BIBLIOGRAPHY

Publications on financial history 2002

SERGE NOIRET
European University Institute, Florence

This bibliography covers publications that appeared during 2002 and during the year 2001 when they were not known before the deadline of last year's bibliography. In that case, the year of publication is mentioned in the citation.

It follows previous criteria being divided into two broad areas: general literature in financial history in section 1, and specialised material in section 2. Section 2 is then subdivided chronologically, and further by geographical area (the complete classification scheme was published in Volume 1, Part 2, October 1994, pp. 157–60).

From this year, the bibliography will concentrate only on medieval, early modern and contemporary history as a result of a decision taken during the *FHR* Editorial Board Meeting in Athens, Greece, on 27 May 2004.

Where there are no entries for a particular section, the heading has been omitted. Abbreviations have been kept to a minimum, but standard abbreviations such as *J.* for *Journal*, *Q.* for *Quarterly*, *Rev.* for *Review/Revue*, have been used throughout. Short titles are used for references to edited volumes within the section in which they are listed; elsewhere they are cited in full. Doctoral theses and working papers are not included. Articles published in books 'edited by' are mentioned only if the bibliographer accessed the index of the book before the deadline of the publication. Translations in English for some European, Asian and African languages are used in the bibliography only when the source of the bibliographic citation made it available.

All URLs used for website citations were alive in July 2004.

The bibliographer is pleased to receive suggestions of any kind for compiling this bibliography via e-mail at the following address: <serge.noiret@iue.it>.
