# Access to Food Constitutes a Human Right

## World hunger is an ever-present scourge that claims 35,000 lives each day.

Access to food constitutes a human right. In 1976, the United States Congress passed a Right to Food Resolution which declared the sense of the congress to be "that all people have a right to a nutritionally adequate diet".

**Physicians Against World Hunger** (PAWH), a non-profit, tax-exempt organization was founded so that physicians could collectively defend this human right by raising funds to support well-recognized, reputable organizations that are directly engaged in working with the poor primarily for the purpose of ending death by starvation.

Please join us — together physicians must help bring an end to world hunger.
