JOURNAL OF PALEONTOLOGY
A PUBLICATION OF THE Paleontological SOCIETY

Early Jurassic Trigoniida (Bivalvia) from Argentina - Addendum

Javier Echevarría, Susana E. Damborenea, and Miguel O. Manceñido

doi:10.1017/jpa.2021.43, Published by Cambridge University Press, 17 August 2021

Dr. Philippe Bouchet (Muséum National d'Histoire Naturelle, Paris), kindly brought to our attention that the name *Poultoniella* Echevarría, Damborenea and Manceñido, 2021 (p. 1), which we proposed for a genus of trigoniide bivalve (type species *Poultoniella jaworskii* Echevarría, Damborenea and Manceñido, 2021, published online on August 17th, 2021), was preoccupied by *Poultoniella* Cooper, 2021 (p. 157) (type species *Trigonia newcombei* Packard, 1921, p. 30), also a trigoniide bivalve, which was published on May 28th, 2021 according to the information provided by Schweizerbart's web page for Neues Jahrbuch 300/2. Hence, in accordance with ICZN (1999, Arts. 60.1 and 60.3), for the junior homonym, we propose the replacement name *Terrypoultoniella* new name, once again, dedicated to Terence "Terry" P. Poulton, Canadian paleontologist and specialist on fossil Trigoniida. Currently assigned species thus become *Terrypoultoniella jaworskii* (Echevarría, Damborenea and Manceñido, 2021) and *Terrypoultoniella*? *malladae* (Choffat, 1885).
