BIOPOLITICS AND ANIMAL SPECIES IN NINETEENTH-CENTURY LITERATURE AND SCIENCE

Principles of species taxonomy were contested ground throughout the nineteenth century, including those governing the classification of humans. Matthew Rowlinson shows that taxonomy was a literary and cultural project as much as a scientific one. His investigation explores animal species in Romantic writers including Gilbert White and John Keats, taxonomies in Victorian lyrics and the nonsense botanies and alphabets of Edward Lear, and species, race, and other forms of aggregated life in Charles Darwin's writing, showing how the latter views these as shaped by unconscious agency. Engaging with theoretical debates at the intersection of animal studies and psychoanalysis, and covering a wide range of science writing, poetry, and prose fiction, this study shows the political and psychic stakes of questions about species identity and management. This title is part of the Flip it Open Programme and may also be available Open Access. Check our website Cambridge Core for details.

MATTHEW ROWLINSON is Professor of English at the University of Western Ontario. He is the author of *Real Money and Romanticism* (Cambridge University Press, 2010) and *Tennyson's Fixations: Psychoanalysis and the Topics of the Early Poetry* (1994). His edition of Tennyson's *In Memoriam* was published in 2014.

Nineteenth-century literature and culture have proved a rich field for interdisciplinary studies. Since 1994, books in this series have tracked the intersections and tensions between Victorian literature and the visual arts, politics, gender and sexuality, race, social organisation, economic life, technical innovations, scientific thought – in short, culture in its broadest sense. Many of our books are now classics in a field which since the series' inception has seen powerful engagements with Marxism, feminism, visual studies, post-colonialism, critical race studies, new historicism, new formalism, transnationalism, queer studies, human rights and liberalism, disability studies and global studies. Theoretical challenges and historiographical shifts continue to unsettle scholarship on the nineteenth century in productive ways. New work on the body and the senses, the environment and climate, race and the decolonisation of literary studies, biopolitics and materiality, the animal and the human, the local and the global, politics and form, queerness and gender identities, and intersectional theory is re-animating the field. This series aims to accommodate and promote the most interesting work being undertaken on the frontiers of nineteenth-century literary studies, connecting the field with the urgent critical questions that are being asked today. We seek to publish work from a diverse range of authors, and stand for anti-racism, anti-colonialism and against discrimination in all forms.

A complete list of titles published will be found at the end of the book.
