	Preface	*page* ix
	Acknowledgments	xi
	List of Abbreviations	xii
	Part I Introduction	1
1	Overview and Preview	3
2	Diffraction Theory	10
3	Asymptotic Diffraction Theory and Classical Scattering	15
4	Two Simple Examples	22
	4.1 Coulomb Scattering	22
	4.2 Paired Trajectories	24
	4.3 Rainbows	26
5	Complex Trajectories	31
	5.1 A Purely Absorptive Interaction	34
	5.2 Choice of Integration Path	37
6	Scattering from Linear Structures	43
	6.1 One Slit	43
	6.2 Two Slits	46
	6.3 Three Slits	47
	Part II Phase Shift Functions for Various Radial Falloffs	51
7	Phase Shift Functions with Gaussian Decrease	53
	7.1 The Real-Valued Gaussian Phase Shift Function	54
	7.2 Differential Cross Section near the Rainbow Point	62
	7.3 Gaussian Phase Shift Function with Absorption	64

Downloaded from https://www.cambridge.org/core. UNIVERSIDAD AUTONOMA METROPOLITANA, on 16 Nov 2026 at 11:05:36, subject to the Cambridge Core terms of use , available at https://www.cambridge.org/core/terms. https://doi.org/10.1017/9781316219256

7.4 Logarithmic Phase Shift Function 70
7.5 "Fermi–Gaussian" Phase Shift Function 73

8 Phase Shift Functions with Exponential Edge 80
8.1 Evenness 82
8.2 Exponential Phase Shift Function 82
8.3 Inverse cosh Phase Shift Function 84
8.4 "Fermi" Phase Shift Function 90

9 Sharper Edges 99
9.1 Quartic Edge 99
9.2 Sharper Edges 101

10 Phase Shift Functions with Other Analytic Properties 103
10.1 Other Powers of the "Fermi" Phase Shift Functions 104
10.2 "Derivative-Based" Phase Shift Functions 104
10.2.1 Soft-Exponential Phase Shift Function 106
10.2.2 Sharp-Exponential Phase Shift Function 109
10.2.3 Other Powers 113
10.3 Additional Phases 114

Part III Composite Phase Shift Functions 117

11 Coulomb Scattering from Extended Charges 119
11.1 Screened Charge Distribution—An Example 120
11.2 Screened Charge Distribution—Generalities 122
11.3 A Simple Charge Distribution 123
11.4 Gaussian Type Charge Distribution 126
11.5 "Fermi" Type Charge Distribution 129

12 Coulomb Plus Nuclear Interactions 135
12.1 Real Gaussian Plus Coulomb 136
12.1.1 Repulsive Gaussian Plus Coulomb 140
12.1.2 Attractive Gaussian Plus Coulomb 141
12.2 Absorptive Gaussian Plus Coulomb 142
12.3 "Fermi" Plus Coulomb 144

13 Two-Scale Phase Shift Functions 146
13.1 Two Gaussians 146
13.2 The "Shoulder Function"—Three Rainbows 150
13.3 The Shoulder Function for Absorption 153

Downloaded from https://www.cambridge.org/core. UNIVERSIDAD AUTONOMA METROPOLITANA, on 16 Nov 2026 at 11:05:36, subject to the Cambridge Core terms of use , available at https://www.cambridge.org/core/terms. https://doi.org/10.1017/9781316219256

14 Double "Fermi" Phase Shift Functions 156
14.1 Two "Fermi" Phase Shift Functions with the Same Surface Thickness 157
14.1.1 Additional Internal Structure 157
14.1.2 Additional External Structure 161
14.2 Different Surface Thicknesses 163
14.2.1 Sharper External Structure 163
14.2.2 Sharper Internal Structure 165

15 Different-Strength Singularities 168
15.1 "Fermi" and Squared "Fermi" Functions 169
15.2 "Fermi" and Square Root of "Fermi" Functions 175
15.3 "Fermi" Plus Gaussian Functions 180

16 Summary 186

Appendix A Partial Waves and Phase Shift Function 188

Appendix B Iteration for Stationary Points 190
