Acknowledgments

The approach to scattering theory presented here was initially explored in collaboration with Marek Bleszynski. We are grateful to him for many suggestions and lively discussions. We are also indebted to Göran Fäldt, with whom we have enjoyed collaborations on closely related topics.

We have furthermore enjoyed, during this work, the hospitality of several remarkable institutions, most noteworthy the Los Alamos National Laboratory, CERN, NORDITA, and ICTP.

Funding from the SCOAP3 for Books initiative made it possible for this book to be published open access in 2025, making the digital version freely available for anyone to read under a Creative Commons licence.
