Special Issue on Ramsey Theory

This year marks the 100th anniversary of the birth of Frank Ramsey. In celebration, *Combinatorics, Probability and Computing* is delighted to present this collection of papers by some of the world's leading experts, devoted to the theory that bears his name.

During his all too brief life, Ramsey made important contributions to many fields, as indicated in the short biography included here. Apart from this biography, the articles in this double issue are research papers covering many different aspects of Ramsey theory.

We would like to thank all the authors, and the anonymous referees, for their contributions to this special issue.
