BRITISH JOURNAL OF MUSIC EDUCATION

BJME is a fully refereed international journal which aims to provide clear, stimulating and readable accounts of contemporary research in music education worldwide, together with a section containing extended book reviews which further current debates. In particular, the journal strives to strengthen connections between research and practice, so enhancing professional development and improving practice within the field of music education. The range of subjects covers music teaching and learning in formal and informal contexts including classroom, individual, group and whole class instrumental and vocal teaching, music in higher education, international comparative music education, music in community settings, and teacher education. Contributors include researchers and practitioners from schools, colleges and universities. Where appropriate, we encourage authors to include supplementary sound files and other multimedia material. These accompany articles in electronic format on Cambridge Journals Online.

Peer review policy: Each manuscript is reviewed by at least two referees, and an editorial decision is generally reached within 8 to 12 weeks of submission.

BJME has been accepted for inclusion in the Thomson Reuters Arts & Humanities Citation Index and the Social Science Citation Index.
