AI Magazine

Vol. 22 No. 1
Articles
RoboCup-2000 – The Fourth Robotic Soccer World Championships
P Stone, M Asada, T Balch, R D'Andrea, M Fujita, B Hengst, G Kraetzschmar, P Lima, N Lau, H Lund, D Polani, P Scerri, S Tadokoro, T Weigel and G Wyeth
RoboCup Rescue – A grand challenge for multiagent and intelligent systems
H Kitano and S Tadokoro
Reaper: A reflexive architecture for perceptive agents
BA Maxwell, LA Meeden, NS Addo, P Dickson, N Fairfield, N Johnson,EG Jones, S Kim, P Malla, M Murphy, B Rutter and E Silk
The 2000 AAAI Mobile Robot Competition and Exhibition
AC Schultz
A new direction in AI – Toward a computational theory of perceptions
LA Zadeh
Language-based interfaces and their application for cultural tourism
O Stock
A call for knowledge-based planning
DE Wilkins and M desJardins

Applied Artificial Intelligence

Vol. 15 No. 1
Articles
Editorial: Why coordination models and languages in AI?
A Omicini and GA Papadopoulos
Safe tuplespace-based coordination in multiagent systems
NH Minsky, V Ungureanu and YM Minsky
XML dataspaces for the coordination of Internet agents
G Cabri, L Leonardi and F Zambonelli
A coordination language for collective agent-based systems: GroupLog
F Barbosa and JC Cunha
Control-driven constraint propagation
E Monfroy
Vol. 15 No. 2
Articles
A hybrid case-based model for forecasting
JM Corchado and B Lees
Large scale data mining based on data partitioning
SC Zhang and XD Wu
Decode to channel binary block codes based on neural networks and genetic algorithm
YJ Zheng, XY Tang and DBH Tay
Lessons learned deploying space planning systems
S Chien, T Estlin, F Fisher and G Rabideau
A mean field neural network mechanizing complex causal reasoning problems
L BenRomdhane
Cooperating air traffic control agents
G Nitschke
Vol. 15 No. 3
Articles
Qualitative navigation for mobile robots in indoor environments
NM Sgouros
Towards a more consistent and comprehensive evaluation of anaphora resolution algorithms and systems
R Mitkov
Intelligent trajectory control using recurrent averaging learning
JG Juang
Agents for case-based software reuse
SI Morisbak and B Tessem
An abductive-based scheduler for air-crew assignment
AC Kakas and A Michel
Vol. 15 No. 4
Articles
Genetic clustering: An adaptive heuristic for the multidepot vehicle routing problem
SR Thangiah and S Salhi
Assessing the performance of a waste characterization expert system
J Hodges, S Bridges, C Sparrow, G Weerakkody, B Tang, C Jun and J Luo
Adaptive exception monitoring agents for management by exceptions
RL Liu, MJ Shih and YF Kao
Statistical analysis of vehicles' vibration due to road roughness using radial basis artificial neural network
S Yildirim and I Uzmay

Applied Intelligence

Vol. 14 No. 1
Articles
Introduction: Interactive case-based reasoning
DW Aha and H Munoz Avila
Conversational case-based reasoning
DW Aha, LA Breslow and H Munoz Avila
ExpertGuide: A conversational case-based reasoning tool for developing mentors in knowledge spaces
H Simazu, A Shibata and K Nihei
Enhancing the effectiveness of interactive case-based reasoning with clustering and decision forests
Q Yang and J Wu
Interactive case-based reasoning in sequential diagnosis
D McSherry
A case-based framework for interactive capture and reuse of design knowledge
DB Leake and DC Wilson
An interactive visualisation tool for case-based reasoners
E McKenna and B Smyth
An interactive case-based reasoning approach for generating expressive music
JL Arcos and RL DeMantaras

https://doi.org/10.1017/S0269888901000121 Published online by Cambridge University Press

Vol. 14 No. 2
Articles
An agent-based approach for scheduling multiple machines
R Akkiraju, P Keskinocak, S Murthy and F Wu
Computer generated holograms for optical neural networks
K Kaikhah and F Loochan
Modelling a society of simple agents: From conceptual specification to experimentation
FMT Brazier, PAT van Eck and J Treur
MDS: An integrated architecture for associational and model-based diagnosis
XDW Yu, G Biswas and J Weinberg
Index navigator: Search engine with reasoning for understanding and expressing user's changing mind
Y Ohsawa
Model-based diagnosis and conditional logic
N Obeid

Artificial Intelligence

Vol. 124 No. 2
Articles
Default reasoning from conditional knowledge bases: Complexity and tractable cases
T Eiter and T Lukasiewicz
A comparison of structural CSP decomposition methods
G Gottlob, N Leone and F Scarcello
The complexity of approximating MAPs for belief networks with bounded probabilities
AM Abdelbar, ST Hedetniemi and SM Hedetniemi
Vol. 125 Nos. 1–2
Articles
A sufficiently fast algorithm for finding close to optimal clique trees
A Becker and D Geiger
Formalizing sensing actions – A transition function based approach
TC Son and C Baral
Topological parameters for time-space tradeoff
R Dechter and El-Y Fattah
Blocks World revisited
J Slaney and S Thiebaux
Symbolic knowledge extraction from trained neural networks: A sound approach
ASD Garcez, K Broda and DM Gabbay
Robust Bayes classifiers
M Ramoni and P Sebastiani
Vol. 126 Nos. 1–2
Articles
Computational tradeoffs under bounded resources
E Horvitz and S Zilberstein
Recursive conditioning
A Darwiche
Algorithm portfolios
CP Gomes and B Selman
Optimal schedules for monitoring anytime algorithms
L Finkelstein and S Markovitch
Iterative state-space reduction for flexible computation
WX Zhang
Monitoring and control of anytime algorithms: A dynamic programming approach
EA Hansen and S Zilberstein
Principles and applications of continual computation
E Horvitz

Artificial Intelligence Review

Vol. 14 No. 6
Articles
PLANMINE: Predicting plan failures using sequence mining
MJ Zaki, N Lesh and M Ogihara
Intelligent data analysis for protein disorder prediction
P Romero, Z Obradovic and AK Dunker
Automated cellular modeling and prediction on a large scale
P Datta, B Masand, DR Mani and B Li
Techniques and experience in mining remotely sensed satellite data
TH Hinke, J Rushing, H Ranganath and SJ Graves
Adaptive intrusion detection: A data mining approach
WK Lee, SJ Stolfo and KW Mok
Customer retention via data mining
K Ng and H Liu
Vol. 15 No. 1
Articles
Introduction – Thinking with diagrams
AF Blackwell
The graphic-linguistic distinction – Exploring alternatives
A Shimojima
Aligning logical and psychological perspectives on diagrammatic reasoning
K Stenning and O Lemon
Diagrammatic reasoning: An artificial intelligence perspective
P Olivier
Cognitive science approaches to understanding diagrammatic representations
PC Cheng, RK Lowe and M Scaife
Cognitive factors in programming with diagrams
AF Blackwell, KN Whitley, J Good and M Petre
Learning to think and communicate with diagrams: 14 questions to consider
P Brna, R Cox and J Good
Thinking with diagrams in architectural design
EYL Do and MD Gross

Computers and Artificial Intelligence

Vol. 19 No. 5
Articles
Self-stabilizing depth-first token circulation in asynchronous message-passing systems
F Petit and V Villain
Function oriented history representation in databases
L Kovacs and C Vassilakis
A new BFS parent array encoding of t-ary trees
SG Akl, S Olariu and I Stojmenovic
Analytical model of distributed computer network
I Hanuliak
Abstract and-parallel machines
N Lindenstrauss and N Dershowitz
Vol. 19 No. 6
Articles
Testing and debugging of distributed software
JC Cunha and H Krawczyk
Execution replay and debugging of distributed multi-threaded parallel programs
JC deKergommeaux, M Ronsse and De-K Bosschere
Testable environments of distributed objects
B Wiszniewski

https://doi.org/10.1017/S0269888901000121 Published online by Cambridge University Press

Adaptive distributed breakpoint detection and checkpoint space reduction in message passing programs
CR Dow and CM Lin

Incremental tracing and process isolation for debugging parallel programs
D Kranzlmuller

Engineering Applications of Artificial Intelligence

Vol. 14 No. 1
Articles

Genetic adaptive control for an inverted wedge: experiments and comparative analyses
ML Moore, JT Musacchio and KM Passino

An integrated neural-fuzzy-genetic-algorithm using hyper-surface membership functions to predict permeability in petroleum reservoirs
YT Huang, TD Gedeon and PM Wong

A qualitative shape analysis formalism for monitoring control loop performance
R Rengaswamy, T Hagglund and V Venkatasubramanian

A methodology for document processing: separating text from images
NG Bourbakis

Image matching with fuzzy moment descriptors
B Biswas, A Konar and AK Mukherjee

An artificial neural network approach for routing in distributed computer networks
S Pierre, H Said and WG Probst

Knowledge-based approach and system for assembly oriented design, Part I: the approach
XF Zha, HJ Du and JH Qiu

A predictive system for blast furnaces by integrating a neural network with qualitative analysis
J Chen

Disturbance aspects of iterative learning control
M Norrlof and S Gunnarsson

A new signature verification technique based on a two-stage neural network classifier
H Baltzakis and N Papamarkos

Vol. 14 No. 2
Articles

On the modelling of nonlinear dynamic systems using support vector neural networks
WC Chan, CW Chan, KC Cheung and CJ Harris

Neural-network-based self-organized fuzzy logic control for arc welding
L Di, T Srikanthan, RS Chandel and I Katsunori

Perception network for the team of indoor mobile robots: concept, architecture, implementation
A Kasinski and P Skrzypczynski

PNNARMA model: an alternative to phenomenological models in chemical reactors
IM Galvan, P Isasi and JM Zaldivar

Inductive learning of decision trees: application to fault isolation of an induction motor
D Pomorski and PB Perche

Evolutionary algorithms, simulated annealing and tabu search: a comparative study
H Youssef, SM Sait and H Adiche

Design and analysis of fuzzy schedulers using fuzzy Lyapunov synthesis
M Margaliot and G Langholz

Fuzzy logic-based forecasting model
T Frantti and P Mahonen

CAD for fault tree-based diagnosis of industrial processes
M Kavcic and D Juricic

A strategy for diagnosing complex multiple-fault situations with a higher accuracy/cost ratio
D Rozier

The use of a heuristic search technique for the optimization of quality of steel billets produced by continuous casting
N Cheung and A Garcia

Knowledge-based approach and system for assembly-oriented design, Part II: the system implementation
XF Zha, HJ Du and JH Qiu

A preliminary study on qualitative and imprecise solid modelling for conceptual shape modelling
HL Shu, JH Liu and YF Zhong

Expert Systems With Applications

Vol. 20 No. 1
Articles

Knowledge management and its link to artificial intelligence
J Liebowitz

Expert systems for knowledge management: crossing the chasm between information processing and sense making
Y Malhotra

Intelligent lessons learned systems
R,Webe, DW Aha and I Becerra Fernandez

Intellectual capital: from intangible assets to fitness landscapes
B Kitts, L Edvinsson and T Beding

Software agents for knowledge management: coordination in multi-agent supply chains and auctions
DJ Wu

Multiagent-based knowledge networks
JL Aguirre, R Brena and FJ Cantu

The knowledge chain model: activities for competitiveness
CW Holsapple and M Singh

Vol. 20 No. 2
Articles

On-line industrial supervision and diagnosis, knowledge level description and experimental results
CA Gonzalez, BP Junquera, GA Lazo and CL Bello

A new intelligent SOFM-based sampling plan for advanced process control
JH Lee, SJ You and SC Park

An easy-maintenance, reusable approach for building knowledge-based systems: application to landscape assessment
R MartinezBejar, F IbanezCruz, P Compton and TM Cao

Pattern development for vessel accidents: a comparison of statistical and neural computing techniques
LA LeBlanc, RR Hashemi and CT Rucks

Knowledge-based models for emergency management systems
JZ Hernandez and JM Serrano

Mixed-initiative synthesized learning approach for web-based CRM
ST Yuan and WL Chang

Improving the performance of neural networks in classification using fuzzy linear regression
CH Cheng, BT Low, PK Chan and J Motwani

Incremental fuzzy supervisory controller design for optimizing the injection molding process
GA Vagelatos, GG Rigatos and SG Tzafestas

Lessons learned from developing a mission-critical expert system with multiple experts through rapid prototyping
PC Bloom and QB Chung

https://doi.org/10.1017/S0269888901000121 Published online by Cambridge University Press

IEEE Transactions on Knowledge and Data Engineering

Vol. 13 No. 1
Articles
Introducing the new Editor-in-Chief of the IEEE Transactions on Knowledge and Data Engineering
FB Bastani
Untitled
PS Yu
Guest editorial introduction to the special section on the 16th International Conference on Data Engineering
DB Lomet and G Weikum
Automating statistics management for query optimizers
S Chaudhuri and V Narasayya
A foundation for conventional and temporal query optimization addressing duplicates and ordering
G Slivinskas, CS Jensen and RT Snodgrass
DEMON: Mining and monitoring evolving data
V Ganti, J Gehrke and R Ramakrishnan
Finding interesting associations without support pruning
E Cohen, M Datar, S Fujiwara, A Gionis, P Indyk, R Motwani, JD Ullman and C Yang
Multiple similarity queries: A basic DBMS operation for mining in metric databases
B Braunmuller, M Ester, HP Kriegel and J Sander
On the "dimensionality curse" and the "self-similarity blessing"
F Korn, BU Pagel and C Faloutsos
Adlet: An active document abstraction for multimedia information fusion
SK Chang, T Znati
Analysis of the clustering properties of the Hilbert space-filling curve
B Moon, HV Jagadish, C Faloutsos and JH Saltz

IEEE Transactions on Neural Networks

Vol. 12 No. 1
Articles
Approximation of nonlinear systems with radial basis function neural networks
RJ Schilling, JJ Carroll and AF AlAjlouni
Nonlinear kernel-based statistical pattern analysis
A Ruiz and PE Lopez-deTeruel
Adaptive structures with algebraic loops
MM Lamego
A hybrid learning scheme combining EM and MASMOD algorithms for fuzzy local linearization modeling
Q Gan and CJ Harris
Neural network-based adaptive controller design of robotic manipulators with an observer
FC Sun, ZQ Sun and PY Woo
Hybrid supervisory control using recurrent fuzzy neural network for tracking periodic inputs
FJ Lin, RJ Wai and CM Hong
Heuristic pattern correction scheme using adaptively trained generalized regression neural networks
T Hoya and JA Chambers
A multiexpert framework for character recognition: A novel application of Clifford networks
AFR Rahman, WGJ Howells and MC Fairhurst
Experiments on the application of IOHMMs to model financial returns series
Y Bengio, VP Lauzon and R Ducharme
Nonlinear blind source separation using a radial basis function network
Y Tan, J Wang and JM Zurada
New recursive-least-squares algorithms for nonlinear active control of sound and vibration using neural networks
M Bouchard
Fuzzy neural network with general parameter adaptation for modeling of nonlinear time-series
DF Akhmetov, Y Dote and SJ Ovaska
New model of self-organizing neural networks and its application in data projection
MC Su and HT Chang
Stability of asymmetric Hopfield networks
TP Chen and SI Amari
Comparison of two different PNN training approaches for satellite cloud data classification
B Tian and MR Azimi Sadjadi
An optimization-based design procedure for asymmetric bidirectional associative memories
J Park, CH Kwon and D Park
Nonlinear magnetic storage channel equalization using minimal resource allocation network (MRAN)
JP Deng, N Sundararajan and P Saratchandran
On the use of separable volterra networks to model discrete-time volterra systems
KM Adeney and MJ Korenberg

Vol. 12 No. 2
Articles
An introduction to kernel-based learning algorithms
KR Muller, S Mika, G Ratsch, K Tsuda and B Scholkopf
Independent component analysis using POTS models
JM Wu and SJ Chiu
STRIP – A strip-based neural-network growth algorithm for learning multiple-valued functions
A Ngom, I Stojmenovic and V Milutinovic
Regularization networks: Fast weight calculation via Kalman filtering
G DeNicolao and G FerrariTrecate
A net with complex weights
B Igelnik, M TabibAzar and SR LeClair
Divide-and-conquer learning and modular perceptron networks
HC Fu, YP Lee, CC Chiang and HT Pao
On-line learning control by association and reinforcement
J Si and YT Wang
A new methodology of extraction, optimization and application of crisp and fuzzy logical rules
W Duch, R Adamczak and K Grabczewski
Block-based neural networks
SW Moon and SG Kong
A comparison between HMLP and HRBF for attitude control
L Fortuna, G Muscato and XibiliaMG
Design and analysis of maximum Hopfield networks
G GalanMarin and J MunozPerez
The convergence properties of a clipped Hopfield network and its application in the design of keystream generator
CK Chan and LM Cheng
Global exponential stability of neural networks with globally Lipschitz continuous activations and its application to linear variational inequality problem
XB Liang and J Si
Nonlinear measures: A new approach to exponential stability analysis for Hopfield-type neural networks
H Qiao, J Peng and ZB Xu
K-winner machines for pattern classification
S Ridella, S Rovetta and R Zunino
Forward- and backpropagation in a silicon dendrite
C Rasche and RJ Douglas
Texture segmentation using Gaussian-Markov random fields and neural oscillator networks
E Cesmeli and DL Wang
Self-organizing mixture networks for probability density estimation
HJ Yin and NM Allinson
Some new results on system identification with dynamic neural networks
W Yu and XO Li

https://doi.org/10.1017/S0269888901000121 Published online by Cambridge University Press

A novel continuous-time neural network for realizing associative memory
Q Tao, TJ Fang and QiaoH
A fast feedforward training algorithm using a modified form of the standard backpropagation algorithm
S Abid, F Fnaiech and M Najim
Feedforward networks training speed enhancement by optimal initialization of the synaptic coefficients
JYF Yam and TWS Chow
Nonlinear model structure detection using optimum experimental design and orthogonal least squares
X Hong and CJ Harris
Improving the capacity of complex-valued neural networks with a modified gradient descent learning rule
DL Lee

IEEE Transactions on Pattern Analysis and Machine Intelligence

Vol. 23 No. 1
Articles
Untitled
R Chellappa
A new method for mining regression classes in large data sets
Y Leung, JH Ma and WX Zhang
A unified model for probabilistic principal surfaces
K Chang and J Ghosh
A fast and accurate face detector based on neural networks
R Feraud, OJ Bernier, JE Viallet and M Collobert
Resolving motion correspondence for densely moving points
VeenmanCJ, MJT Reinders and E Backer
Threading fundamental matrices
AvidanS and A Shashua
ROR: Rejection of outliers by rotations
A Adam, E Rivlin and I Shimshoni
Unsupervised multiresolution segmentation for images with low depth of field
JZ Wang, J Li, RM Gray and G Wiederhold
Vol. 23 No. 2
Articles
Recognizing action units for facial expression analysis
YI Tian, T Kanade and JF Cohn
Model-based recognition of 3D objects from single images
I Weiss and M Ray
The quotient image: Class-based re-rendering and recognition with varying illuminations
A Shashua and T RiklinRaviv
Efficient linear solution of exterior orientation
PD Fiore
The role of holistic paradigms in handwritten word recognition
S Madhvanath, V Govindaraju
Robust point correspondence applied to two and three-dimensional image registration
E Guest, E Berry, RA Baldock, M Fidrich and MA Smith
Self-organization of pulse-coupled oscillators with application to clustering
MBH Rhouma and H Frigui
Generality-based conceptual clustering with probabilistic concepts
L Talavera and J Bejar
Encoding visual information using anisotropic transformations
G Boccignone, M Ferraro and T Caelli
Two-way ambiguity in 2D projective reconstruction from three uncalibrated 1D images
L Quan
Empirical Bayesian motion segmentation
N Vasconcelos and A Lippman
Correspondence with cumulative similarity transforms
T Darrell and M Covell
PCA versus LDA
AM Martinez and AC Kak
First-order tree-type dependence between variables and classification performance
S Raudys and A Saudargiene
Vol. 23 No. 3
Articles
Empirical performance evaluation methodology and its application to page segmentation algorithms
S Mao and T Kanungo
The recognition of human movement using temporal templates
AF Bobick and JW Davis
Acquisition and propagation of spatial constraints based on qualitative information
T Sogo, H Ishiguro and T Ishida
Omnistereo: Panoramic stereo imaging
S Peleg, BenEzraM and Y Pritch
Image editing in the contour domain
JH Elder and RM Goldberg
An integrated Bayesian approach to layer extraction from image sequences
PHS Torr, R Szeliski and P Anandan
Robust segmentation of primitives from range data in the presence of geometric degeneracy
D Marshall, G Lukacs and R Martin
Structure extraction from decorated characters using multiscale images
S Omachi, M Inoue and H Aso
Equivalence of different methods for slant and skew corrections in word recognition applications
P Slavik and V Govindaraju
Video segmentation by MAP labeling of watershed segments
I Patras, EA Hendriks and RL Lagendijk
Vol. 23 No. 4
Articles
Gauss-Markov measure field models for low-level vision
JL Marroquin, FA Velasco, M Rivera and M Nakamura
Example-based object detection in images by components
A Mohan, C Papageorgiou and T Poggio
Information theoretic measure for visual target distinctness
JA Garcia, J Fdez Valdivia, XR Fdez Vidal and R Rodriguez Sanchez
Affine-invariant recognition of gray-scale characters using global affine transformation correlation
T Wakahara, Y Kimura and A Tomono
Mutual information theory for adaptive mixture models
ZR Yang and M Zwolinski
Olfactory classification via interpoint distance analysis
CE Priebe
Marginal maximum entropy partitioning yields asymptotically consistent probability density functions
T Chau
Minimal projective reconstruction including missing data
F Kahl, A Heyden and L Quan
Probability models for clutter in natural images
Grenander U and A Srivastava

https://doi.org/10.1017/S0269888901000121 Published online by Cambridge University Press

IEEE Transactions on Robotics and Automation

Vol. 16 No. 6
Articles
Rigid 6 x 6 parallel platform for precision 3-D micromanipulation: Theory and design application
VT Portman, BZ Sandler and E Zahavi
The kinematic decoupling of parallel manipulators using joint-sensor data
L Baron and J Angeles
Hands for dexterous manipulation and robust grasping: A difficult road toward simplicity
A Bicchi
Grasp analysis as linear matrix inequality problems
L Han, JC Trinkle and ZX Li
A stiffness-based quality measure for compliant grasps and fixtures
Q Lin, JW Burdick and E Rimon
Fault detection for robot manipulators with parametric uncertainty: A prediction-error-based approach
WE Dixon, ID Walker, DM Dawson and JP Hartranft
Global minimization of the robot base reaction force during 3-D maneuvers
WR Doggett, WC Messner and JN Juang
Guaranteed stability of haptic systems with nonlinear virtual environments
BE Miller, JE Colgate and RA Freeman
The online solution of the hand-eye problem
J Angeles, G Soucy and FP Ferrie
Multiple camera model-based 3-D visual servo
J Stavnitzky and D Capson
Triangulation-based fusion of sonar data with application in robot pose tracking
O Wijk and HI Christensen
Lidar design, use, and calibration concepts for correct environmental detection
MD Adams
Quantitative analysis of human tactile illusory characteristic under visual environment and a haptic device of two-dimensional curved surface
JL Wu and S Kawamura
Acquiring robust, force-based assembly skills from human demonstration
M Skubic and RA Volz
Manufacturing feature recognition from solid models: A status report
JH Han, M Pratt and WC Regli
A geometric method for computation of datum reference frames
JBB Gou, YXX Chu, ZHH Xiong and ZXX Li
Automata-based modeling and control synthesis for manufacturing workcells with part-routing flexibility
A RamirezSerrano, C Sriskandarajah and B Benhabib
Multiprocessor task scheduling to minimize the maximum tardiness and the total completion time
XQ Cai, CY Lee and TL Wong
Robotic melon harvesting
Y Edan, D Rogozin, T Flash and GE Miles
Spherical rolling robot: A design and motion planning studies
S Bhattacharya and SK Agrawal
An optimum design for 3-D fixture synthesis in a point set domain
MY Wang
Analytic nonlinear H-infinity inverse-optimal control for Euler-Lagrange system
J Park and WK Chung
On the structure of minimum effort solutions with application to kinematic redundancy resolution
IA Gravagne and ID Walker
Iterative regulation of an electrically driven flexible-joint robot with model uncertainty
A Ailon, R Lozano and MI Gil
Tracking control of uncertain dynamic nonholonomic system and its application to wheeled mobile robots
WJ Dong, W Huo, SK Tso and WL Xu
A slow manifold approach for the control of mobile robots not satisfying the kinematic constraints
I Motte and G Campion
A fast growth distance algorithm for incremental motions
CJ Ong, E Huang and SM Hong
Vision-based navigation and environmental representations with an omnidirectional camera
J Gaspar, N Winters and J SantosVictor
Vol. 17 No. 1
Articles
Visual servoing by partitioning degrees of freedom
PY Oh and PK Allen
Cue integration for visual servoing
D Kragic and HI Christensen
Model-based tracking of complex articulated objects
K Nickels and S Hutchinson
Correction of dead-reckoning errors in map building for mobile robots
M Golfarelli, D Maio and S Rizzi
Design and control of the nonholonomic manipulator
Y Nakamura, W Chung and OJ Sordalen
Scheduling no-wait production with time windows and flexible processing times
F Chauvet, JM Proth and Y Wardi
A macro-level scheduling method using Lagrangian relaxation
Y Zhang, PB Luh, K Narimatsu, T Moriya, T Shimada and L Fang
Accurate mobile robot dead-reckoning with a precision-calibrated fiber-optic gyroscope
H Chung, L Ojeda and J Borenstein
Near-time-optimal trajectory planning for wheeled mobile robots with translational and rotational sections
JS Choi and BK Kim
3-D position sensing using the differences in the time-of-flights from a wave source to various receivers
A Mahajan and M Walworth
A new method for estimating parameters of a dynamic robot model
MM Olsen and HG Petersen
Development of partial model-based torque control of AC induction motors
D Sun and JK Mills

International Journal of Computer Vision

Vol. 40 No. 3
Articles
Untitled
O Faugheras
A level set model for image classification
C Samson, L BlancFeraud, G Aubert and J Zerubia
The geometry and matching of lines and curves over multiple views
C Schmid and A Zisserman
Numerically invariant signature curves
M Boutin

International Journal of Intelligent Systems

Vol. 16 No. 2
Articles
Rough sets in hybrid methods for pattern recognition
KA Cyran and A Mrozek
A regression methodology to induce a fuzzy model
M Delgado, AFG Skarmeta and LJ Linares
Measuring the quality of queries in the fuzzy relational databases
NC Hsien, DA Chiang and RCT Chiang
Allowing two moves in succession increases the game's bias: A theorem
V Kreinovich
Web traffic demand forecasting using wavelet-based multiscale decomposition
A Aussem and F Murtagh
Sequencing via explanation-based learning
H Tianfield
Vol. 16 No. 3
Articles
Special issue on verification and validation issues in databases, knowledge-based systems, and ontologies
D O'Leary
An extendible language for database schema refinement transformations
D Castelli and S Pisani
Optimizing fragment constraints – A performance evaluation
H Ibrahim, WA Gray and NJ Fiddian
An integrity constraint for database systems containing embedded static neural networks
I Millns and B Eaglestone
Checking depth-limited consistency and inconsistency in knowledge-based systems
L Brisoux, E Gregoire and L Sais
Toward logical analysis of tabular rule-based systems
A Ligeza
Verification of multiple agent knowledge-based systems
DE O'Leary
The role of ontologies in the verification and validation of knowledge-based systems
TJM BenchCapon
Evaluation of ontologies
A GomezPerez
Functional ontology artifacts: Existent and emergent knowledge
DE O'Leary
Verification, validation, and integrity issues in expert and database systems: Two perspectives
F Coenen, B Eaglestone and M Ridley
Vol. 16 No. 4
Articles
A localized protein-folding problem
SS Chen
A "soft" K-Nearest Neighbor voting scheme
HB Mitchell and PA Schaefer
Fuzzy reasoning based on the extension principle
Y Xu, EE Kerre, D Ruan and ZM Song
Dempster-Shafer belief structures with interval valued focal weights
RR Yager
Aggregation of linguistic labels when semantics is based on antonyms
V Torra
Using contextual analysis for news event detection
W Lam, HML Meng, KL Wong and JCH Yen
On learning discontinuous human control strategies
MC Nechyba and YS Xu
Automating the construction of CBR systems using kernel methods
C Fyfe and JM Corchado

International Journal of Software Engineering and Knowledge Engineering

Vol. 10 No. 6
Articles
An integrated classification-tree methodology for test case generation
TY Chen, PL Poon and TH Tse
An infrastructure for engineering cooperative agents
ST Yuan and ZL Wu
Multi-perspective specification, design and implementation of software components using aspects
J Grundy
Performance analysis of traffic control systems based upon Stochastic Timed Petri Net models
JC Wang, Y Deng and C Jin

Journal of Intelligent & Robotic Systems

Vol. 30 No. 1
Articles
Surgical robotics: An introduction
U Rembold and CR Burghart
A flexible control architecture for mobile robots: An application for a walking robot
RO Atienza and MH Ang
Fuzzy sensor-based motion control among dynamic obstacles for intelligent rigid-link electrically driven arm manipulators
W Wei, JB Mbede and QS Zhang
A two-layer robot controller design using evolutionary algorithms
F Abdessemed and K Benmahammed
Assessing image features for vision-based robot positioning
G Wells and C Torras
Vol. 30 No. 2
Articles
Multiple hypotheses testing method for distributed multisensor systems
HC Shen and XG Wang
Analysis of sensing errors for manufacturing geometric objects from sensed data
TM Sobh, XH Zhu, B Bruderlin and R Mihali
Fuzzy and recurrent neural network motion control among dynamic obstacles for robot manipulators
JB Mbede, W Wei and QS Zhang
Structuring of large-scale complex hybrid systems: from illustrative analysis toward modelization
H Tianfield

Vol. 30 No. 3
Articles
Design and implementation of a low cost multi-fingered robotic hand using a method of blocks
SM Spano and NG Bourbakis
Mobile robot with wide capture active laser sensor and environment definition
JL Lazaro, A Gardel, M Mazo, C Mataix, JC Garcia and R Mateos
Evaluation of a low-cost MEMS accelerometer for distance measurement
G Pang and H Liu

https://doi.org/10.1017/S0269888901000121 Published online by Cambridge University Press

Localization of an autonomous mobile robot based on ultrasonic sensory information
CJ Wu and CC Tsai
Polygonal model fitting
T Kampke and M Strobel

Journal of Intelligent Manufacturing

Vol. 12 No. 1
Articles
Using B-spline neural network to extract fuzzy rules for a centrifugal pump monitoring
KS Wang and B Lei
Dynamic planning model for determining cutting parameters using neural networks in feature-based process planning
J Joo, GR Yi, HB Cho and YS Choi
A multi-agent approach to fixture design
V Subramaniam, AS Kumar and KC Seow
A conceptual approach for the die structure design
DB Tang, DB Li and SQ Zhang
A fuzzy reasoning based diagnosis system for (X)over-bar control charts
HM Hsu and YK Chen
The implementation of quality function deployment based on linguistic data
XX Shen, KC Tan and M Xie
A knowledge base for indexing and retrieving disassembly plans
L Pan and I Zeid

Journal of Symbolic Computation

Vol. 31 Nos. 1–2
Articles
Special issue on Computational Algebra and Number Theory: Proceedings of the Second Magma Conference – Foreword
W Bosma
Factoring polynomials over finite fields: A survey
J Von-zurGathen and D Panario
On the deterministic complexity of factoring polynomials
SH Gao
Some applications of Magma in designs and codes: Oval designs, Hermitian unitals and generalized Reed-Muller codes
JD Key
Constructions in finite geometry using computer algebra systems
GL Ebert
Classical invariants and 2-descent on elliptic curves
JE Cremona
Irregular primes and cyclotomic invariants to 12 million
J Buhler, R Crandall, R Ernvall, T Metsankyla and MA Shokrollahi
Class number relations from a computational point of view
W Bosma and B DeSmit
On computations in Kummer extensions
M Daberkow
Algorithmic methods for finitely generated Abelian groups
H Cohen, FDY Diaz and M Olivier
Computing the subgroups of a permutation group
JJ Cannon, BC Cox and DF Holt
Determination of socle series using the condensation method
K Lux and M Wiegelmann
Computing double cosets in soluble groups
MC Slattery
Computing in the monster
S Norton
A new existence proof for Ly, the sporadic simple group of R. Lyons
HW Gollan
Embeddings of PSL(2,41) and PSL(2,49) in E-8(C)
RL Griess and AJE Ryba
Calculating group cohomology: Tests for completion
JF Carlson
A new approach to primary decomposition
A Sausse
An optimal algorithm for constructing the reduced Grobner basis of binomial ideals, and applications to commutative semigroups
U Koppenhagen and EW Mayr
Vol. 31 No. 3
Articles
Unification of concept terms in description logics
F Baader and P Narendran
Counting and Grobner bases
K Kalorkoti
Sylvester-Habicht sequences and fast Cauchy index computation
T Lickteig and MF Roy
Implicitization of a general union of parametric varieties
F Orecchia
Vol. 31 No. 4
Articles
An implicitization algorithm for rational surfaces with no base points
F Aries and R Senoussi
Decomposition plans for geometric constraint systems, part I: Performance measures for CAD
CM Hoffman, A Lomonosov and M Sitharam
Decomposition plans for geometric constraint problems, part II: New algorithms
CM Hoffman, A Lomonosov and M Sitharam
Matrix generators for exceptional groups of Lie type
RB Howlett, LJ Rylands and DE Taylor
A generalized sylvester identity and fraction-free random Gaussian elimination
T Mulders
Parallelization of perturbation analysis: Application to large-scale engineering problems
R Khanin and M Cartmell
A parser for the interval evaluation of analytical functions and its application to engineering problems
JP Merlet

Knowledge-Based Systems

Vol. 14 Nos. 1–2
Special Issue
Editorial introduction to IUI2000SI
D Riecken, D Benyon and H Lieberman
Presenting through performing: on the use of multiple lifelike characters in knowledge-based presentation systems
E Andre and T Rist
Extending software through metaphors and metonymies
SDJ Barbosa and CS deSouza

https://doi.org/10.1017/S0269888901000121 Published online by Cambridge University Press

Using citations to facilitate precise indexing and automatic index creation in collections of research papers
S Bradshaw and K Hammond
Information access in context
J Budzik, KJ Hammond and L Birnbaum
More than just a pretty face: conversational protocols and the affordances of embodiment
J Cassell, T Bickmore, L Campbell, H Vilhjalmsson and H Yan
Enhancing data exploration with a branching history of user operations
M Derthick and SF Roth
When actions have consequences: empirically based decision making for intelligent user interfaces
A Jameson, B GrossmannHutter, L March, R Rummer, T Bohnenberger and F Wittig
Mapping communicative goals into conceptual tasks to generate graphics in discourse
S Kerpedjiev and SF Roth
An architecture for developing attentive information systems
PP Maglio, CS Campbell, R Barrett and T Selker
Capturing perceptual expertise: a sound equalization expert system
D Reed

Kybernetes

Vol. 30 Nos. 1–2
Articles
Contemporary systems and cybernetics
BH Rudall
Internet commentary
AM Andrew
The genicAgent: a hybrid approach for multi-agent problem solving
EA Saci and Y Cherruault
A VLSI systolic implementation of the Hopfield and back-propagation neural algorithms
S Ghanemi and BAY Mohamed
Alternative theory to Robinson's arousability theory – Alternative explanation of sex-related differences
U Fidelman
The stockmarket course of the near future: cybernetic probing of investor obsession
ND Diamantides
Modified water
AM Andrew
Fuzzy monotone functions and applications
ET Lee and TS Chou
Supercomputers of the future
HA Montgomery
The physical representation of semantic space
B James
ModelMaker
A Adamatzky
Contemporary systems and cybernetics
BH Rudall
Internet commentary
AM Andrew
Intelligent agent behavior based on organizational image theory
DG Schwartz and D Te'eni
Information granulation and signal quantization
W Pedrycz and A Gacek
New tests with a multipurpose parallel genetic hybrid algorithm
R Ostermark
Lifemanship and AI
AM Andrew
A weakly stable method for linear integral equations of the first kind
A Khefif
Africa and the emerging world system – unity, diversity, humanity
HG Nelson

Machine Learning

Vol. 42 No. 3
Articles
Robust classification for imprecise environments
F Provost and T Fawcett
A learning generalization bound with an application to sparse-representation classifiers
Y Gat
On the convergence of temporal-difference learning with linear function approximation
V Tadic
The effect of instance-space partition on significance
JP Bradford and CE Brodley
Soft margins for AdaBoost
G Ratsch, T Onoda and KR Muller

Vol. 43 Nos. 1–2
Articles
Special issue on inductive logic programming
L DeRaedt, CD Page and S Wrobel
Relational reinforcement learning
S Dzeroski, L DeRaedt and K Driessens
Relational instance-based learning with lists and terms
T Horvath, S Wrobel and U Bohnebeck
The effect of relational background knowledge on learning of protein three-dimensional fold signatures
M Turcotte, SH Muggleton and MJE Sternberg
Relational learning with statistical predicate invention: Better models for hypertext
M Craven and S Slattery
Unsupervised learning of word segmentation rules with genetic algorithms and inductive logic programming
D Kazakov and S Manandhar

New Generation Computing

Vol. 19 No. 1
Articles
Facts, arguments, annotations and reasoning
DV Carbogim and FSC Da Silva
Blackboard relations in the mu Log coordination model
JM Jacquet and K DeBosschere
Preference queries in deductive databases
K Govindarajan, B Jayaraman and S Mantha
Temporal disjunctive logic programming
M Gergatsoulis, P Rondogiannis and T Panayiotopoulos

https://doi.org/10.1017/S0269888901000121 Published online by Cambridge University Press
