Validation of the name *Pertusaria pachythallina*

After revising the order *Pertusariales* in Tierra del Fuego (Messuti & Vobis 2002), Teuvo Ahti drew my attention to some nomenclatural problems concerning *Pertusaria pachythallina* (Räsänen) Messuti. This name was based on *Pertusaria grisea* var. *pachythallina* Räsänen. However, the new combination was invalidly published since the page of publication was not indicated (Art. 33.3, Ex 5 *ICBN* 2000) and the lectotypification originally performed by Lamb (in herb.) did not meet the Code requirements (Art. 7.11).

The correct nomenclature and typification are indicated below.

Pertusaria pachythallina (Räsänen) Messuti comb. nov.

Basionym: *Pertusaria grisea* var. *pachythallina* Räsänen, *Ann. Bot. Soc. Zool.-Bot. Fenn.* **2:** 28 (1932); type: Chile, "Fuegia occ., Mte. Buckland, 23.II.1929, *Roivanen*" s.n. (H—lectotype, designated here); Chile, "Fuegia occ., Fj. Martínez, Bahía Plüschow, 21.II.1929, *Roivanen*" s.n. (H—isolectotype).

For a description of this species see Messuti & Vobis (2002) and Messuti (2005).

The author wishes to express her deepest appreciation to Teuvo Ahti (Helsinki) for his critical reading of the manuscript and invaluable suggestions. Financial support by UNComahue (Grant B0118).
