EMPLOYMENT OPPORTUNITIES

RN INFECTION CONTROL PRACTITIONER - University Community Hospital in Tampa, Florida is seeking a RN Infection Control Practitioner. Responsibilities include surveillance throughout the hospital to identify and investigate nosocomial infections and resolve indicated problems through appropriate channels, coordinate infection prevention activities, and initiate infection control policies and procedures. BSN required with training in epidemiologic principals and infectious diseases. Minimum of 2 years infection control experience and 3 years RN experience. Candidate must be knowledgeable about CDC guidelines, OSHA laws and APIC guidelines. Experience with coordination of hazardous waste management is helpful. University Community is a 400-bed private, not for profit facility. We offer competitive salary, on-site child care and sick child care, health, life and dental insurance, tuition assistance and more! Send resume to: **Kathy Maloy, Recruiter, 3100 East Fletcher Ave., Tampa, FL 33613.**EOE

HOSPITAL EPIDEMIOLOGIST: The Indiana University Medical Center is seeking a BC/BE in Adult or Pediatric Infectious Diseases with formal training or extensive experience in hospital epidemiology at the Indiana University School of Medicine. Responsibilities would include management of the Infection Control Program as well as conduct of high-quality research in hospital epidemiology. Please send CV to Dr. Robert B. Jones, Department of Medicine, EM 435, 545 Barnhill Drive, Indianapolis, IN 462025124.

Edge out infection

with the Skin Saver™—
it shaves hair, not skin.

- Unique "guarded edge," enhanced design prevents razor from touching skin
- Recommended for eliminating small razor cuts and scratches that lead to post-op infection*
- Recommended for minimizing skin trauma
- Recommended for minimizing access to bacteria
- Recommended for greater patient comfort
- Recommended as the safest, most time-saving pre-op hair removal procedure
- Available in trays — individual sterile packages -- bulk non-sterile

Get the Skin Saver™
— the only disposable prep razor with the guarded edge.
Never touches the skin.

PRACTICE SEW-DEFENSE

YOUR LIFE MAY DEPEND ON IT

With AIDS cases escalating, on-the-job self-defense has never been more important. Although the risk of seroconversion is low, to date, 60% of the reported seroconverted healthcare workers had occupational HIV exposure from needlestick injuries.[1] In addition, an estimated 200 healthcare workers die each year from hepatitis B viruses.[2]

IMPROVED TUBEX" INJECTOR SECURELY GRIPS CARTRIDGE

Now, the "HANDS-OFF" Injector, TUBEX, has been improved to provide a more secure grip on the cartridge within the Injector. And it's faster and easier than ever to load. The improved TUBEX Injector still offers the same safety advantages: it puts nurses farther from the needle and cartridge than any other injector system. There's no need to touch, shake, manipulate, or angle the needle or cartridge upon disposal.

For the best self-defense injection system against needlestick injuries, use the TUBEX Injector.. .your life may depend on it.
