Connectives and Discourse Relations

Illustrated with examples from a rich range of languages and genres, this book provides a state-of-the-art introduction to the meanings and functions of connectives, and the discourse relations they communicate. It begins with theoretical chapters that illustrate the many interfaces present in the study of connectives and discourse relations, using diachronic data to illustrate how connectives incorporate such a wide range of functions in synchronic language use. The second half of the book presents the rapidly growing body of studies that have used empirical data to assess theories of connectives and discourse relations, spanning fields as diverse as discourse processing, first and second language acquisition, and cross-linguistic studies. End-of-chapter discussion questions and lists of further reading are included, along with a comprehensive glossary of key terms. This title is part of the Flip it Open programme and may also be available open access. Check our website Cambridge Core for details.

SANDRINE ZUFFEREY is a professor at the Institute of French Language and Literature, University of Bern, Switzerland. She is the author of two research monographs on the topic of language acquisition and pragmatics, and the co-author of four textbooks. She has also published extensively on the topic of discourse connectives.

LIESBETH DEGAND is a professor at the Institute for Language and Communication, UCLouvain, Belgium. She is an experienced project leader of international research networks in the area of discourse markers. She has published extensively on the categorization of discourse markers as linguistic expressions at the discourse–grammar interface.

KEY TOPICS IN SEMANTICS AND PRAGMATICS

'Key Topics in Semantics and Pragmatics' focuses on the main topics of study in semantics and pragmatics today. It consists of accessible yet challenging accounts of the most important issues, concepts and phenomena to consider when examining meaning in language. Some topics have been the subject of semantic and pragmatic study for many years, and are re-examined in this series in light of new developments in the field; others are issues of growing importance that have not so far been given a sustained treatment. Written by leading experts and designed to bridge the gap between textbooks and primary literature, the books in this series can either be used on courses and seminars, or as one-stop, succinct guides to a particular topic for individual students and researchers. Each book includes useful suggestions for further reading, discussion questions, and a helpful glossary.

Already published in the series:

Meaning and Humour by Andrew Goatly

Metaphor by L. David Ritchie

Imperatives by Mark Jary and Mikhail Kissine

Modification by Marcin Morzycki

Semantics for Counting and Measuring by Susan Rothstein

Irony by Joana Garmendia

Implicatures by Sandrine Zufferey, Jacques Moeschler and Anne Reboul

The Semantics of Case by Olga Kagan

Attitude Reports by Thomas Grano

Indirect Speech Acts by Nicolas Ruytenbeek

Naming and Indexicality by Gregory Bochner

Forthcoming titles:

Semantics and Pragmatics in Sign Languages by Kathryn Davidson Zaremba

Modalities by Anastasia Giannikidou and Alda Mari
