RAYMOND WILLIAMS

The distinguished author of *The Country and the City* and *Culture and Society* probes history, literature and sociology to sharpen our understanding of the key terms we use in discussing culture and society. "Aesthetic" and "alienation," "masses" and "materialism," "reactionary" and "romantic"—155 key words in all, defined with the clarity and originality of mind that have made Raymond Williams "an influence outlasting changes in fashion."—E. P. Thompson, *New York Review of Books*

Syntax

by PETER W. CULICOVER

This book serves as an introductory text to syntactic analysis and syntactic theory. It treats a number of the "core" phenomena of English syntax and uses them to illustrate the relationship between description and theory. The approach taken is a strict syntactic one, in that semantic considerations are ignored except insofar as they provide validation for an analysis arrived at on the basis of purely syntactic considerations. Particular emphasis is placed on the interrelationship between constraints on grammars and the learnability of languages.

CONTENTS: Introduction. Basic Notions and Notation. A Basic Rule of English. Questions. Aspects of a Theory of Grammar. Negation. More Transformations. Relative Clauses. Verb Complements I: Infinitival Complements. Verb Complements II: *That* Clauses. Constraints and Language Learnability.

Freudianism

A Marxist Critique

by V. N. VOLOŠINOV

translated by I. R. TITUNIK

edited in collaboration with NEAL H. BRUSS

This long-unobtainable book by an unorthodox Soviet Marxist presents a fundamental analysis and critique of the entire Freudian doctrine, carried out from the standpoint of a Marxist "study of ideologies." Vološinov challenges Freudianism's central concepts of the unconscious, sexuality, and the determinants of psychical life. He claims that Freudianism lacks a consistent and objective methodology, avoids dealing with human life in its social and historical context by misconstruing social forces or social drives in the individual psyche, and ignores the central importance of verbal discourse for an understanding of psychical dynamics. But, for Vološinov, it is language and speech that, with their social and historical essence, provide the bridge between the material basis of a society and the ideological superstructures, and between each man's social being and his individual expression of that being.

An Introduction to Natural Generative Phonology

by JOAN B. HOOPER

In Part I of this new treatise on natural generative phonology, the author presents and explains the formal constraints against phonological abstractness and then compares the new theory to the more abstract, less constrained theories, emphasizing the empirical evidence in favor of constraints and investigating their consequences. Gathering data from a variety of languages, she focuses on the restraints on phonological rules, the prohibition of extrinsic rule order, the nature of underlying lexical representations, and the nature of relations among lexical items. An examination of linguistic change associated with natural generative phonology reveals that rule reordering is not compatible with linguistic change. The second portion of the book discusses substantive constraints on phonological structures and rules, with an emphasis on a universal theory of syllable structure and its diachronic and synchronic implications.

Language and Context

The Acquisition of Pragmatics

by ELIZABETH BATES

From the Preface:

This volume represents a growing effort in psycholinguistics to correct the imbalance of the 1960s and early 1970s and to restore the connections between language and the context in which language is acquired. The book centers on the acquisition of pragmatics, or the use of language in context. For years pragmatics has been viewed as the "soft underbelly" of formal linguistic theory—the border area within which the correct use of language absolutely requires knowledge about the speaker, the listener, and the social and physical setting of an ongoing discourse. Precisely because pragmatics is a difficult area for formal linguistic theory, it is an ideal starting point for an effort to "re-psychologize" the study of child language.

Essentials of Grammar

by DOMENICO PARISI and FRANCESCO ANTINUCCI

translated by ELIZABETH BATES

A Volume in the LANGUAGE, THOUGHT, AND CULTURE Series

From the Introduction:

This book offers a direct and nontechnical introduction to issues in the theory of grammar and the theory of semantics. It will acquaint its readers with a feeling for the nature of semantics as a subject matter and will give them enough training in the technical apparatus and enough exposure to the method of analysis to enable them to begin carrying out semantic analyses of their own.—Charles J. Fillmore

Syntax and Semantics, Volume 7

Notes from the Linguistic Underground

edited by JAMES D. McCAWLEY

A Volume in the SYNTAX AND SEMANTICS Series
series editor: JERROLD M. SADOCK

This volume consists of 24 linguistics papers written between 1960 and 1971 which illustrate the development of transformational grammar in the 1960s and early 1970s, fill many gaps in its documentation, and in many cases, provide detailed analyses that are not duplicated in the above-ground literature. The editor has selected a wide variety of topics in syntax and semantics: the syntax of tense markers and modal auxiliaries, restrictions on the pronoun-antecedent relationship, the meanings of "know" and "forget," reflexive pronouns in expressions such as a "picture of myself," semantic differences between modal auxiliaries and their supposed periphrastic equivalents, and linguistic phenomena that reflect the mind-body distinction. Most of the papers deal with English in relation to transformational grammatical theory, but papers treating Russian, Hungarian, and Dyirbal (Australia) have been included. An exceptional introduction to the volume by James D. McCawley sketches the history of transformational grammar in the 1960s and provides a framework for the papers presented.

Aspects of Chinese Sociolinguistics

Essays by Yuen Ren Chao

Selected and Introduced by Anwar S. Dil. This volume presents twenty-six essays, seven of them previously unpublished, by one of the most distinguished Chinese linguists of our time. They cover over a half-century of the author's pioneering researches on various aspects of the Chinese language, including his field studies of Chinese dialects and his work on the unification and standardization of Chinese. Included is an Author's Postscript, prepared especially for this volume, in which Professor Chao reviews and reflects on his life work. The book concludes with a complete bibliography of his work to date. *Language Science and National Development Series.* $13.50

PUBLICATIONS

of the

Linguistic Society of America

LANGUAGE, the journal of the Linguistic Society of America, carries technical articles dealing with problems of linguistic science, reviews of recently published linguistic works, and notes of interest to professional linguists.

As supplements to LANGUAGE, the Linguistic Society of America issues a series of occasional publications, LANGUAGE MONOGRAPHS. These are included in the subscription price of the journal, but may also be purchased separately. In the LANGUAGE MONOGRAPH series, the Society publishes independently subsidized studies which are too long to appear as articles or are otherwise unsuitable for publication in the journal. The method of application for admission to this series of supplements, and the terms of publication, may be secured from the Secretary of the Society.

SPECIAL PUBLICATIONS in the field of linguistic science are issued by the Society from time to time. These are not included in the subscription price of the journal.

MEETING HANDBOOKS, which contain program listings and abstracts of papers presented at LSA Annual Meetings, 1965 through 1973, may be purchased separately.

A list of publications in print is available from the Secretary of the Society. Current prices for LANGUAGE are as follows: Complete volume 43, $8.00; volume 45 onward, $16.00; single numbers currently in print from volumes 39–44, $3.00; volume 45 onward, $6.00. Reprint editions of volumes 1–42 and 44 of LANGUAGE, Monographs 1–21, 25–26, and Dissertations 1–57 are available from Kraus Reprint Corporation, Route 1, Millwood, N. Y. 10546, and a price list can be obtained from that address.
