Notes on the Contributors

Dorit Bar-On is Professor of Philosophy at the Department of Philosophy, University of Connecticut. Her research interests are the philosophy of language and mind, epistemology, and metaethics. Recently, she has been working on the topic of continuities between linguistic and non-linguistic communication and expressive behaviour. Professor Bar-On is currently working on several manuscripts on expression, truth and self-knowledge.

Corine Besson is a Senior Lecturer in philosophy at the University of Sussex, and the Director of the Centre for Logic and Language (CeLL) at the Institute of Philosophy, School of Advanced Study, University of London. She is currently writing a book for Oxford University Press entitled *Logic, Reasoning and the Tortoise*, which is in large part concerned with the relevance of Lewis Carroll's regress argument (in his *Mind* 1895 paper, 'What the Tortoise Said to Achilles') to the philosophy of logic.

Matthew Chrisman is a Professor of Ethics and Epistemology at the University of Edinburgh. His research is focused on ethical theory, political philosophy, the philosophy of language, and epistemology. He has published widely in these areas, including books with *Oxford University Press* and *Routledge* and articles in *Noûs*, *Synthese*, *The Journal of Philosophy*, *Proceedings of the Aristotelian Society*, *Australasian Journal of Philosophy*, *Oxford Studies in Metaethics, Philosophy and Phenomenological Research*, *Philosophers' Imprint* and *Philosophical Studies*.

María-José Frápolli is a Professor of Logic and Philosophy of Science at the Department of Philosophy I of the University of Granada (Spain) and Honorary Professor at the Department of Philosophy, University College London. She is also a member of the Excellence Unit *Filolab* (UGR). Some of her publications are *The Nature of Truth. An Updated Approach to the Meaning of Truth Ascriptions*. Springer (2013), 'Non-Representational Mathematical Realism', *Theoria* 30/3 (2015), 331-348; 'The Pragmatic Gettier. Brandom on Knowledge and Belief', *Disputatio*,

Vol. 8, No. 9 (2019); and co-authored with Neftalí Villanueva, 'Minimal Expressivism', *dialectica*. vol. 66, no 4 (2012), and 'Expressivism, Relativism, and the Analytic Equivalence Test'. *Frontiers in Psychology* (2015), http://dx.doi.org/10.3389/fpsyg.2015.01788

Javier Osorio is a Researcher at the Department of Philosophy I, University of Granada. His main research interests are experimental philosophy, social epistemology and philosophy of science.

Huw Price is Bertrand Russell Professor of Philosophy at Cambridge University. His recent publications include *Making a Difference* (Oxford University Press, 2017), co-edited with Helen Beebee and Chris Hitchcock, and *The Practical Turn: Pragmatism in Britain in the Long Twentieth Century* (Oxford University Press, 2017), co-edited with Cheryl Misak.

Andrés Soria is a Researcher at the Institut Jean Nicod, Paris, where he received his PhD in June 2019. His interests lie at the intersection of philosophy of language, formal semantics and pragmatics and metaethics.

Isidora Stojanovic is a Researcher at the Centre National de la Recherche Scientifique, Institut Jean Nicod, Paris. She works at the interface of philosophy of language, semantics and pragmatics. Her current research aims to explore the variety of linguistic mechanisms that underscore evaluative discourse. One direction of research concerns the classification of adjectives and aims to put forward a battery of linguistic criteria that tease apart subjectivity from evaluativity. Another direction studies the ways in which the valence evaluative judgments may depend on the context. Yet a third direction explores the semantics and pragmatics of expressive meaning, as when we use pejoratives, such as 'jerk'. While the primary focus is on theoretical questions, Stojanovic incorporates in her work methodologies from experimental pragmatics as well as corpus linguistics. The study of evaluative language is likely to have a broader, including areas such as metaethics, aesthetics and epistemology.

Neftalí Villanueva is Reader in philosophy at the Department of Philosophy I, University of Granada. His recent publications include articles on Wittgenstein, relativism, and expressivism.

José Zalabardo is a Professor of Philosophy at the Department of Philosophy, University College London. He is interested in the relationship between reality and our representations of it in thought and language. His main concern is to understand the consequences of the fact that our characterisation of this relationship is itself a representation of reality in thought or language. Professor Zalabardo works in areas of epistemology, metaphysics and the philosophies of mind and language that address these problems.
