The Knowledge Engineering Review, Vol. 17:2, 000–000

From the journals . . .

Applied Artificial Intelligence

Vol. 15 No. 9
Articles
A neuro-fuzzy hybrid scheme for design and simulation of human machine systems
XF Zha
Combined method of genetic programming and association rule algorithm
A Niimi and E Tazaki
Rough set-aided keyword reduction for text categorization
A Chouchoulas and Q Shen
Vol. 15 No. 10
Articles
Automatic generation of communication and teamwork within multi-agent teams
KE Biggers and TR Ioerger
Agent interaction for bioinformatics data management
K Bryson, M Luck, M Joy and DT Jones
Learning-based scheduling of flexible manufacturing systems using case-based reasoning
P Priore, D De La Fuente, R Pino and J Puente
Vol. 16 No. 1
Articles
Propagating temporal relations of intervals by matrix
SC Zhang and CQ Zhang
Analysis of multi-interpretable ecological monitoring information
F Brazier, J Engelfriet and J Treur
A compositional process control model and its application to biochemical processes
CM Jonker and J Treur
An evolutionary algorithm for generalized comparison-based self-diagnosis of multiprocessor systems
M Elhadef and B Ayeb

Applied Intelligence

Vol. 16 No. 1
Articles
Evolution of appropriate crossover and mutation operators in a genetic process
TP Hong, HS Wang, WY Lin and WY Lee
Distributed, collaborative data analysis from heterogeneous sites using a scalable evolutionary technique
B Park, H Kargupta, E Johnson, E Sanseverino, D Hershberger and L Silvestre
An efficient gradient forecasting search method utilizing the discrete difference equation prediction model
CM Chen and HM Lee
A mixture of experts network structure construction algorithm for modelling and control
X Hong and CJ Harris
Debugging hardware designs using a value-based model
F Wotawa
Vol. 16 No. 2
Special issue on creative evolutionary systems
Guest editorial
PJ Bentley and DW Corne
All the truth about NEvAr
P Machado and A Cardoso
Evolutionary design systems and generative processes
P Janssen, J Frazer and MX Tang
Towards creative evolutionary systems with interactive genetic algorithm
SB Cho
Compact unstructured representations for evolutionary design
H Hamda, F Jouve, E Lutton, M Schoenauer and M Sebag

Artificial Intelligence

Vol. 132 No. 2
Articles
Local search characteristics of incomplete SAT procedures
D Schuurmans and F Southey
Planning as constraint satisfaction: Solving the planning graph by compiling it into CSP
MB Do and S Kambhampati
Bargaining with limited computation: Deliberation equilibrium
K Larson and T Sandholm
Rough approximation quality revisited
G Gediga and I Duntsch
Vol. 133 Nos. 1–2
Articles
On decision-theoretic foundations for defaults
RI Brafman and N Friedman
An argument-based approach to reasoning with specificity
PM Dung and TC Son
The problem of survival from an algorithmic point of view
JD Fouks and L Signac
Recognition of gestures in Arabic sign language using neuro-fuzzy systems
O Al Jarrah and A Halawani
Reasoning about nonlinear system identification
E Bradley, M Easley and R Stolle
A general formulation of conceptual spaces as a meso level representation
J Aisbett and G Gibbon
Defeasible reasoning with variable degrees of justification
JL Pollock

https://doi.org/10.1017/S0269888902000401 Published online by Cambridge University Press

Artificial Intelligence in Engineering

Vol. 15 No. 3
Articles
Adaptive reconstruction of bone geometry from serial cross-sections
GK Knopf and R Al Naji
Analysis of artificial neural network models for freeway ramp metering control
CH Wei
Incorporating machine intelligence in a parameter-based control system: a neural-fuzzy approach
HCW Lau, TT Wong and A Ning
A low-cost internet-based telerobotic system for access to remote laboratories
S You, TM Wang, R Eagleson, C Meng and QX Zhang
Heuristic methods for vehicle routing problem with time windows
KC Tan, LH Lee, QL Zhu and K Ou
Stabilization control of series-type double inverted pendulum systems using the SIRMs dynamically connected fuzzy inference model
JQ Yi, N Yubazaki and K Hirota
An ant colony optimization approach to addressing a JIT sequencing problem with multiple objectives
PR McMullen
Vol. 15 No. 4
Articles
Emergent synthesis
K Ueda
Synthesis and emergence – research overview
K Ueda
Understanding design fundamentals: how synthesis and analysis drive creativity, resulting in emergence
VV Kryssanov, H Tamaki and S Kitamura
Pheromone based emergent shop floor control system for flexible flow shops
P Peeters, H Van Brussel, P Valckenaers, J Wyns, L Bongaerts, M Kollingbaum and T Heikkila
Emergent synthesis of motion patterns for locomotion robots
MM Svinin, K Yamada and K Ueda
Simulating behaviors of human situation awareness under high workloads
T Sawaragi and K Murasawa
Concept of self-reconfigurable modular robotic system
S Murata, E Yoshida, H Kurokawa, K Tomita and SF Kokaji

Artificial Intelligence Review

Vol. 16 No. 4
Articles
A review of the application of meta-heuristic algorithms to 2D strip packing problems
E Hopper and BCH Turton
The logical approach to temporal reasoning
JC Augusto

Expert Systems With Applications

Vol. 21 No. 3
Articles
A knowledge-based system for determination of marginal value of building projects
HS Neap and T Celik
Web personalization expert with combining collaborative filtering and association rule mining technique
CH Lee, YH Kim and PK Rhee
Maintaining case-based reasoning systems using a genetic algorithms approach
KJ Kim and I Han
The cluster-indexing method for case-based reasoning using self-organizing maps and learning vector quantization for bond rating cases
KS Kim and I Han
Mining the change of customer behavior in an internet shopping mall
HS Song, JK Kim and SM Kim
Vol. 21 No. 4
Articles
High Performance Knowledge Bases: four approaches to knowledge acquisition, representation and reasoning for workaround planning
J Kingston
A multi-agent intelligent system for efficient ERP maintenance
OB Kwon and JJ Lee
Personalization technology application to Internet content provider
YF Kuo and LS Chen
A systolic parallel simulation system for dynamic traffic assignment: SPSS-DTA
K Park and W Kim
Developing a software size model for rule-based systems: a case study
TT Moores
A learning-enabled infrastructure for electronic contracting agents
ST Yuan and SF Chen
Vol. 22 No. 1
Articles
An intelligent information infrastructure to support knowledge discovery
HCW Lau, RWL Ip and FTS Chan
Rule-based diagnosis and supervision of a pilot-scale wastewater treatment plant using fuzzy logic techniques
EF Carrasco, J Rodriguez, A Punal, E Roca and JM Lema
Problem solving and knowledge inertia
SH Liao
Predicting stock price using fuzzy grey prediction system
YF Wang
Mining linear programming models from databases using means ends analysis and artificial neural network
OB Kwon and KC Lee

https://doi.org/10.1017/S0269888902000401 Published online by Cambridge University Press

IEEE Transactions on Knowledge and Data Engineering

Vol. 13 No. 6
Articles
Mining associations with the collective strength approach
CC Aggarwal and PS Yu
Accurate modeling of region data
G Proietti and C Faloutsos
Efficient processing of nested fuzzy SQL queries in a fuzzy database
Q Yang, WN Zhang, CW Liu, J Wu, C Yu, H Nakajima and ND Rishe
Aggregation of imprecise arid uncertain information in databases
S McClean, B Scotney and M Shapcott
Structured development of problem solving methods
D Fensel and E Motta
Disk scheduling in video editing systems
WG Aref, I Kamel and S Ghandeharizadeh
Virtual images for similarity retrieval in image databases
G Petraglia, M Sebillo, M Tucci and G Tortora
Nonmonotonic reasoning as prioritized argumentation
JH You, XC Wang and LY Yuan
Rewriting queries using views
S Flesca and S Greco
Transaction repair for integrity enforcement
LV Orman
Protecting respondents' identities in microdata release
P Samarati
Time-space trade-off analysis of morphic trie images
RWP Luk
Spatio-temporal composition of video objects: Representation and querying in video database systems
N Pissinou, I Radev, K Makki and WJ Campbell
Vol. 14 No. 1
Articles
Naive semantics to support automated database design
VC Storey, RC Goldstein and H Ullrich
A methodology for learning across application domains for database design systems
VC Storey and D Dey
Mining optimized association rules with categorical and numeric attributes
R Rastogi and K Shim
Finding localized associations in market basket data
CC Aggarwal, C Procopiuc and PS Yu
Indexing and retrieval for genomic databases
HE Williams and J Zobel
Efficient global optimization for image registration
Y Chen, RR Brooks, SS Iyengar, NSV Rao and J Barhen
A distributed learning algorithm for Bayesian inference networks
W Lam and AM Segre
3D-list: A data structure for efficient video query processing
CC Liu and ALP Chen
Finite satisfiability of integrity constraints in object-oriented database schemas
A Formica
A comprehensive analytical performance model for disk devices under random workloads
P Triantafillou, S Christodoulakis and CA Georgiadis
High-dimensional similarity joins
K Shim, R Srikant and R Agrawal
Semiautomatic acquisition of semantic structures for understanding domain-specific natural language queries
HM Meng and KC Siu
A time-bound cryptographic key assignment scheme for access control in a hierarchy
WG Tzeng
Practical data-oriented microaggregation for statistical disclosure control
J Domingo-Ferrer and JM Mateo-Sanz
Finding and labeling the subject of a captioned depictive natural photograph
NC Rowe

IEEE Transactions on Pattern Analysis and Machine Intelligence

Vol. 23 No. 11
Articles
Color by correlation: A simple, unifying framework for color constancy
GD Finayson, SD Hordley and PM Hube
Fast approximate energy minimization via graph cuts
Y Boykov, O Veksler and R Zabih
Parameter-free geometric document layout analysis
SW Lee and DS Ryu
Eigen-texture method: Appearance compression and synthesis based on a 3D model
K Nishino, Y Sato and K Ikeuchi
Using photo-consistency to register 2D optical images of the human face to a 3D surface model
MJ Clarkson, D Rueckert, DLG Hill and DJ Hawkes
Edge, junction, and corner detection using color distributions
MA Ruzon and C Tomasi
Hierarchical decomposition of multiscale skeletons
G Borgefors, G Ramella and GS di Baja
Directional morphological filtering
P Soille and H Talbot
Tracking nonrigid motion and structure from 2D satellite cloud images without correspondences
L Zhou, C Kambhamettu, DB Goldgof, K Palaniappan and AF Hasler
Vol. 23 No. 12
Articles
Color invariance
JM Geusebroek, R van den Boomgaard, AWM Smeulders and H Geerts
Edge detection with embedded confidence
P Meer and B Georgescu
General scheme of region competition based on scale space
M Tang and SD Ma
Coarse-to-fine dynamic programming
C Raphael
Hyperpatches for 3D model acquisition and tracking
CS Wiles, A Maki and N Matsuda
Aircraft detection: A case study in using human similarity measure
B Kamgar-Parsi, B Kamgar-Parsi, AK Jain and JE Dayhoff
Data − and model-driven gaze control for an active-vision system
G Backer, B Mertsching and M Bollmann
Spatial size distributions: Applications to shape and texture analysis
G Ayala and J Domingo
Basic processes of Chinese character based on cubic B-spline wavelet transform
YY Tang, F Yang and JM Liu
A system for person-independent hand posture recognition against complex backgrounds
J Triesch and C von der Malsburg
Hidden Markov models with spectral features for 2D shape recognition
JH Cai and ZQ Liu
Shape from periodic texture using the eigenvectors of local affine distortion
E Ribeiro and ER Hancock

https://doi.org/10.1017/S0269888902000401 Published online by Cambridge University Press

Vol. 24 No. 1
Articles
Integrated position estimation using aerial image sequences
DG Sim, RH Park, RC Kim, SU Lee and IC Kim
The radiometry of multiple images
QT Luong, P Fua and YG Leclerc
Detecting faces in images: A survey
MH Yang, DJ Kriegman and N Ahuja
Piecewise linear skeletonization using principal curves
B Kegl and A Krzyak
Object tracking with Bayesian estimation of dynamic layer representations
H Tao, HS Sawhney and R Kumar
ICP registration using invariant features
GC Sharp, SW Lee and DK Wehe
Multihierarchical graph search
JA Fernandez-Madrigal and J Gonzalez
Reconstruction of three-dimensional objects through matching of their parts
G Papaioannou, EA Karabassi and T Theoharis
Optical flow in log-mapped image plane – A new approach
M Yeasin
Extraction and optimization of B-spline PBD templates for recognition of connected handwritten digit strings
ZK Lu, ZR Chi and WC Siu
A note on Park and Chin's algorithm
RF Hashimoto and J Barrera

IEEE Transactions on Robotics and Automation

Vol. 17 No. 5
Articles
Special Section on Semiconductor Manufacturing Systems: Modeling, Analysis, and Control
MD Jeng and X Xie
Queueing network models in the design and analysis of semiconductor wafer fabs
S Kumar and PR Kumar
Timed Petri nets in modeling and analysis of cluster tools
WM Zuberek
Modeling and analysis of semiconductor manufacturing systems with degraded behavior using Petri nets and siphons
MD Jeng and XL Xie
Production scheduling in a semiconductor wafer fabrication facility producing multiple product types with distinct due dates
YD Kim, JG Kim and HU Kim
Scheduling semiconductor wafer fabrication by using ordinal optimization-based simulation
BW Hsieh, CH Chen and SC Chang
An optimal periodic scheduler for dual-arm robots in cluster tools with residency constraints
S Rostami, B Hamidzadeh and D Camporese
Petri-net and GA-based approach to modeling, scheduling, and performance evaluation for wafer fabrication
JH Chen, LC Fu, MH Lin and AC Huang
Design of intelligent data sampling methodology based on data mining
JH Lee, SJ Yu and SC Park
Indirect adaptive control of reactive ion etching using neural networks
D Stokes and GS May
Avoiding deadlock and reducing starvation and blocking in automated manufacturing systems
NQ Wu and MC Zhou
Combining hybrid Petri nets and hybrid automata
AT Sava and H Alla
A curvature-based bound on the number of frictionless fingers required to immobilize three-dimensional objects
E Rimon
Photoplethysmograph fingernail sensors for measuring finger forces without haptic obstruction
SA Mascaro and HH Asada
Automatic decomposition of planned assembly sequences into skill primitives
H Mosemann and FM Wahl
A redundancy-based iterative approach for avoiding joint limits: Application to visual servoing
F Chaumette and E Marchand
The aiding of a low-cost strapdown inertial measurement unit using vehicle model constraints for land vehicle applications
G Dissanayake, S Sukkarieh, E Nebot and H Durrant-Whyte
Active global localization for a mobile robot using multiple hypothesis tracking
P Jensfelt and S Kristensen
Teleoperation assistance through variable velocity mapping
RV Dubey, SE Everett, N Pernalete and KA Manocha
Pseudoamplitude scan sonar maps
R Kuc
Vol. 17 No. 6
Articles
An integrated approach to disassembly planning and demanufacturing operation
Y Tang, MC Zhou and RJ Caudill
A discrete event systems modeling formalism based on event occurrence rules and precedences
V Chandra and R Kumar
Tool requirements planning in a flexible manufacturing system with an automatic tool transporter
YD Kim, GC Lee, SK Choi and SK Lim
Geometric approach and taboo search for scheduling flexible manufacturing systems
Y Mati, N Rezg and XL Xie
Deadlock avoidance for manufacturing systems with partially ordered process plans
Sulistyono W and MA Lawley
Automatic selection of fixturing surfaces and fixturing points for polyhedral workpieces
D Ding, YH Liu, MY Wang and SG Wang
Manipulator path planning by decomposition: Algorithm and analysis
A Hourtash and M Tarokh
Performance and H-infinity optimality of PID trajectory tracking controller for Lagrangian systems
YJ Choi, WK Chung and IH Suh
Impedance control for biped robot locomotion
JH Park
Determining planar location via complement-free de Bruijn sequences using discrete optical sensors
ER Scheinerman
Data association in Stochastic mapping using the joint compatibility test
J Neira and JD Tardos
The chaotic mobile robot
Y Nakamura and A Sekiguchi
Modeling and control of formations of nonholonomic mobile robots
JP Desai, JP Ostrowski and V Kumar
Multisensor fusion for simultaneous localization and map building
JA Castellanos, J Neira and JD Tardos
A feedback control scheme for reversing a truck and trailer vehicle
C Altafini, A Speranzon and B Wahlberg
Low-order-complexity vision-based docking
BW Minten, RR Murphy, J Hyams and M Micire
External force control for underwater vehicle-manipulator systems
G Antonelli, S Chiaverini and N Sarkar
Design and analysis of a sun sensor for planetary rover absolute heading detection

https://doi.org/10.1017/S0269888902000401 Published online by Cambridge University Press

A Trebi-Ollennu, T Huntsberger, Y Cheng, ET Baumgartner, B Kennedy and P Schenker
Formation constrained multi-agent control
M Egerstedt and XM Hu
Randomized path planning for linkages with closed kinematic chains
JH Yakey, SM LaValle and LE Kavraki
On the analysis of a new spatial three-degrees-of-freedom parallel manipulator
XJ Liu, JS Wang, F Gao and LP Wang
A note on the normal form of a spatial stiffness matrix
RG Roberts
Machine vision system for the automatic identification of robot kinematic parameters
P Rousseau, A Desrochers and N Krouglicof

International Journal of Computer Vision

Vol. 44 No. 2
Articles
Statistical modeling of colour data
DC Alexander and BF Buxton
Bayesian object localisation in images
J Sullivan, A Blake, M Isard and J MacCormick
Deformable pedal curves and surfaces: Hybrid geometric active models for shape recovery
BC Vemuri, YL Guo and ZZ Wang
Vol. 44 No. 3
Articles
Numerical shape-from-shading for discontinuous photographic images
J Kain and DN Ostrov
Biologically inspired visual motion detection in VLSI
R Etienne-Cummings
Characterizing depth distortion under different generic motions
LF Cheong and T Xiang
Optimization criteria and geometric algorithms for motion and structure estimation
Y Ma, J Kosecka and S Sastry
Vol. 45 No. 1
Articles
Histogram preserving image transformations
E Hadjidemetriou, MD Grossberg and SK Nayar
Statistical richness of visual phase information: Update on recognizing persons by iris patterns
J Daugman
A general method for geometric feature matching and model extraction
CF Olson
Symmetric shape-from-shading using self-ratio image
WY Zhao and R Chellappa
Vol. 45 No. 2
Articles
Saliency, scale and image description
T Kadir and M Brady
Self-calibration of rotating and zooming cameras
L Agapito, E Hayman and I Reid
Three-dimensional reconstruction of points and lines with unknown correspondence across images
YQ Cheng, XG Wang, RT Collins, EM Riseman and AR Hanson
Constructing a multivalued representation for view synthesis
NL Chang and A Zakhor
Vol. 45 No. 3
Articles
Video-based driver assistance-from basic functions to applications
W Enkelmann
Catadioptric projective geometry
C Geyer and K Daniilidis
A theoretical framework for convex regularizers in PDE-based computation of image motion
J Weickert and C Schnorr
Motion understanding: Task-directed attention and representations that link perception with action
JK Tsotsos
Vol. 46 No. 1
Articles
3D object recognition in cluttered environments by segment-based stereo vision
Y Sumi, Y Kawai, T Yoshimi and F Tomita
Estimation of 2D displacement field based on affine geometric invariance and scene constraints
JC Yao
On the consistency of instantaneous rigid motion estimation
T Zhang and C Tomasi
Statistical color models with application to skin detection
MJ Jones and JM Rehg
Vol. 46 No. 2
Articles
Cluster analysis of biomedical image time-series
A Wismuller, O Lange, DR Dersch, GL Leinsinger, K Hahn, B Putz and D Auer
Hierarchical estimation and segmentation of dense motion fields
E Memin and P Perez
New measurements and corner-guidance for curve matching with probabilistic relaxation
Y Shan and ZY Zhang

International Journal of Intelligent Systems

Vol. 16 No. 11
Articles
Merging regulations: Analysis of a practical example
F Cuppens, L Cholvy, C Saurel and J Carrere
Using the transferable belief model and a qualitative possibility theory approach on an illustrative example: The assessment of the value of a candidate
D Dubois, M Grabisch, H Prade and P Smets
The correlation problem in sensor fusion in a possibilistic framework
M Grabisch and H Prade
Information fusion in the context of stock index prediction
S Siekmann, R Kruse, J Gebhardt, F van Overbeek and R Cooke
Fusion of symbolic knowledge and uncertain information in robotics
C Sossai, P Bison and G Chemello
Vol. 16 No. 12
Articles
A new approach for stabilizing a TS model fuzzy system
DH Lin and MJ Er
An intelligent fuzzy sliding mode control system with application on precision table positioning
SC Lin, PY Huang and YY Chen
An artificial neural network satisfiability tester
T Tambouratzis
Properties and performance of orthogonal neural network in function approximation
CF Sher, CS Tseng and CS Chen
Designs and analyses of various fuzzy controllers with region-wise linear PID subcontrollers
CW Tao
Fusing object information and peer information
RR Yager and FE Petry

https://doi.org/10.1017/S0269888902000401 Published online by Cambridge University Press

Nearest prototype classifier designs: An experimental study
JC Bezdek and LI Kuncheva
Vol. 17 No. 1
Articles
A framework for defining and learning fuzzy behaviors for autonomous mobile robots
HM Barbera and AG Skarmeta
A fuzzy c-medians variant for the generation of fuzzy term sets
TW Liao
Using a neural network in the software testing process
M Vanmali, M Last and A Kandel
Analyzing the 24-hour blood pressure and heart-rate variability with self-organizing feature maps
G Tambouratzis, G Papakonstantinou, S Stamatelopoulos, N Zakopoulos and S Moulopoulos
Hybrid identification of fuzzy rule-based models
SK Oh, W Pedrycz and YJ Park

International Journal of Software Engineering and Knowledge Engineering

Vol. 11 No. 4
Special issue
Software architecture – Guest editor's introduction
R Kazman
Malleable services
V Vasudevan and S Landis
Software resource architecture
CM Woodside
Architecture-level dependence analysis for software systems
JA Stafford and AL Wolf
Viewpoints on modifiability
N Lassing, D Rijsenbrij and H Van Vliet
Applying case-based reasoning to support dynamic framework documentation
M Gomez-Albarran and PA Gonzalez-Calero
Vol. 11 No. 5
Articles
Guest editor's introduction: Agentization and coordination
H Tianfield
A dynamic inference model for intelligent agents
CY Miao, A Goh, Y Miao and ZH Yang
SLABS: A formal specification language for agent-based systems
H Zhu
Deliberative evolution in multi-agent systems
FMT Brazier, CM Jonker, J Treur and NJE Wijngaards
A quantitative and qualitative comparison of distributed information processing using mobile agents realised in RMI and Voyager
P Cogan, J Gomoluch and M Schroeder
An optimistic third party protocol to protect a mobile agent's binary code
D Westhoff
High performance service discovery in large-scale multi-agent and mobile-agent systems
JW Cao, DJ Kerbyson and GR Nudd

Journal of Intelligent & Robotic Systems

Vol. 31 Nos. 1–3
Articles
Guest editorial: Intelligent forecasting and control methodologies and industrial applications
SG Tzafestas
Computational intelligence techniques for short-term electric load forecasting
S Tzafestas and E Tzafestas
A Bayesian multiple models combination method for time series prediction
V Petridis, A Kehagias, L Petrou, A Bakirtzis, S Kiartzis, H Panagiotou and N Maslaris
Time series prediction and neural networks
RJ Frank, N Davey and SP Hunt
A hierarchical self-organizing map model in short-term load forecasting
OAS Carpinteiro and APA da Silva
Local regression-based short-term load forecasting
R Zivanovic
Forecasting electricity demand on short, medium and long time scales using neural networks
JV Ringwood, D Bofelli and FT Murray
Neural-wavelet methodology for load forecasting
R Gao and LH Tsoukalas
Forecasting and prediction applications in the field of power engineering
C Booth, JR Mcdonald and SDJ McArthur
A neural network system for patch load prediction
ET Fonseca, MMBR Vellasco, MAC Pacheco, PCGD Vellasco and SAL De Andrade
Recurrent neural supervised models for generating solar radiation synthetic series
L Hontoria, J Aguilera, J Riesco and P Zufiria
Forecasting of circuit-breaker behaviour in high-voltage electrical power systems: Necessity for future maintenance management
V Pitz, T Weber
Automated recurrent neural network design of a neural controller in a custom power device
B Cannas, G Celli, A Fanni and F Pilo
Adaptive feedback linearization using efficient neural networks
A Yesildirek and FL Lewis
Fuzzy predictive functional control in the state space domain
SkrjancI and MatkoD
A novel genetic algorithm and its application in fuzzy variable structure control of fuel cell
XJ Sun, GY Cao and XJ Zhu
Vol. 31 No. 4
Articles
Dynamic control of walking cycle with initiation process for humanoid robot
P Gorce, F El Hafi and JL Coronado
Estimation and compensation of gravity and friction forces for robot arms: Theory and experiments
M Liu and NH Quach
A PC-based simulator/controller/monitor software for a generic 6-DOF manipulator
TM Sobh, AA Abuzneid and R Mihali
Reactive visual navigation based on omnidirectional sensing – Path following and collision avoidance
Y Yagi, H Nagai, K Yamazawa and M Yachida
A theoretical approach of an intelligent robot gripper to grasp polygon shaped objects
R Abu-Zitar and AMA Nuseirat

https://doi.org/10.1017/S0269888902000401 Published online by Cambridge University Press

Evaluating user interface of multimodal teaching advisor implemented on a wearable personal computer
Y Yanagihara, S Muto and T Kakizaki
Vol. 32 No. 1
Articles
Structured learning and decomposition of fuzzy models for robotic control applications
G Vachkov and T Fukuda
3-d.OF wire driven planar haptic interface
P Gallina, G Rosati and A Rossi
SARA: A robotic system for cars fuelling
F Becchi, RC Michelini, RM Molfino and RP Razzoli
Motion planning for drift-free nonholonomic systems under a discrete levels control constraint
PG Skiadas and NT Koussoulas
A discrete method for time-optimal motion planning of a class of mobile robots
GY Liu and CJ Wu
ABC(2) an agenda based multi-agent model for robots control and cooperation
V Matellan and D Borrajo

Journal of Intelligent Manufacturing

Vol. 13 No. 1
Articles
Genetic programming approach to determining of metal materials properties
M Brezocnik, J Balic and K Kuzman
Constraint network analysis of 3-dimensional insertion tasks
RH Sturges and S Laowattana
Case-based retrieval of 3-dimensional shapes for the design of metal castings
T Mileman, B Knight, M Petridis, D Cowell and J Ewer
A case-based reasoning approach for automating disassembly process planning
P Veerakamolmal and SM Gupta
A modified genetic algorithm for the flow shop sequencing problem to minimize mean flow time
LX Tang and JY Liu

Journal of Symbolic Computation

Vol. 32 No. 5
Articles
Improved projection for cylindrical algebraic decomposition
CW Brown
Polynomial minimum root separation
GE Collins
Computing with quantized enveloping algebras: PBW-type bases, highest-weight modules and R-matrices
WA De Graaf
Normal forms for representations of representation-finite algebras
P Draxler
Computing projectors, injectors, residuals and radicals of finite soluble groups
B Hofling
Multivariate polynomial system solving using intersections of eigenspaces
HM Moller and R Tenberg
Factoring polynomials over local fields
S Pauli
Algorithms for the Gauss-Manin connection
M Schulze
Algebraic and symbolic manipulation of Poisson series
F San Juan and A Abad
Vol. 32 No. 6
Special issue on effective methods in rings of differential operators
Foreword
FJ Castro-Jimenez and JR Sendra
Minimal free resolutions of homogenized D-modules
T Oaku and N Takayama
Computing homomorphisms between holonomic D-modules
H Tsai and U Walther
Rank jumps in codimension 2 A-hypergeometric systems
LF Matusevich
Algorithm for computing Bernstein-Sato ideals associated with a polynomial mapping
R Bahloul
Constructibility of the set of polynomials with a fixed Bernstein-Sato polynomial: an algorithmic approach
A Leykin
Explicit comparison theorems for D-modules
FJ Castro-Jimenez and JM Ucha-Enriquez
Uq(sl(2)) satisfies a Bernstein duality
P Jara and J Jodar
Towards an effective version of a theorem of Stafford
A Hillebrand and W Schmale
Formal solutions of linear PDEs and convex polyhedra
F Aroca and J Cano

Knowledge-Based Systems

Vol. 14 No. 7
Articles
Making decisions: using Bayesian nets and MCDA
N Fenton and M Neil
Certainty-factor-like structures in Bayesian belief networks
PJF Lucas
Multiple representations as a platforms for situated learning systems in designing
JS Gero and RM Reffat
Construction of a fuzzy controller through width adaptation
JY Chen and CC Wong
Identifying potential synthesis cases in distributed expert systems: a fuzzy logic approach
MJ Zhang and W Li
A multi-agent monitoring and diagnostic system for TCP/IP-based network and its coordination
T Sugawara, K Murakami and S Goto
Specifying fault tolerance in mission critical intelligent systems
TS Perraju
A hybrid model for rule discovery in data
N Zhong, JZ Dong, CN Liu and S Ohsuga
Vol. 14 No. 8
Special issue
Semiotic approaches to user interface design
CS de Souza
What Semiotics can and cannot do for HCI
PB Andersen

https://doi.org/10.1017/S0269888902000401 Published online by Cambridge University Press

The new HCI? navigation of information space
D Benyon
Instrument semiotics: a semiotic approach to interface components
M May
One cannot not interact
M Nadin
Human-computer interaction viewed as pseudo-communication
F Nake and S Grabowski
What does the representation talk back to you?
K Nakakoji and Y Yamamoto
Towards a communication model applied to the interface design process
J Salles, MCC Baranauskas and RS Bigonha
A semiotic engineering approach to user interface design
CS de Souza, SDJ Barbosa and RO Prates

Kybernetes

Vol. 30 Nos. 7–8

Cybernetics and interviewing
J van der Zouwen
On the variety of imprecise probabilities
GJ Klir
Basic problems of economic cybernetics
M Manescu
Pansystems philosophy and its mathematical principles
XM Wu, XJ Feng and DH Guo
Backpropagation
AM Andrew
Heuristic economics – its cybernetic undertone
A Ghosal
Some aspects on modelling as a base for scientific recommendations
RW Grubbstrom
Economics and cybernetics
EP Billeter-Frey
Beyond state-of-the-art topology as normative ground for decison-making systems
W Pearlman
Fuzzy systems in cybernetics
CV Negoita
System concept modelling in human systems
M Mansour
Pockets of irrationality in an increasingly rational world – An effort to simplify unmanageable environmental over-complexity?
F Geyer
Optimization based on information containing uncertainties
HF Chen
A new formulation of Adomian method – Convergence result
K Abbaoui, MJ Pujol, Y Cherruault, N Himoun and P Grimalt
True parallel processing in artificial neural networks
AB Engel
Chemistry of belief – Experiments with doxastic solutions
A Adamatzky
System theory and cybernetics – A solid basis for transdisciplinarity in management education and research
M Schwaninger
Approximation of multiple integrals by simple integrals
A Benabidallah, Y Cherruault and Y Tourbier
Evolution of group consciousness – a cybernetic approach – Basis of an anthropological dating and forecasting technique
PK Roy and DD Majumder
"Control information" – The missing element in Norbert Wiener's cybernetic paradigm?
PA Corning
Virtual bodies and virtual spaces
JM Bishop
Syntax and first entropic approximation of L(M-T) – A language for ecological modelling
JL Uso-Domenech, P Sastre-Vazquez and J Mateu
Kinetics of the biphasic modulation of phagocytosis – A biochemical model from biocybernetic premises
B Kochel
Internet commentary
Emotions manage 2000
A Adamatzky

Machine Learning

Vol. 47 No. 1
Articles
Untitled
D Fisher
Maximum likelihood estimation of mixture densities for binned and truncated multivariate data
IV Cadez, P Smyth, GJ McLachlan and CE McLaren
A new nonparametric pairwise clustering algorithm based on iterative estimation of distance profiles
S Dubnov, R El Yaniv, Y Gdalyahu, E Schneidman, N Tishby and G Yona
Learning recursive bayesian multinets for data clustering by means of constructive induction
JM Pena, JA Lozano and P Larranaga
Bayesian clustering by dynamics
M Ramoni, P Sebastiani and P Cohen

Vol. 47 Nos. 2–3
Articles
Untitled – Introduction
J Kivinen
PAC analogues of perceptron and winnow via boosting the margin
R Servedio
Boosting methods for regression
N Duffy and D Helmbold
On the learnability and design of output codes for multiclass problems
K Crammer and Y Singer
Finite-time analysis of the multiarmed bandit problem
P Auer, N Cesa-Bianchi and P Fischer
Theory revision with queries: DNF formulas
J Goldsmith, RH Sloan and G Turan

New Generation Computing

Vol. 20 No. 1
Articles
Partial Evaluation and Program Transformation Day – Preface
R Gluck and Y Futamura
The narrowing-driven approach to functional logic program specialization
E Albert and G Vidal
Binding-time analysis for both static and dynamic expressions
K Asai
A unifying approach to goal-directed evaluation
O Danvy, B Grobauer and M Rhiger
Program transformation system based on Generalized Partial Computation
Y Futamura, Z Konishi and R Gluck
A portable approach to dynamic optimization in run-time specialization
H Masuhara and A Yonezawa
New trends in e-business: From B2B to Web Services
H Maruyama
