337 **How can we improve the engagement and treatment of autistic children and those with social communication difficulties in the child and adolescent mental health service?**
Nicki Lunstone, Ching Li, Natalie Inker & Robert Quested

In this issue (pp. 284–294) Abdel Aziz et al review two rare non-psychotic perceptual disorders—visual snow syndrome and exploding head syndrome. They describe their characteristic symptoms, frequent misdiagnosis and psychiatric comorbidity, and outline emerging neurobiological models. They also summarise how psychiatrists might diagnose and manage these disorders.
