The Knowledge Engineering Review, Vol. 17:3, 303–308

From the journals . . .

Applied Artificial Intelligence

Vol. 16 No. 4
Articles
User profiling for the Melvil knowledge retrieval system
J Furnkranz, C Holzbaur and R Temel
Mining a Web citation database for document clustering
Y He, SC Hui and ACM Fong
Machining process planning of prismatic parts using case-based reasoning and past process knowledge
HC Chang, WF Lu and FX Liu

Vol. 16 No. 5
Articles
Discovering causality in large databases
SC Zhang and ZG Zhang
Negotiation in a multi-agent system for construction claims negotiation
Z Ren, CJ Anumba and OO Ugwu
Improving biosignal processing through modeling uncertainty: Bayes vs, non-Bayes in sleep staging
P Sykacek, G Dorffner, P Rappelsberger and J Zeitlhofer

Applied Intelligence

Vol. 16 No. 3
Articles
Neural networks approach to the random walk dilemma of financial time series
R Sitte and J Sitte
Effective query size estimation using neural networks
HJ Lu and R Setiono
The supervised network self-organizing map for classification of large data sets
S Papadimitriou, S Mavroudi, L Vladutu, G Pavlides and A Bezerianos
Applying learning by examples for digital design automation
B Choi
Generalized radial basis function networks trained with instance based learning for data mining of symbolic data
S Papadimitriou, S Mavroudi, L Vladutu and A Bezerianos
Towards combinatorial analysis, adaptation, and planning of human-computer systems
MS Levin
Soft computing based pattern classifiers for the obstacle avoidance behavior of intelligent autonomous vehicles (IAV)
O Azouaoui and A Chohra
Vol. 17 No. 1
Articles
Guest editorial for special issue on scalable applications of neural networks to robotics
P van der Smagt and D Bullock
Searching a scalable approach to cerebellar based control
J Peters and P van der Smagt
A scalable model of cerebellar adaptive timing and sequencing: The recurrent slide and latch (RSL) model
BJ Rhodes and D Bullock
Scalable techniques from nonparametric statistics for real time robot learning
S Schaal, CG Atkeson and SV Vijayakumar
Modelling of complete robot dynamics based on a multi-dimensional, RBF-like neural architecture
M Krabbes and C Doschner
A scalable intelligent takeoff controller for a simulated running jointed leg
PI Doerschuk, V Nguyen and A Li
Evolving receptive-field controllers for mobile robots
R Salomon
A self-organizing context-based approach to the tracking of multiple robot trajectories
AFR Araujo and GD Barreto
Vol. 17 No. 2
Articles
An intelligent system combining different resource-bounded reasoning techniques
AI Mouaddib, E Gregoire and JF Dauchez
Neural and neuro-fuzzy integration in a knowledge-based system for air quality prediction
CD Neagu, N Avouris, E Kalapanidas and V Palade
Automatic extraction of eye and mouth fields from a face image using eigenfeatures and ensemble networks
YS Ryu and SY Oh
Using extended logic programming for alarm-correlation in cellular phone networks
CV Damasio, P Frohlich, W Nejdl, LM Pereira and M Schroeder
Fuzzy non-homogeneous Markov systems
MA Symeonaki, GB Stamou and SG Tzafestas

Artificial Intelligence

Vol. 137 Nos. 1–2
Articles
Combining topological and size information for spatial reasoning
A Gerevini and J Renz
Learning Bayesian networks from data: An information-theory based approach
J Cheng, R Greiner, J Kelly, D Bell and WR Liu
Diagnosis of discrete-event systems from uncertain temporal observations
G Lamperti and M Zanella
Parallel randomized Best-First Minimax Search
Y Shoham and S Toledo
A re-weighting strategy for improving margins
F Aiolli and A Sperduti
A hybrid graphical model for rhythmic parsing
C Raphael
Ensembling neural networks: Many could be better than all
ZH Zhou, JX Wu and W Tang

https://doi.org/10.1017/S0269888902000474 Published online by Cambridge University Press

Vol. 138 Nos. 1–2
Articles
Knowledge representation and logic programming
M Gelfond and N Leone
Logic programming and knowledge representation – The A-Prolog perspective
M Gelfond and N Leone
Answer set programming and plan generation
V Lifschitz
Fixed-parameter complexity in Al and nonmonotonic reasoning
G Gottlob, F Scarcello and M Sideri
LUPS – A language for updating logic programs
JJ Alferes, LM Pereira, H Przymusinska and TC Przymusinski
Preference Logic Grammars: Fixed point semantics and application to data standardization
BQ Cui and T Swift
Annotated revision programs
V Marek, I Pivkina and M Truszczynski
Extending and implementing the stable model semantics
P Simons, I Niemela and T Soininen

Artificial Intelligence Review

Vol. 17 No. 4
Evolutionary algorithms for multi-objective optimization: Performance assessments and comparisons
KC Tan, TH Lee and EF Khor
Problems in representing liquid tanks with monotonicity constraints: A case study in model-imposed limitations on the coverage of qualitative simulators
ACC Say

Engineering Applications of Artificial Intelligence

Vol. 14 No. 5
Articles
Continuous action reinforcement learning automata and their application to adaptive digital filter design
MN Howell and TJ Gordon
Reinforcement learning control of nonlinear multi-link system
IO Bucak and MA Zohdy
Adaptive reconstruction of free-form surfaces using Bernstein basis function networks
GK Knopf and J Kofman
An expert control system using neural networks for the electrolytic process in zinc hydrometallurgy
M Wu, JH She and M Nakano
KBS-aided design of tube bending processes
Z Jin, S Luo and XD Fang
Knowledge discovery from process operational data using PCA and fuzzy clustering
YM Sebzalli and XZ Wang
A new methodology for deriving the rule-base of a fuzzy logic controller with a new internal structure
I Eksin, M Guzelkaya and F Gurleyen
Intelligent control of a rotary kiln fired with producer gas generated from biomass
M Jarvensivu, E Juuso and O Ahava
Intelligent on-line quality control of washing machines using discrete wavelet analysis features and likelihood classification
S Goumas, M Zervakis, A Pouliezos and GS Stavrakakis
Reactive scheduling using a multi-agent model: the SCEP framework
B Archimede and T Coudert
Flexible real-time mobile robotic architecture based on behavioural models
H Hassan, J Simo and A Crespo
Vol. 14 No. 6
Articles
BBIPS: a blackboard-based integrated process supervision
KW Oh and C Quek
An agent-based learning framework for modeling microbial growth
S Katare and V Venkatasubramanian
Genetic programming: principles and applications
S Sette and L Boullart
A Pareto-optimal genetic algorithm for warehouse multi-objective optimization
PN Poulos, GG Rigatos, SG Tzafestas and AK Koukos
A heuristic search algorithm with lexicographic goals
L Mandow and JLP de la Cruz
Comparison of two inference methods for P-type fuzzy logic control through experimental investigation using a hydraulic manipulator
R Rahbari and CW de Silva
Design of a PID-like compound fuzzy logic controller
DD Kukolj, SB Kuzmanovic and E Levi
A comparison of model-based and neural network-based diagnostic methods
R Rengaswamy, D Mylaraswamy, KE Arzen and V Venkatasubramanian
Control of properties in injection molding by neural networks
S Kenig, A Ben-David, M Omer and A Sadeh
Artificial intelligence heuristics in solving vehicle routing problems with time window constraints
KC Tan, LH Lee and K Ou

Expert Systems With Applications

Vol. 22 No. 4
Articles
Intelligent agent-based systems for personalized recommendations in Internet commerce
WP Lee, CH Liu and CC Lu
Learning rules from incomplete training examples by rough sets
TP Hong, LH Tseng and SL Wang
An application of genetic algorithm methods for teacher assignment problems
YZ Wang
Rule induction in data mining: effect of ordinal scales
HM Moshkovich, AI Mechitov and DL Olson
A knowledge grid model and platform for global knowledge sharing
H Zhuge
Knowledge management system on flow and water quality modeling
KW Chau, C Chuntian and CW Li
Value management and common accounting performance measures for corporations
KS Kim

https://doi.org/10.1017/S0269888902000474 Published online by Cambridge University Press

Vol. 23 No. 1
Articles
Knowledge-based data mining of news information on the Internet using cognitive maps and neural networks
TH Hong and I Han
MACE: multi-agents coordination engine to resolve conflicts among functional units in an enterprise
OB Kwon and KC Lee
A knowledge flow model for peer-to-peer team knowledge sharing and management
H Zhuge
Learning discriminant functions with fuzzy attributes for classification using genetic programming
BC Chien, JY Lin and TP Hong
Computer systems that learn: an empirical study of the effect of noise on the performance of three classification methods
JR Nolan
Expert systems in finance – a cross-section of the field
L Nedovic and V Devedzic

International Journal of Computer Vision

Vol. 48 No. 2
Articles
Geotensity: Combining motion and lighting for 3D surface reconstruction
A Maki, M Watanabe and C Wiles
Self-calibration from image derivatives
T Brodsky and C Fermuller
Plenoptic image editing
SM Seitz and KN Kutulakos
Estimation of error in curvature computation on multi-scale free-form surfaces
F Mokhtarian, N Khalili and P Yuen
Construction of panoramic image mosaics with global and local alignment
HY Shum and R Szeliski
Vol. 48 No. 3
Articles
Omnivergent stereo
SM Seitz, A Kalai and HY Shum
Multi-frame correspondence estimation using subspace constraints
M Irani
A pupil-centric model of image formation
M Aggarwal and N Ahuja
Hamilton-Jacobi skeletons
K Siddiqi, S Bouix, A Tannenbaum and SW Zucker
Vision and the atmosphere
SG Narasimhan and SK Nayar

International Journal of Intelligent Systems

Vol. 17 No. 5
Special issue on hierarchical fuzzy systems
Introduction
V Torra
Fuzzy behavior hierarchies for multi-robot control
E Tunstel, MAA de Oliveira and S Berman
On the role of context in hierarchical fuzzy controllers
L Magdalena
A structure identification method of submodels for hierarchical fuzzy modeling using the multiple objective genetic algorithm
K Tachibana and T Furuhashi
Hierarchical fuzzy modeling and jointly expandable functions
H Kikuchi and N Takagi
A review of the construction of hierarchical fuzzy systems
V Torra
Vol. 17 No. 6
Articles
Formal semantics of meta-level architectures: Dynamic control of reasoning
J Treur
The uncertain OWA operator
ZS Xu and QL Da
Implied trees in illiquid markets: A Choquet pricing approach
S Muzzioli and C Torricelli
Tracking a partially occluded target with a cluster of Kalman filters
DS Jang, SW Jang and HI Choi
Storage of linguistic information in a continuous classifying associative memory
AB Bailon, M Delgado and W Fajardo
Vol. 17 No. 7
Articles
Applying a fuzzy sets-based heuristic to the protein structure prediction problem
A Blanco, DA Pelta and JL Verdegay
Semantic formalization of interactive reasoning functionality
J Treur
On the valuation of alternatives for decision-making under uncertainty
RR Yager
The ordered weighted geometric averaging operators
ZS Xu and WL Da

International Journal of Software Engineering and Knowledge Engineering

Vol. 12 No. 1
Articles
Binary encoding of discernibility patterns to find minimal coverings
R Felix and T Ushio
Use case patterns
LW Li
A compositional knowledge level process model of Requirements Engineering
DE Herlea, CM Jonker, J Treur and NJE Wijngaards
Evaluating theories for managing imperfect knowledge in human-centric database reengineering environments
JH Jahnke and A Walenstein

https://doi.org/10.1017/S0269888902000474 Published online by Cambridge University Press

Journal of Intelligent & Robotic Systems

Vol. 33 No. 3
Articles
Planning of regrasping operations for a dextrous hand in assembly tasks
DR Rapela, U Rembold and B Kuchen
Three-dimensional robotic vision using ultrasonic sensors
JR Llata, EG Sarabia and JP Oria
A fast parallel algorithm for convex hull problem of multi-leveled images
O Bouattane, J Elmesbahi and A Rami
Parameter tuning of stable fuzzy controllers
JY Dieulot and P Borne
Self-tuning of the fuzzy inference rule by integrated method
MR Lee, H Rhee, KD Cho and BJ Cho
On the measurement of enterprise agility
NC Tsourveloudis and KP Valavanis
Vol. 33 No. 4
Articles
The design and role of synthetic creative traits in artificial ant colonies
PS Heck and S Ghosh
Detection, tracking and avoidance of multiple dynamic objects
KM Krishna and PK Kalra
Geometrical analysis of two sets of 3D correspondence data patterns for the registration of free-form shapes
YH Liu and MA Rodrigues
Robotic intelligence for industrial automation: Object flaw auto detection and pattern recognition by object location searching, object alignment, and geometry comparison
CL Su
Vol. 34 No. 1
Articles
A new conceptual approach to the design of hybrid control architecture for autonomous mobile robots
H Yavuz and A Bradshaw
DECM, a user oriented formalism for high level discrete event specifications of real-time systems
JL Paillet and N Giambiasi
Color segmentation applied to study of the angiogenesis. Part I
RM Rodriguez, TE Alarcon, RW Navarro and LS Cuello
Building 3-D visual perception of a mobile robot employing extended Kalman filter
S Patnaik, A Konar and AK Mandal
Vol. 34 No. 2
Articles
Internet-based robotic system using CORBA as communication architecture
SM Jia and K Takase
A genetic algorithm for mobile robot localization using ultrasonic sensors
L Moreno, JM Armingol, S Garrido, A de la Escalera and MA Salichs
Enhancement of probabilistic grid-based map for mobile robot applications
KM Chow, AB Rad and YL Ip
Design and implementation of fuzzy parallel-parking control for a car-type mobile robot
SJ Chang and THS Li
Kalman filter approach for lane extraction and following
M Oussalah, A Zaatri and H Van Brussel
Prediction of critical desalination parameters using radial basis functions networks
MM Jafar and A Zilouchian
Vol. 34 No. 3
Articles
Editorial: Medical & rehabilitation robotics
S Tzafestas
Mobile robot command by man-machine co-operation – Application to disabled and elderly people assistance
P Hoppenot and E Colle
An overview of the development of Handy 1. a rehabilitation robot to assist the severely disabled
M Topping
Fixation devices for long bone fracture reduction: An overview and new suggestions
R Di Gregorio and V Parenti-Castelli
Wheelchair guidance strategies using EOG
R Barea, L Boquete, M Mazo and E Lopez
A wheelchair steered through voice commands and assisted by a reactive fuzzy-logic controller
G Pires and U Nunes
Semi-autonomous navigation of a robotic wheelchair
A Argyros, P Georgiadis, P Trahanias and D Tsakiris

Journal of Intelligent Manufacturing

Vol. 13 No. 3
Articles
Automatic inspection for phase-shift reflection defects in aluminum web production
F Torres, LM Jimenez, FA Candelas, JM Azorin and RJ Agullo
A novel disassembly tool with screwnail endeffectors
BR Zuo, A Stenzel and G Seliger
Application of artificial neural network and fuzzy logic in a case-based system for initial process parameter setting of injection molding
SL Mok and CK Kwong
Evaluation of expert systems for automatic shape recognition by ultrasound
JR Llata, EG Sarabia and JP Oria
Digitizing uncertainty modeling for reverse engineering applications: regression versus neural networks
CX Feng and XF Wang
Agent-based material handling and inventory planning in warehouse
T Ito and SMMJ Abadi
Mean shifts detection and classification in multivariate process: a neural-fuzzy approach
TY Wang and LH Chen
Vol. 13 No. 4
Articles
Manufacturing cost estimation for machined parts based on manufacturing features
JY Jung
A matrix formulation for integrating assembly trees and manufacturing resource planning with capacity constraints
B Harris, F Lewis and DJ Cook
Expert systems in production planning and scheduling: A state-of-the-art survey
KS Metaxiotis, D Askounis and J Psarras
A hybrid PC/PLC architecture for manufacturing-system control-theory and implementation
A Ramirez-Serrano, SC Zhu, SKH Chan, SSW Chan, M Ficocelli and B Benhabib
Rotating machine fault detection based on HOS and artificial neural networks
CC Wang and GPJ Too
Extending IDEF1X to model fuzzy data
ZM Ma, WJ Zhang and WY Ma
Optimizing modular product design for reconfigurable manufacturing
AS Yigit, AG Ulsoy and A Allahverdi

https://doi.org/10.1017/S0269888902000474 Published online by Cambridge University Press

Journal of Machine Learning Research

Vol. 1 No. 2
Articles
SVMTorch: Support Vector Machines for Large-Scale Regression Problems
R Collobert and S Bengio
Vol. 1 No. 3
Articles
Lagrangian Support Vector Machines
OL Mangasarian and DR Musicant
Vol. 1 No. 6
Articles
Regularized Principal Manifolds
AJ Smola, S Mika, B Schoelkopf and C Williamson
Sparse Bayesian Learning and the Relevance Vector Machine
ME Tipping
Vol. 1 No. 8
Articles
Bayes Point Machines
R Herbrich, T Graepel and C Campbell
Vol. 1 No. 9
Articles
Tracking the Best Linear Predictor
M Herbster and MK Warmuth
Prior Knowledge and Preferential Structures in Gradient Descent Learning Algorithms
RE Mahony, RC Williamson
Vol. 1 No. 10
Articles
Learning with Mixtures of Trees
M Meila and MI Jordan
Dependency Networks for Inference, Collaborative Filtering, and Data Visualization
D Heckerman, D Maxwell Chickering, C Meek, R Rounthwaite and C Kadie
Vol. 1 No. 11
Articles
Learning Evaluation Functions to Improve Optimization by Local Search
J Boyan and AW Moore
Vol. 1 No. 12
Articles
Reducing Multiclass to Binary: A Unifying Approach for Margin Classifiers
EL Allwein, RE Schapire and Y Singer
Vol. 2 No. 2
Articles
Recommender Systems Using Linear Classifiers
T Zhang and VS Iyengar
Machine Learning with Data Dependent Hypothesis Classes
A Cannon, JM Ettinger, D Hush and C Scovel
On Using Extended Statistical Queries to Avoid Membership Queries
NH Bshouty and V Feldman
The Learning-Curve Sampling Method Applied to Model-Based Clustering
C Meek, B Thiesson and D Heckerman
Text Classification using String Kernels
H Lodhi, C Saunders, J Shawe-Taylor, N Cristianini and C Watkins
Learning Equivalence Classes of Bayesian-Network Structures
DM Chickering
Vol. 2 No. 3
Articles
Stability and Generalization
O Bousquet and A Elisseeff
Covering Number Bounds of Certain Regularized Linear Function Classes
T Zhang
Introduction to Special Issue on Machine Learning Approaches to Shallow Parsing
J Hammerton, M Osborne, S Armstrong and W Daelemans
Memory-Based Shallow Parsing
EF Tjong Kim Sang
Shallow Parsing using Specialized HMMs
A Molina and F Pla
Text Chunking based on a Generalization of Winnow
T Zhang, F Damerau and D Johnson
Shallow Parsing with PoS Taggers and Linguistic Features
B Megyesi
Learning Rules and Their Exceptions
H Dejean
Shallow Parsing using Noisy and Non-Stationary Training Material
M Osborne
Round Robin Classification
J Fürnkranz
Vol. 2 No. 10
Articles
On the Size of Convex Hulls of Small Sets
S Mendelson
Graph-Based Hierarchical Conceptual Clustering
I Jonyer, DJ Cook, LB Holder
Vol. 2 No. 11
Articles
Support Vector Machine Active Learning with Applications to Text Classification
S Tong, D Koller
On the Influence of the Kernel on the Consistency of Support Vector Machines
I Steinwart
Vol. 2 No. 12
Articles
Introduction to the Special Issue on Kernel Methods
N Cristianini, J Shawe-Taylor and RC Williamson
Kernel Partial Least Squares Regression in Reproducing Kernel Hilbert Space
R Rosipal and LJ Trejo
Support Vector Clustering
A Ben-Hur, D Horn, HT Siegelmann and V Vapnik
One-Class SVMs for Document Classification
LM Manevitz and M Yousef
Uniform Object Generation for Optimizing One-class Classifiers
DMJ Tax and RPW Duin
A Generalized Kernel Approach to Dissimilarity-based Classification
E Pekalska, P Paclik and RPW Duin
A New Approximate Maximal Margin Classification Algorithm
C Gentile
Efficient SVM Training Using Low-Rank Kernel Representations
S Fine and K Scheinberg
On the Algorithmic Implementation of Multiclass Kernel-based Vector Machines
K Crammer and Y Singer
Exact Simplification of Support Vector Solutions
T Downs, KE Gates and A Masters
Classes of Kernels for Machine Learning: A Statistics Perspective

Knowledge-Based Systems

Vol. 15 No. 4
Special issue on biological knowledge discovery and data mining
Foreword
M Elloumi
A data mining approach based on machine learning techniques to classify biological sequences
M Maddouri and M Elloumi
Mining DNA sequences to predict sites which mutations cause genetic diseases
J Ponomarenko, T Merkulova, G Orlova, O Fokin, E Gorshkov and M Ponomarenko
A data mining approach to discover genetic and environmental factors involved in multifactorial diseases
L Jourdan, C Dhaenens, EG Talbi and S Gallina
A data mining approach to discover unusual folding regions in genome sequences
SY Le, WM Liu and JV Maizel
Data mining and knowledge discovery in proton nuclear magnetic resonance (H-1-NMR) spectra using frequency to information transformation (FIT)
H Valafar and F Valafar
Vol. 15 Nos. 5–6
Special issue
Untitled
M Bramer
Detecting mismatches among experts ontologies acquired through knowledge elicitation
A Hameed, D Sleeman and A Preece
A database architecture for reusable CommonKADS agent specification components
DJ Allsopp, A Harrison and C Sheppard
Integrating AI planning techniques with workflow management system
MDR Moreno and P Kearney
The inseparability problem in interactive case-based reasoning
D McSherry
Using J-pruning to reduce overfitting in classification trees
M Bramer
Going beyond stemming: creating concept signatures of complex medical terms
T Kurz and K Stoffel
Finite element mesh design expert system
B Dolsak
SMART software for decision makers KDD experience
G Oatley, J MacIntyre, B Ewart and E Mugambi
Residential property price time series forecasting with neural networks
ID Wilson, SD Paris, JA Ware and DH Jenkins
When eigenfaces are combined with wavelets
B Li and YH Liu
Automated control of an actively compensated Langmuir probe system using simulated annealing
L Nolle, A Goodyear, AA Hopgood, PD Picton and NS Braithwaite

https://doi.org/10.1017/S0269888902000474 Published online by Cambridge University Press
