Instructions to authors

Detailed instructions to authors are available online here:
cambridge.org/core/journals/journal-of-glaciology/information

The *Journal of Glaciology* publishes two types of paper:

- articles on new glaciological findings and theories, or new instruments and methods, or up-to-date, coherent articles reviewing a glaciological subject
- letters of a topical nature, or comments on papers previously published in the Journal

Papers submitted should be:

- of high scientific quality
- complete and clear
- substantially different from previously published work.

Length

Papers should be concise. Lines and pages should be numbered. Papers more than 12 *Journal* pages in length should be cleared with the Chief Editor before submission (one *Journal* page = about 1000 words). Letters are limited to five *Journal* pages.

Original submission

Submit your paper via the *Journal of Glaciology* online submission system at https://mc.manuscriptcentral.com/jog

Review process

Your paper will be peer reviewed by at least two reviewers. The Scientific Editor will discuss any alterations required to the paper. The Associate Chief Editor will inform you if and when your paper is accepted for publication. Papers written in poor English will be rejected without review.

You will be sent a proof of your text and illustrations to check and correct (you will have to pay for any substantial alterations made at this stage).

Final submission

The final accepted version of the paper should be in electronic format.

- Acceptable formats are
  - Text (including tables and figure captions) – Word, rtf or LaTeX (the IGS class file should be used; downloadable from the website). Please also supply a final PDF
  - Figures – ideally in tif or eps format (or otherwise in the format in which they were created)
- Responsibility for the accuracy of all data (including references) rests with the authors

Supplementary material

The *Journal of Glaciology* accepts and makes available online appropriate supplementary material. It should be clearly named and labelled and provided in standard file formats.

General points

- Title should be concise
- Abstract should be less than 200 words
- Papers should be divided into numbered sections with short section headings
- Use SI units
- Use internationally recognized systems of abbreviation
- Illustrations should
  - be one or two column widths: up to 85 mm or up to 178 mm
  - not be in boxes
  - use strong black lines (avoid tinting if possible)
  - use SI units in labels
  - use Optima, Arial or a similar sans serif font in labels
- TeX authors: please provide a pdf of the whole paper (text, tables, figures and captions) as well as the individual LaTeX and graphics files
- Equations should
  - be set in MathType or advanced equation editor
  - NOT be embedded as graphics in the text
- Tables should
  - be numbered in Arabic
  - be referred to in text (as Table 1 etc.)
  - NOT be submitted as illustrations
- All citations in text should include the author name(s) and the year of publication (e.g. Smith, 2010; Smith and Jones, 2012; Smith and others, 2014) and must have an entry in the reference list
- Reference lists should
  - be concise
  - be complete and accurate, including doi numbers
  - be provided in precise *Journal* format, including punctuation and emphasis (see past papers for style)
  - be arranged in alphabetical order by first author's surname
  - include works accepted but not published as 'in press'
  - not include personal communications, unpublished data or manuscripts in preparation or submitted for publication (these should be included in the text)

Open Access and page charges

As a gold open access journal, the *Journal of Glaciology* is published without restriction and receives no subscription revenue. The costs of publication are instead covered by an article publishing charge (APC) levied upon the corresponding author, or his/her funding body or institution.

The APC for non-IGS members is £1,200 for a regular article and £600 for a letter.

The APC for IGS members is £1,080 for a regular article and £540 for a letter. The APCs quoted here are correct for 2016.

Upon acceptance for publication the corresponding author will be contacted by Rightslink on behalf of Cambridge University Press, who will administer the collection of the article publishing charge. At that stage the corresponding author can pay by credit card or arrange for an invoice to be issued to his/her funding body or institution. Selected authors may be granted an APC waiver by the IGS. In such cases, a waiver code shall be provided, which should be issued to Rightslink upon receipt of the payment.

Journal of
GLACIOLOGY

CONTENTS Vol 63 No 239 2017

387–400 **An englacial hydrologic system of brine within a cold glacier: Blood Falls, McMurdo Dry Valleys, Antarctica**
Jessica A. Badgeley, Erin C. Pettit, Christina G. Carr, Slawek Tulaczyk, Jill A. Mikucki, W. Berry Lyons, MIDGE Science Team

401–422 **Firn Model Intercomparison Experiment (FirnMICE)**
Jessica M.D. Lundin, C. Max Stevens, Robert Arthern, Christo Buizert, Anais Orsi, Stefan R.M. Ligtenberg, Sebastian B. Simonsen, Evan Cummings, Richard Essery, Will Leahy, Paul Harris, Michiel M. Helsen, Edwin D. Waddington

423–435 **Roughness of a subglacial conduit under Hansbreen, Svalbard**
Kenneth D. Mankoff, Jason D. Gulley, Slawek M. Tulaczyk, Matthew D. Covington, Xiaofeng Liu, Yunxiang Chen, Douglas I. Benn, Piotr S. Głowacki

436–449 **Variability in ice motion and dynamic discharge from Devon Ice Cap, Nunavut, Canada**
Wesley Van Wychen, Jamie Davis, Luke Copland, David O. Burgess, Laurence Gray, Martin Sharp, Julian A. Dowdeswell, Toby J. Benham

450–463 **Multi-decadal reduction in glacier velocities and mechanisms driving deceleration at polythermal White Glacier, Arctic Canada**
Laura I. Thomson, Luke Copland

464–476 **Quantifying supraglacial meltwater pathways in the Paakitsoq region, West Greenland**
Conrad Koziol, Neil Arnold, Allen Pope, William Colgan

477–486 **Spectral measurements of surface hoar crystals**
Simon Horton, Bruce Jamieson

487–498 **Modelling the diversion of erratic boulders by the Valais Glacier during the last glacial maximum**
Guillaume Jouvet, Julien Seguinot, Susan Ivy-Ochs, Martin Funk

499–513 **Ice flux evolution in fast flowing areas of the Greenland ice sheet over the 20th and 21st centuries**
Daniele Peano, Florence Colleoni, Aurélien Quiquet, Simona Masina

514–522 **^{10}Be in the Akademii Nauk ice core – first results for CE 1590–1950 and implications for future chronology validation**
Luisa Von Albedyll, Thomas Opel, Diedrich Fritzsche, Silke Merchel, Thomas Laepple, Georg Rugel

523–534 **Glacier mass variation and its effect on surface runoff in the Beida River catchment during 1957–2013**
Sheng Wang, Tandong Yao, Lide Tian, Jianchen Pu

535–542 **Changes of glaciers and glacial lakes implying corridor-barrier effects and climate change in the Hengduan Shan, southeastern Tibetan Plateau**
Xin Wang, Kaiguo Chai, Shiyin Liu, Junfeng Wei, Zongli Jiang, Qionghuan Liu

543–555 **Ground-penetrating radar measurements of debris thickness on Lirung Glacier, Nepal**
Michael McCarthy, Hamish Pritchard, Ian Willis, Edward King

556–564 **Eurasian ice-sheet dynamics and sensitivity to subglacial hydrology**
Eythor Gudlaugsson, Angelika Humbert, Karin Andreassen, Caroline C. Clason, Thomas Kleiner, Sebastian Beyer

Letters

565–567 **Assessing mass balance with the cone penetration test**
Adrian McCallum

568–572 **Dependence of slope lapse rate over the Greenland ice sheet on background climate**
Olga Erokhina, Irina Rogozhina, Matthias Prange, Pepijn Bakker, Jorge Bernales, André Paul, Michael Schulz
