The Aeronautical Journal

of the Royal Aeronautical Society

Volume CXVIII

January – December 2014

Subject Index

ACOUSTICS

Advanced open rotor noise prediction. M.J. Kingan, pp 1125-1135.
Progress in aerodynamic and aeroacoustic integration of CROR propulsion systems. R. Akkermans, A. Stuermer and J. Yin, pp 1137-1158.

AERODYNAMICS

A review of train aerodynamics: Part 1 – Fundamentals (Survey Paper). C.J. Baker, pp 201-228.
A review of train aerodynamics: Part 2 – Applications (Survey Paper). C.J. Baker, pp 345-382.
Aerodynamic study of aerofoil and wing in simulated rain environment via a two-way coupled Eulerian-Lagrangian approach. Z. Wu and Y. Cao, pp 643-668.
An expression for the dynamic stability of blunt slender elliptic bodies in hypersonic flow. M. Khalid and K.A.Juhany, pp 1079-1089
Analytical and experimental study of the integral aerodynamic characteristics of low-speed wind turbines. G.N. Barakos, M. Valiev, R. Stepanov,V. Salakhov, M. Pakhov and V. Zherekhov, pp 1229-1224.
Estimation of lateral-directional aerodynamic derivatives from flight data using conventional and neural based methods. A.K. Ghosh and R. Kumar, pp 1453-1479.
Flow compressibility effects around an open-wheel racing car. S. Diasinos, J. Keogh and G. Doig, pp 1409-1431.
Flow over a glider canopy. A.S. Jonker, J.J. Bosman, E.H. Mathews and L. Liebenberg, pp 669-682.
How to improve open rotor aerodynamics at cruise and take-off. T. Brandvik, N. Sohoni, C. Hall and A. Zachariadis, pp 1103-1123.
Improved sliding mode guidance law based on fuzzy variable coefficients strategy. J.Guo, T.N.Wang, J.H.Xiong and S.J.Tang, pp 435-451
Initial conceptual design and wing aerodynamic analysis of a solar power-based UAV. N. Arai, K. Fukuda, K. Hiraoka,W. Khalid and M. Harasani, pp 540-554.
Multi-parametric flutter analysis of a morphing wing trailing edge. R. Pecora, M. Magnifico, F. Amoroso and E. Monaco, pp 1063-1078.
On the application of light weight materials to improve aircraft fuel burn – reduce weight or improve aerodynamic efficiency? D.I.A. Poll, pp 903-934.
On the compensation and damping of roll induced by wake vortices. L.M.B.C. Campos and J.M.G.Marques, pp 1039-1061.
Progress in aerodynamic and aeroacoustic integration of CROR propulsion systems. R. Akkermans, A. Stuermer and J. Yin, pp 1137-1158.
Qualification of the ARA TWT for laminar flow testing. J. Alderman, N. Allen, S. Lawson and M. Maina, pp 1349-1358.
Scale effects on a single-element inverted wing in ground effect. J. Correia, L.S. Roberts, M.V. Finnis and K. Knowles, pp 797-809.

https://doi.org/10.1017/S0001924000010186 Published online by Cambridge University Press

Supersonic wing-body wave drag co-ordinated optimisation based on FCE methodology. X. Guan, pp 1359-1372.
Taranis and beyond: inspiring aerodynamic capability. C. Lee, pp 845-859.
The aerodynamic challenges of aeroengine gas-turbine combustion systems. J.J. McGuirk, pp 557-599.
Topology optimisation via the moving iso-surface threshold method: implementation and application. L. Tong and S. Vasista, pp, 315-342.
Transonic aerofoils admitting anomalous behaviour of life coefficient. A. Kuzmin and A.Ryabinin, pp 425-433.
Vibration analyses of an equivalent plate wing with an external store. J.-H. Kim and S.-J. Shin, pp 1090-1098.

AEROELASTICITY

Aeroelastic effects of battens on the flight dynamics of a MAV. J. Babcock and R. Lind, pp 985-1008.
Computational aeroelastic analysis of slowed rotors at high advance ratios. J. de Montaudouin,N. Reveles and M.J. Smith, pp 297-313.

AEROSPACE ENGINEERING

Conceptual stage separation from widebody subsonic carrier aircraft for space access. V. Hawke, U. Mehta, L. Huynh and J. Kless, pp 1279-1309.

AIR TRAFFIC MANAGEMENT

Aero-propulsive modelling for climb and descent trajectory prediction of transport aircraft using genetic algorithms. T. Baklacioglu and M. Cavcar, pp 65-79.
Airspace sectorisation via a weighted graph model (Technical Note). D.F. Zhang and Y.Z. Chen, pp 267-274.
Fuel burn and emissions evaluation for a missed approach procedure performed by a B737-400. R. Botez, S. Ford and R. Dancila, pp 1329-1348.
Horizontal flight trajectories optimisation for commercial aircraft through a flight management system. R. Botez, R.S.F. Patron and A. Kessaci, pp 1499-1518.
Runway conflict alerting: advisory or directive? A. Sammut and D. Zammit Mangion, pp 713-741.
Runway debris impact threat maps for transport aircraft. A. Francis,R. Olsson, S.N. Nguyen, E.S. Graham and J.M.R. Greenhalgh, pp 229-266.
Simulation modelling of runway capacity for flight training airports. F.A. Cetek and C. Cetek, pp 143-154.

AIRCRAFT DESIGN

A multidisciplinary robust optimisation framework for UAV conceptual design. J.-W. Lee, Y.-D. Lee, H.-U Park and N. Van Nguyen, pp 123-142.
Effect of wing-box structure on the optimum wing outer shape. A. Elham and M.J.L van Tooren, pp 1-30.
Efficient optimisation of large aircraft fuselage structures. S. Grihon, W.J. Vankan and R. Maas, pp 31-52.

AIRCRAFT DESIGN

Energy absorption structures design of civil aircraft to improve crashworthiness. Y.M.A.Ren and J. Xiang, pp 383-398.

AIRCRAFT DESIGN

Initial conceptual design and wing aerodynamic analysis of a solar power-based UAV. N. Arai, K. Fukuda, K. Hiraoka, W. Khalid and M. Harasani, pp 540-554.
Taranis and beyond: inspiring aerodynamic capability. C. Lee, pp 845-859.

https://doi.org/10.1017/S0001924000010186 Published online by Cambridge University Press

AIRPORTS

Runway conflict alerting: advisory or directive? A. Sammut and D. Zammit Mangion, pp 713-741.
Runway debris impact threat maps for transport aircraft. A. Francis, R. Olsson, S.N. Nguyen, E.S. Graham and J.M.R. Greenhalgh, pp 229-266.
Simulation modelling of runway capacity for flight training airports. F.A. Cetek and C. Cetek, pp 143-154.

AIRWORTHINESS

Energy absorption structures design of civil aircraft to improve crashworthiness. Y.M.A. Ren and J.Xiang, pp 383-398.

https://doi.org/10.1017/S0001924000010186 Published online by Cambridge University Press

COLLISION AVOIDANCE

Conflict detection and resolution algorithms for UAVs collision avoidance. R. Galatolo, G. Migliaccio and G. Mengali, pp 828-842.
Constrained optimal terrain following/threat avoidance trajectory planning using network flow. M.J. Yazdanpanah, R. Zardashti and A.A. Nikkhah, pp 523-539.

COMPOSITES

Modelling lay-up automation and production rate interaction on the cost of large stiffened panel components. J. Butterfield, S. Cowan, P. McElroy, P. Robertson, S. Hawthorne, M. Mullan, A. Murphy, D. Quinn and M. Price, pp 275-296.
On the application of light weight materials to improve aircraft fuel burn – reduce weight or improve aerodynamic efficiency? D.I.A. Poll, pp 903-934.

COMPUTATIONAL FLUID DYNAMICS

Investigation of flow asymmetry around axi-symmetric spiked blunt bodies in hypersonic speeds. Y.M.A. Mahmoud and N. Qin, pp 169-179.

COMPUTATIONAL TECHNIQUES

A comparative study of parameter estimation techniques applied to jettisoned external stores. G. Guglieri, P. Marguerettaz and G. Simioni, pp 601-624.
A hybrid approach for aircraft fault diagnosis based on fault inference and fault identification. X. Liu and Z. Liu, pp 81-97.
Computational aeroelastic analysis of slowed rotors at high advance ratios. J. de Montaudouin, N. Reveles and M.J. Smith, pp 297-313.
Conflict detection and resolution algorithms for UAVs collision avoidance. R. Galatolo, G. Migliaccio and G. Mengali, pp 828-842.
Estimation of lateral-directional aerodynamic derivatives from flight data using conventional and neural based methods. A.K. Ghosh and R. Kumar, pp 1453-1479.
Flapping wings in line formation flight: a computational analysis. M. Ghommem and V.M. Calo, pp 485-501.

DAMAGE TOLERANCE

An analysis approach toward FAA certification for damage tolerance of aircraft components. Y. Xue, M. Garg, B. Farahmand and J. Nikbin, K. Housner and F. Abdi, pp 181-196.
Energy absorption structures design of civil aircraft to improve crashworthiness. Y.M.A. Ren and J.Xiang, pp 383-398.
Riveted patch repairs for helicopter tail drive shafts with battle damage. A.A. Bakera, D. Bitton and J. Wanga, pp 811-827.

FLIGHT CONTROL

Diagonally dominant backstepping autopilot for aircraft with unknown actuator failures and severe winds. R. Ayyagari, N. Sundararajan, S. Ismail and A.A. Pashilkar, pp 1009-1038.
Evaluating a set of stall recovery actions for single engine light aeroplanes. G.B. Gratton, R.I. Hoff, A. Rahman, C. Williams, S. Harbour and M. Bromfield, pp 461-484.
Multi-body dynamic modelling and flight control for an asymmetric variable sweep morphing UAV. H. Ji and L. Tong, pp 683-706.

https://doi.org/10.1017/S0001924000010186 Published online by Cambridge University Press

On the compensation and damping of roll induced by wake vortices. L.M.B.C. Campos and J.M.G.Marques, pp 1039-1061.

FLIGHT CONTROL SYSTEMS

Diagonally dominant backstepping autopilot for aircraft with unknown actuator failures and severe winds. R. Ayyagari, N. Sundararajan, S. Ismail and A.A. Pashilkar, pp 1009-1038.
Multi-body dynamic modelling and flight control for an asymmetric variable sweep morphing UAV. H. Ji and L. Tong, pp 683-706.

FLIGHT DYNAMICS

Aeroelastic effects of battens on the flight dynamics of a MAV. J. Babcock and R. Lind, pp 985-1008.
An expression for the dynamic stability of blunt slender elliptic bodies in hypersonic flow. M. Khalid and K.A. Juhany, pp 1079-1089.
Bayesian sensitivity analysis of flight parameters that affect main landing gear yield locations. D. Bond, P. Sartor, K. Worden and R. Kyle Schmidt, pp 1481-1497.
Diagonally dominant backstepping autopilot for aircraft with unknown actuator failures and severe winds. R. Ayyagari, N. Sundararajan, S. Ismail and A.A. Pashilkar, pp 1009-1038.
Evaluating a set of stall recovery actions for single engine light aeroplanes. G.B. Gratton, R.I. Hoff, A. Rahman, C. Williams, S. Harbour and M. Bromfield, pp 461-484.
Multi-parametric flutter analysis of a morphing wing trailing edge. R. Pecora, M. Magnifico, F. Amoroso and E. Monaco, pp 1063-1078.
On the compensation and damping of roll induced by wake vortices. L.M.B.C. Campos and J.M.G. Marques, pp 1039-1061.

HUMAN FACTORS

Visual aspects of advanced sensors and helmet-mounted displays. P.J. Morgan-Warren and M. Woodcock, pp 155-168.

HYPERSONICS

An expression for the dynamic stability of blunt slender elliptic bodies in hypersonic flow. M. Khalid and K.A.Juhany, pp 1079-1089.
Investigation of flow asymmetry around axi-symmetric spiked blunt bodies in hypersonic speeds. Y.M.A. Mahmoud and N. Qin, pp 169-179.

JETS

Advanced open rotor noise prediction. M.J. Kingan, pp 1125-1135.
Computational aeroelastic analysis of slowed rotors at high advance ratios. J. de Montaudouin, N. Reveles and M.J. Smith, pp 297-313.
Numerical investigation of separation pattern and separation pattern transition in overexp and ed single expansion ramp nozzle. J.Mo, M.Wang, Y.Yu and J.Xu, pp 399-424.
The aerodynamic challenges of aeroengine gas-turbine combustion systems. J.J. McGuirk, pp 557-599.
Triangular tabs for supersonic jet mixing enhancement. P. Arun Kumar and E. Rathakrishnan, pp 1245-1278.

LAND-BASED TRANSPORT

A review of train aerodynamics: Part 1 – Fundamentals (Survey Paper). C.J. Baker, pp 201-228.

https://doi.org/10.1017/S0001924000010186 Published online by Cambridge University Press

A review of train aerodynamics: Part 2 – Applications (Survey Paper). C.J.Baker, pp 345-382.
Flow compressibility effects around an open-wheel racing car. S. Diasinos, J. Keogh and G. Doig, pp 1409-1431.
On the interaction of a racing car front wing and exposed wheel. T. Barber, S. Diasinos and G. Doig, pp 1385-1407.

LANDING GEAR

Bayesian sensitivity analysis of flight parameters that affect main landing gear yield locations. D. Bond, P. Sartor, K. Worden and R. Kyle Schmidt, 1481-1497.

MATERIALS

An analysis approach toward FAA certification for damage tolerance of aircraft components. Y. Xue, M. Garg, B. Farahmand, J. Nikbin, K. Housner and F. Abdi, pp 181-196.
Modelling lay-up automation and production rate interaction on the cost of large stiffened panel components. J. Butterfield, S. Cowan, P. McElroy, P. Robertson, S. Hawthorne, M. Mullan, A. Murphy, D. Quinn and M. Price, pp 275-296.
On the application of light weight materials to improve aircraft fuel burn - reduce weight or improve aerodynamic efficiency? D.I.A. Poll, pp 903-934.

OPEN ROTORS

Advanced open rotor noise prediction. M.J. Kingan, pp 1125-1135.
How to improve open rotor aerodynamics at cruise and take-off. T. Brandvik, N. Sohoni, C. Hall and A. Zachariadis, pp 1103-1123.
Performance prediction and progress towards multi-disciplinary design of contra-rotating open rotors. R.G. Becker, S. Guérin and R. Schnell, pp 1159-1179.
Progress in aerodynamic and aeroacoustic integration of CROR propulsion systems. R. Akkermans, A. Stuermer and J. Yin, pp 1137-1158.
Progress in open rotor propulsors: The FAA/GE/NASA open rotor test campaign. A. Orton, S. Arif Khalid, J.P. Wojno, T.H. Van Zante, D.E. Wood and F. Collier, pp 1181-1213.

PROPULSION

Aero-propulsive modelling for climb and descent trajectory prediction of transport aircraft using genetic algorithms. T. Baklacioglu and M. Cavcar, pp 65-79.
Computational aeroelastic analysis of slowed rotors at high advance ratios. J. de Montaudouin, N. Reveles and M.J. Smith, pp 297-313.
Evaluation of aero gas turbine preliminary weight estimation methods. P. Giannakakis,V. Sethi, A.J.B. Jackson, P. Lolis and P. Pilidis, pp 625-641.
How to improve open rotor aerodynamics at cruise and take-off. T. Brandvik, N. Sohoni, C. Hall and A. Zachariadis, pp 1103-1123.
Numerical investigation of separation pattern and separation pattern transition in overexp and ed single expansion ramp nozzle. J. Mo, M. Wang, Y. Yu and J. Xu, pp 99-424.
Performance prediction and progress towards multi-disciplinary design of contra-rotating open rotors. R.G. Becker, S. Guérin and R. Schnell, pp 1159-1179.
Progress in aerodynamic and aeroacoustic integration of CROR propulsion systems. R. Akkermans, A. Stuermer and J. Yin, pp 1137-1158.
Progress in open rotor propulsors: The FAA/GE/NASA open rotor test campaign. A. Orton, S. Arif Khalid, J.P. Wojno, T.H. Van Zante, D.E. Wood and F. Collier, pp 1181-1213.
Self-cleaning barrier filter for rotorcraft engines. N. Bojdo and A. Filippone, pp 1311-1328.
The aerodynamic challenges of aeroengine gas-turbine combustion systems. J.J. McGuirk, pp 557-599.

https://doi.org/10.1017/S0001924000010186 Published online by Cambridge University Press

ROTORCRAFT

Lagrangian formulation for the rapid estimation of helicopter rotor blade vibration characteristics. I. Goulos, V. Pachidis and P. Pilidis, pp 861-901.
On power and actuation requirement in swashplateless primary control of helicopters using trailing-edge flaps. C. Duling, F. Straub and F.G Andhi, pp 503-521.
Riveted patch repairs for helicopter tail drive shafts with battle damage. A.A. Bakera, D. Bitton and J. Wanga, pp 811-827.
Self-cleaning barrier filter for rotorcraft engines. N. Bojdo and A.Filippone, pp 1311-1328.
The Ornicopter – a tailless helicopter with active flapping blades. M.D. Pave and J. Wanl, pp 743-773.

SAFETY

A hybrid approach for aircraft fault diagnosis based on fault inference and fault identification. X. Liu and Z. Liu, pp 81-97.
A rating scale for the subjective assessment of simulation fidelity. E. Timson, M.D. White, G.D. Padfield, R. Gubbels, A.W. Erdos and P. Perfect, pp 953-974.
An analysis approach toward FAA certification for damage tolerance of aircraft components. Y. Xue, M. Garg, B. Farahmand J. Nikbin, K. Housner and F. Abdi, pp 181-196.
Conflict detection and resolution algorithms for UAVs collision avoidance. R. Galatolo, G. Migliaccio and G. Mengali, pp 828-842.
Constrained optimal terrain following/threat avoidance trajectory planning using network flow. M.J. Yazdanpanah, R. Zardashti and A.A. Nikkhah, pp 523-539.
Diagonally dominant backstepping autopilot for aircraft with unknown actuator failures and severe winds. R. Ayyagari, N. Sundararajan, S. Ismail and A.A. Pashilkar, pp 1009-1038.
Energy absorption structures design of civil aircraft to improve crashworthiness. Y.M.A.Ren and J. Xiang, pp 383-398.
Evaluating a set of stall recovery actions for single engine light aeroplanes. G.B. Gratton, R.I. Hoff, A. Rahman, C. Williams, S. Harbour and M. Bromfield, pp 461-484.
Prediction of warning level in aircraft accidents using data mining techniques. S. Appavu alias Balamurugan and A.B.C. Arockia, pp 935-952.
Riveted patch repairs for helicopter tail drive shafts with battle damage. A.A. Bakera, D. Bitton and J. Wanga, pp 811-827.
Structural health monitoring technology for a full-scale aircraft structure under changing temperature. D. Gao, Y. Wang, Z. Wu and G. Rahim, pp 1519-1551.
The PBP Bow-Tie framework for the systematic representation and comparison of safety regulatory frameworks. R. Clothier, K. Kourousis, K. Massey and L. Purton, pp 1433-1452.

SIMULATION

A rating scale for the subjective assessment of simulation fidelity. E. Timson, M.D. White, G.D. Padfield, R. Gubbels, A.W. Erdos and P. Perfect, pp 953-974.
Aerodynamic study of aerofoil and wing in simulated rain environment via a two-way coupled Eulerian-Lagrangian approach. Z. Wu and Y. Cao, pp 643-668.
Aero-propulsive modelling for climb and descent trajectory prediction of transport aircraft using genetic algorithms. T. Baklacioglu and M. Cavcar, pp 65-79.
Simulation modelling of runway capacity for flight training airports. F.A. Cetek and C. Cetek, pp 143-154.

STRUCTURES

Effect of wing-box structure on the optimum wing outer shape. A. Elham and M.J.L van Tooren, pp 1-30.
Efficient optimisation of large aircraft fuselage structures. S. Grihon, W.J. Vankan and R. Maas, pp 31-52.

https://doi.org/10.1017/S0001924000010186 Published online by Cambridge University Press

Energy absorption structures design of civil aircraft to improve crashworthiness. Y.M.A. Ren and J. Xiang, pp 383-398.
On the application of light weight materials to improve aircraft fuel burn - reduce weight or improve aerodynamic efficiency? D.I.A. Poll, pp 903-934.
Structural health monitoring technology for a full-scale aircraft structure under changing temperature. D. Gao, Y. Wang, Z. Wu and G. Rahim, pp 1519-1551.

SUPERSONIC FLIGHT

Supersonic wing-body wave drag co-ordinated optimisation based on FCE methodology. X. Guan, pp 1359-1372.

SYSTEMS

Neurally-augmented immunity-based detection and identification of aircraft sub-system failures. B. Wilburnt, J. Wilburn, O. Karas, A. Perhinschi, M.G. Bartlet and H. Moncayo, pp 775-796.

TESTING

Experimental analysis of the automated process of s and ing aircraft surfaces. B. Giublin, J.A.Vieira, T.G. Vieira, L.G. Martins and C.A. Trabasso, pp, 53-64.
Qualification of the ARA TWT for laminar flow testing. J. Alderman, N. Allen, S. Lawson and M. Maina, pp 1349-1358.

UAVS

A multidisciplinary robust optimisation framework for UAV conceptual design. J.-W. Lee, Y.-D. Lee, H.-U Park and N. Van Nguyen, pp 123-142.
Aeroelastic effects of battens on the flight dynamics of a MAV. J. Babcock and R. Lind, pp 985-1008.
Conflict detection and resolution algorithms for UAVs collision avoidance. R. Galatolo, G. Migliaccio and G. Mengali, pp 828-842.
Initial conceptual design and wing aerodynamic analysis of a solar power-based UAV. N. Arai, K. Fukuda, K. Hiraoka, W. Khalid and M. Harasani, pp 540-554.
Multi-body dynamic modelling and flight control for an asymmetric variable sweep morphing UAV. H. Ji and L. Tong, pp 683-706.

UNSTEADY AERODYNAMICS

An expression for the dynamic stability of blunt slender elliptic bodies in hypersonic flow. M. Khalid and K.A. Juhany, pp 1079-1089.
Steady and unsteady pressure measurements on a swept-wing aircraft. N. Jansson and G. Stenfelt, pp 109-122.
