Have you thought of subscribing?

Infection is a leading international journal tailored for the clinician that deals with the aetiology, diagnosis, pathogenesis and epidemiology of infection and infectious disease.

Infection encompasses modern diagnostics, patient-related mechanisms of infections, preventive measures including immuno-prophylaxis and immunosubstitutes. Changing and emerging pathogens and the different clinical course of diseases make it essential to obtain the latest information.

Infection originates in Europe and has an international staff and editorial board, which ensures the high quality of its peer-reviewed, original contributions.

B is an official publication of the German Society for Infectious Diseases and the Paul-Ehrlich-Society for Chemotherapy. It is regularly listed in Current Contents/Life Sciences, Current Contents/Clinical Medicine, Science Citation Index, MEDLARS and MEDLINE.

Prof. Dr. med. Walter Marget (University of Munich), founder and Editor-in-Chief.

A complete overview can only be gained by reading Infection regularly!

JUST PUSH THE BUTTON. AND SAFETY IS THE FIRST OUTCOME.

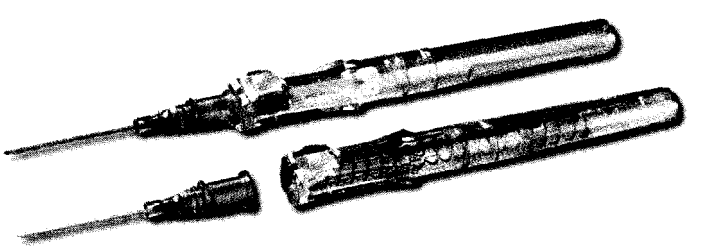

I N T R 0 D U C I N G

Insyte® AUTOGUARD™

SHIELDED I.V. CATHETER

Now automatic, push-button protection is at your fingertips. The new Insyte® AutoGuard™ provides advanced needlestick safety for you, plus the clinically superior performance of a Vialon® biomaterial catheter for your patient. With just one touch, Insyte AutoGuard instantly encases the needle in a tamper-resistant, transparent safety barrel. It's simple and automatic, requiring little change in technique, so training is easy and OSHA compliance is accelerated. The clinically superior Vialon catheter reduces the risk of related complications to give you longer indwelling times. And the patented catheter tip of Insyte AutoGuard assures a smooth, easy insertion, reducing pain and trauma to your patient. Insyte AutoGuard helps safeguard you while enhancing vascular access outcomes. And all you have to do is push the button...only on the new Insyte AutoGuard. For more information, contact your Becton Dickinson Vascular Access Specialist at 1-800-453-4538.

Reprints of Vialon clinical studies are available upon request. Insyte and Vialon are registered trademarks; AutoGuard and the Vialon design are trademarks of Becton Dickinson and Company. © 1995 Becton Dickinson and Company.

CONTROLLING AIRBORNE TB MICROORGANISMS CAN BE FAST, EFFICIENT AND AFFORDABLE

Lumalier™ provides a complete selection of germicidal UV-C including easily installed wolf, corner and ceiling mounted fixtures for upper room air irradiation. They're the result of Lumalier's 20 plus years UV design and manufacturing experience combined with input from leading public health officials. These fixtures offer attractive designs and state-of-the-art technology keyed to the needs of public health for safety, effectiveness, reliability, and cost. All fixtures meet NIOSH recommendations.

Lumalier also offers free engineering assistance. Just send us your floor layout and we'll provide an installation guide and fixture list.

For additional information about these fixtures and other Lumalier UV-C in-duct or air moving units, call or fax the number listed below.
