections, including *well*, in quotes and conversational utterances longer than one word (n > 1)	128
Table 4.2	10 most frequent ITJ in conversational utterances	129
Table 4.3	10 most frequent ITJ in quotes	131
Table 4.4	Chi-squared statistics for *oh* and *well* in quote- and utterance-first position (df = 1)	133
Table 4.5	Frequencies of *fuck*, *wow*, *urgh/ugh*, and *aargh/ow* in quote- and utterance-first position	137

Table 4.6	Frequencies of *er*, *erm* and <pause/> occurring within the positional scope of quotes	146
Table 5.1	Basic statistics of utterances with sequences of $3 \leq n \leq 8$ report units	159
Table 5.2	Results of tests for trends in proportions for sequences of $3 \leq n \leq 8$ report units within utterances ($df = 1$)	163
Table 5.3	Report types with associated mimetic values	164
Table 5.4	Results of test for trends in proportions for sequences of $3 \leq n \leq 8$ report units within utterances (binary values)	166
Table 6.1	10 random examples of PRR and PRC utterances each	174
Table 6.2	Test statistics for Kendall's rank correlation tests for subsets 1–3	181
Table 6.3	4 Negative Binomial models for the association of narrator verbosity and recipient activity	182
Table 6.4	Forms of Co-constructive Recipient contributions	189
