READINGS

in the SOCIOLOGY of LANGUAGE

edited by Joshua A. Fishman (Yeshiva University)

46 readings expressly selected to interest students in the language determinants, concomitants and consequences of social behavior.

Professor Fishman has selected papers dealing with language in small-group intersection, language in social strata and sectors, language reflections of socio-cultural organization, multilingualism, language maintenance and language shift, and the social contexts and consequences of language planning.

These categories represent "an approximation to a field which is in the process of conceptual and methodological development" and for which

ENGLISH
AN INTRODUCTION TO LANGUAGE

THOMAS PYLES, Northwestern University
JOHN ALGEO, University of Florida

Intended for the introductory course, this stimulating new textbook provides the background necessary for understanding how the English language functions and how it has evolved to its present state. The authors' aim is threefold: to survey the English language in all its aspects; to cover all major topics relating to English; and to provide a basic guide to the study of English linguistics. Clearly and effectively written, the book treats such important topics as English usage, the relationship of writing to speech, modern concepts of grammar, vocabulary, semantics and the literary uses of language, the uses of language in reasoning, and the historical development of English. Fresh and lively exercises are interspersed liberally throughout the book to reinforce the text presentation.

Paperbound. 416 pages, $4.50 (probable)
PUBLICATION: MARCH 1970

BY THE SAME AUTHORS

THE ORIGINS AND DEVELOPMENT OF THE ENGLISH LANGUAGE

THOMAS PYLES, Northwestern University

A detailed survey of the internal history of the English language, presented in a chronological treatment of its phonological and grammatical development from prehistoric times to the present.

388 pages. $8.50

PROBLEMS IN THE ORIGINS AND DEVELOPMENT OF THE ENGLISH LANGUAGE

JOHN ALGEO, University of Florida
THOMAS PYLES, Northwestern University

A stimulating workbook that requires the student to delve into a wide range of problems in phonology, morphology, syntax, lexicology, semantics, and graphemics, thereby helping him acquire a sound knowledge of the historical development of the English language. With Instructor's Key.

Paperbound. 274 pages. $4.95

SPECTS OF LANGUAGE

WIGHT BOLINGER, Harvard University

A clear, nontechnical presentation of the important topics in language study today, this book focuses on the structure and evolution of language and on the development of various modern linguistic theories. Professor Bolinger introduces the student to the science of linguistics, shows how the linguist interprets and evaluates his material, and indicates ways in which language shapes culture.

ROBLEMS IN THE STUDY OF LANGUAGE

XERCISES FOR *ASPECTS OF LANGUAGE*

AUL TAUBR and MANSOOR ALYESHMERNI, University of Minnesota

This new student manual provides practical experience in handling a broad selection of principles of language and linguistics. Each of the 14 chapters is geared to a corresponding chapter of *Aspects of Language* and contains specific exercises based on the chapter material. In addition, some chapters include readings from other sources to complement or add another dimension to Professor Bolinger's treatment of a subject. The various assignments include such interesting activities as writing the International Phonetic Alphabet, using the dictionary, devising pictographs and rebuses, and mapping dialect areas. An Answer Key will be available.

Paperbound. 352 pages, $3.25 (probable)

PUBLICATION: FEBRUARY 1970

Harcourt, Brace & World publishes an extensive list of titles in language and linguistics, including studies by such outstanding scholars and writers as ***Noam Chomsky, Paul Roberts, I. A. Richards, Archibald Hill, Edward Sapir,*** *and* ***Charles Carpenter Fries.*** *For detailed information on any of the language studies textbooks published by Harcourt, Brace & World, please write to the regional office nearest you.*

HRW OFFERS MORE IN

LINGUISTICS AND LITERARY STYLE
Donald C. Freeman, *University of Massachusetts*

A collection of essays which represent the major recent linguistic approaches to problems of literary interpretation and analysis, this work emphasizes the substantial recent contributions of transformational-generative grammarians to the analysis of literary prose, syntactic problems in poetry, metrics. It contains a review of the theoretical issues involved in linguistic approaches to the study of literature with representative offerings from structural, neo-Firthian, and transformational-generative linguistics. The book also includes the first English translation of an important theoretical study by Manfred Bierwisch, and reprints Paul Kiparsky's "Metrics and Morphophonemics in the Kalevala," an essay not generally available.

February 1970 384 pages $5.95 paper (tent.)

A SURVEY OF MODERN GRAMMARS
Jeanne H. Herndon, *Dominican College of San Rafael,* California

Designed to provide students with a broad grasp of fundamental grammatical principles, this simplified handbook treats traditional, structural, and transformation approaches to the problems of analyzing English grammar. As background information, sections on the history of the English language and of language scholarship are included. The philosophy, basic terminology and methods of each theory are covered, allowing instructors and students to make their own evaluations and comparisons. Each approach is explained in terms of its philosophical basis and how its methods were developed before its findings are discussed.

February 1970 192 pages $4.95 paper (tent.)

READINGS IN APPLIED TRANSFORMATIONAL GRAMMAR
Mark Lester, *University of Hawaii*

These 18 essays provide the beginning linguistics student or prospective English teacher with the background he needs to understand the impact that transformational grammar is having on the English curriculum. Assuming little previous knowledge of transformational grammar, these essays are intended for a general rather than technical audience. Each essay is accompanied by an introduction which paraphrases the main ideas and highlights the organization of the essay. Notes explaining technical linguistics terminology or concepts unclear from the context follow the essay.

LINGUISTICS...

ESSENTIALS OF ENGLISH GRAMMAR
D. Terence Langendoen, *Ohio State University*
The material in this text provides a thorough introduction to the principles of generative-transformational grammar and their application to the description and, by extension, to the teaching of English grammar. A brief introduction is followed by discussion of a language "game" which illustrates some of the interesting complexities of English syntax. The following chapters deal with "early" generative theory (as seen in Chomsky's *Syntactic Structures*), "later" generative grammatical theory, the properties of nominal expressions, and the nature of syntactic transformations. *(Answer Key)*

February 1970 — 192 pages — $6.96 paper (tent.)

New and Forthcoming additions to
TRANSATLANTIC SERIES IN LINGUISTICS

THE STUDY OF SYNTAX: The Generative-Transformational Approach to the Structure of American English
D. Terence Langendoen
This introductory study of the generative-transformational approach to American English syntax explores English grammar from two distinct theoretical vantage points: that of Chomsky's *Aspects of the Theory of Syntax,* and what may be called a neo-Chomskyan perspective.

July 1969 — 176 pages — $3.95 paper

INTRODUCTION TO TAGMEMIC ANALYSIS
Walter A. Cook, S. J., *Georgetown University*
This introduction to the tagmemic system of analysis is based on the theory proposed by Kenneth L. Pike. After briefly describing the inductive process, the author explains the tagmemic system and gives practical procedures for the formulation of grammatical structure at the sentence, clause, phrase, and word levels.

September 1969 — 224 pages — $3.95 paper

IRREGULARITY IN SYNTAX

CAMBRIDGE UNIVERSITY PRESS

Cambridge Studies in Linguistics

General Editors: W. SIDNEY ALLEN
EUGENIE J. A. HENDERSON
FRED W. HOUSEHOLDER
R. B. LE PAGE, JOHN LYONS
F. R. PALMER, J. L. M. TRIM

This is a new series of monographs and of high-level teaching material which also incorporates some element of original research or interpretation.

Topics include language-contact studies, new treatments (of methodological interest) of familiar languages, studies of unfamiliar languages, psycho- and socio-linguistics, treatments of topics of general and theoretical interest such as semantics and phonetics, and the new approaches to grammar.

The first two volumes, now published, are:

Prosodic Systems and Intonation in Englisl

DAVID CRYSTAL

A systematic linguistic description of such features as intona tion and stress, usually summed up in the phrase "tone of voice," paying special attention to English. The purpose is to describe as fully as possible and to clarify the theoretical concepts needed to talk precisely about these phenomena.

Dr Crystal reviews past work on prosodic features, then examines voice quality and sound attributes in prosodic study as a whole. Two chapters on English examine its prosodic features and intonation system, and two final chapters approach the grammar and semantics of intonation. Extensive bibliography. $16.00

Operators and Nucleus

A Contribution to the Theory of Grammar

PIETER A. M. SEUREN

Dr Seuren's study deals with the topical problem of presenting an adequate model of grammatical description.

The model he proposes conforms in its main outlines to the transformational generative grammar established by Chomsky, but deviates from it in certain important respects. The alterations proposed affect mainly that part of Chomsky's syntactic component which is known as the base and which generates basic, or deep, structures. Bibliography. $10.00

PUBLICATIONS

of the

Linguistic Society of America

LANGUAGE, the journal of the Linguistic Society of America, carries technical articles dealing with problems of linguistic science, reviews of recently published linguistic works, and notes of interest to professional linguists.

As supplements to LANGUAGE, the Linguistic Society of America issues two series of occasional publications, LANGUAGE MONOGRAPHS and LANGUAGE DISSERTATIONS. These are included in the subscription price of the journal, but may also be purchased separately. In the LANGUAGE MONOGRAPH series, the Society publishes independently subsidized studies which are too long to appear as articles or are otherwise unsuitable for publication in the journal. In the LANGUAGE DISSERTATION series, the Society publishes independently subsidized studies which have been accepted by American or foreign universities as doctoral dissertations, provided that they treat linguistic problems. The Society assumes no responsibility for the scholarly merit of these dissertations. The method of application for admission to either of these two series of supplements, and the terms of publication, may be secured from the Secretary of the Society.

SPECIAL PUBLICATIONS in the field of linguistic science are issued by the Society from time to time. These are not included in the subscription price of the journal.

A list of publications in print is available from the Secretary of the Society. Current prices for LANGUAGE are as follows: Complete volumes 1–28, $5.00, vols. 29–44, $8.00; vol. 45 onward, $16.00; single numbers from vols. 1–28, $1.75; vols. 29–44, $3.00; vol. 45 onward, $6.00. Reprint editions of volumes 1–38 of LANGUAGE, Monographs 1–21, and Dissertations 1–52 are available from Kraus Reprint Corporation, 16 East 46th Street, New York, N.Y. 10017, and a price list can be obtained from that address.
