Articles

257 **The contribution of interpersonal theory to personality disorder's diagnosis and treatment**
Conor Duggan

266 **Tackling synthetic opioid misuse: an impending crisis**
Karim Dar, Nadine Ahmed & Betsy Thom

In this issue (214–217) authors Robert Hafes and Mason McGlynn reflect on a collaborative drawing group in a mother and baby unit, exploring the clinical value of arts-based interventions in perinatal psychiatry. Grounded in an evolutionary and biopsychosocial theory, the article highlights how creative practice can reduce hierarchy, support emotion regulation and foster relational safety.
