SHOBHANA L. CHELLIAH
A Grammar of Meithei

1997. 24 x 17 cm. XXV, 539 pages.
Cloth approx. US$ 218.00
• ISBN 3-11-014321-6
Mouton Grammar Library 17

This is the first comprehensive reference work on Meithei, a little-known yet important Tibeto-Burman language spoken in Manipur State in Northeastern India. Within an easily accessible generative framework, the author accounts for the phonology and morphology (phonemic contrasts, tone, the interaction of phonology and morphology, a word syntax for the description of the agglutinative morphology of Meithei) and syntax (the structure of root sentences, nominalization and other dependent clauses, case marking, the marking of grammatical relations) of Meithei. The interaction of phonology and morphology is described in terms of the theory of Lexical Morphology and Phonology.

(Topics in English Linguistics 21)

In this study the author discusses various theories that have been put forward to account for the choice between the present perfect and the preterite in expressions of past time in English. The distribution between the two verb forms is examined in a varied corpus consisting of more than 13,000 recorded verb forms. The analysis is supplemented by elicitation tests carried out with British and American informants.

Intonation

Second Edition

Alan Cruttenden

When published in 1986, this book was the first to survey intonation in all its aspects, both in English and universally. In this updated edition, while the basic descriptive facts of the form and use of intonation are presented in the British nuclear tone tradition, there is nevertheless extensive comparison with other theoretical frameworks, in particular with the ToBI framework, which has become widespread in the United States. The author has expanded the sections on historical background, different theoretical approaches and sociolinguistic variation.

Linguistic Anthropology

Alessandro Duranti

Alessandro Duranti introduces linguistic anthropology as an interdisciplinary field that studies language as a cultural resource and speaking as a cultural practice. The theories and methods of linguistic anthropology are introduced through a discussion of linguistic diversity, grammar in use, the role of speaking in social interaction, the organization and meaning of conversational structures, and the notion of participation as a unit of analysis.

The Grammar of Meaning

Normativity and Semantic Discourse

Mark Norris Lance and John O'Leary-Hawthorne

What is the function of concepts pertaining to meaning in sociolinguistic practice? In this study, the authors argue that we can approach a satisfactory answer by displacing the standard picture of meaning talk as a sort of description with picture that takes seriously the similarity between meaning talk and various types of normative injunction.

The Cambridge Encyclopedia of the English Language

David Crystal

"...contains a monstrous amount of information on a fascinating topic arranged in a clear, concise, and, above all, entertaining manner—a dangerous combination indeed, and one that can only lead to uncontrollable reading binges lasting hours or perhaps days."

—Quill & Quire

This celebrated book offers a unique experience of the English language in all its richness and diversity. Clear and accessible, it abounds with insights into how the language evolved and how it works. Superbly illustrated in color throughout, and updated for this first paperback edition, *The Cambridge Encyclopedia of the English Language* is the most comprehensive general reference book on the history, structure, and worldwide use of English ever written.

OF CAMBRIDGE

English as a Global Language

David Crystal

David Crystal, world authority on the English language, has written a timely and informative account of the phenomenon of English as a global language. It includes a historical summary of the global facts and figures, of the current spread and status of English as a first or second language internationally; and an informed assessment of the future of English. The book answers three basic questions: What makes a world language? Why is English the leading candidate? and why it will continue to hold that position. It steers even-handedly through the minefield of political debate about the cultural hegemony of English.

Syntax

Structure, Meaning, and Function

Robert D. Van Valin, Jr. and Randy J. LaPolla

This book is an introduction to syntactic theory and analysis which can be used for both introductory and advanced courses in theoretical syntax. Offering an alternative to the standard generative view of the subject, it deals with the major issues in syntax with which all theories are concerned. It presents syntactic phenomena from a wide range of languages and introduces students to the major typological issues that syntactic theories must address. A generous number of exercises is included, which provide practice with the concepts introduced in the text and in addition expose the student to in-depth analysis of data from many languages. Each chapter contains suggestions for further reading which encompass work from many theoretical perspectives.

Color Categories in Thought and Language

C.L. Hardin and Luisa Maffi, Editors

Twenty-five years ago, Berlin and Kay argued that there are commonalities of basic color term use that extend across languages and cultures, and probably express universal features of perception and cognition. In this volume, a distinguished team of contributors from visual science, psychology, linguistics and anthropology examine how these claims have fared in the light of current knowledge, surveying key ideas, results and techniques from the study of human color vision as well as field methods and theoretical interpretations drawn from linguistic anthropology.

Grammatical Relations
A functionalist perspective
T. GIVÓN *(University of Oregon)* (ed.)

Building on Keenan's pioneering work on subject properties (1975, 1976), this work presents a functional perspective on grammatical relations without neglecting their structural correlates.

The Phonology of Coronals
T. ALAN HALL *(Zentrum für Allgemeine Sprachwissenschaft, Berlin)*

Investigates the phonological behavior of coronal consonants, i.e. sounds produced with the tip or blade of the tongue. The analysis draws on data from over 120 languages and dialects. A definition of coronality is proposed that rejects the current view holding that palatals are positively marked for this feature.

Rightward Movement
DOROTHEE BEERMAN, DAVID LEBLANC and HENK VAN RIEMSDIJK *(University of Tilburg) (eds.)*

Examines an idea which has gained considerable prominence in recent syntactic work, in particular Noam Chomsky's 'Minimalist Program' and Richard Kayne's 'Antisymmetry' proposal, that rightward movement does not exist thus explaining certain vexing differences between rightward and leftward movement.

Scope and Specificity
FEN-HSI LIU *(University of Arizona)*

Because most studies of quantifier scope are only concerned with the behavior of a small number of quantifiers, e.g. 'every', 'some', 'all'. the generalizations made on the basis of these quantifiers often do not hold when a wider range of quantifiers is considered. The work presents a picture of quantifier scope much different from what has been assumed in the literature.

Territory of Information
AKIO KAMIO *(Dokkyo University, Soka, Japan)*

Territory of Information attempts to demonstrate the key function of the concept of territory in the informational structure and syntax of natural language. arguing that the concept of territory plays a major role in the evidentiality of a number of languages and in the linguistic structure of politeness.

INFORMATION FOR CONTRIBUTORS

LANGUAGE, the journal of the Linguistic Society of America, carries technical articles dealing with problems of linguistic science, reviews of recently published linguistic works, and notes of interest to professional linguists.

MANUSCRIPTS for publication and exchange JOURNALS should be sent to the Editor of LANGUAGE (Mark Aronoff, Dept. of Linguistics, SUNY Stony Brook, Stony Brook, NY 11794-4376) BOOKS for review should be sent to the Review Editor (Edwin Battistella, 209 Humanities, Wayne State College, Wayne, NE 68787). Manuscripts of articles and reviews should be submitted in FOUR copies; they will not be returned. Normally at least one author of any article or review article submitted to Language must be a member of the Society.

An abbreviated LSA Style Sheet is provided below. For the complete Style Sheet, see the December LSA Bulletin, the Language web page at http://semlab2.sbs.sunysb.edu/Language/language.html, or write to the editors.

Manuscript form. Manuscripts should be typed double-spaced throughout (including footnotes, quotations, and reference list) on $8\frac{1}{2} \times 11$ inch heavy-weight bond paper (ONE SIDE ONLY), with no less than 1 inch margins on all four sides. Type size should not be smaller than 12 characters per inch. Tables, charts, diagrams, extended quotations, and other passages to be set in smaller type (though not simple rules, examples, or formulae) must each appear on a separate sheet. All pages of the manuscript must be in a single pagination.

Abstract. Each manuscript submitted for publication should be accompanied by an abstract of about 100 words, summarizing the conceptual content of the article. It should be typed on a separate sheet of paper.

Text. Use only single quotation marksvnever double except for quotes within quotes. Use a single straight underscore to indicate *italic type*, a double underscore for SMALL CAPITALS. Use normal capitalization. A letter, word, phrase, or sentence cited as a linguistic example or subject of discussion appears in *italics*vor else in phonetic or phonemic transcription, enclosed in square brackets or in slant lines.

Citations. Brief citations given in the text should take such forms as 'Examples are given in Nichols 1986', 'Bloomfield (1933:264) introduced the term ...', or 'Many coastal languages of the Northwest had sounds intermediate between nasal and voiced oral stops (Kinkade 1985).'

Footnotes. All footnotes must be typed (with double spacing) on a sheet or series of sheets following the main text. They must never appear on the same sheet with the text.

References. Full citation of literature referred to should be given in a bibliography at the end of each article or review, beginning on a separate page with the heading REFERENCES, and arranged alphabetically by surnames of authors. The format should be consistent with the following examples:

Bloomfield, Leonard. 1933. Language. New York: Holt.

Bolinger, Dwight. 1965. The atomization of meaning. Language 41.555–73.
