The authors clarify that the RCT reported in this Psychological Medicine article was a multi-centre RCT shared part of the data/results of another publication "**A randomized controlled trial of a mindfulness-based intervention program for people with schizophrenia: 6-month follow-up"** (Wang et al., 2016). Wang et al.'s (2016) report of the RCT is the results of one single study site (Hong Kong) of the same RCT as the international multi-site trial conducted in Hong Kong, mainland China and Taiwan (Registered at ClinicalTrials.gov; Ref: NCT01667601).
