THE NECESSITY OF NATURE

To understand our current world crises, it is essential to study the origins of the systems and institutions we now take for granted. This book takes a novel approach to charting intellectual, scientific and philosophical histories alongside the development of the international legal order by studying the philosophy and theology of the Scientific Revolution and its impact on European natural law, political liberalism and political economy. Starting from analysis of the work of Thomas Hobbes, Robert Boyle and John Locke on natural law, the author incorporates a holistic approach that encompasses global legal matters beyond the foundational matters of treaties and diplomacy. The monograph promotes a sustainable transformation of international law in the context of related philosophy, history and theology. Tackling issues such as nature, money, necessities, human nature, secularism and epistemology, which underlie natural lawyers' thinking, Associate Professor García-Salmones explains their enduring relevance for international legal studies today. This title is also available as Open Access on Cambridge Core.

MÓNICA GARCÍA-SALMONES ROVIRA is Global Law Fellow in the Alvaro d'Ors Global Law Chair, ICS, at the University of Navarre, and a Senior Fellow at the Erik Castrén Institute of International Law, University of Helsinki. She is the author of *The Project of Positivism in International Law* (2013) and co-editor of *Cosmopolitanisms in Enlightenment Europe and Beyond* (2013) and *International Law and Religion* (2017).

CAMBRIDGE STUDIES IN INTERNATIONAL AND COMPARATIVE LAW

Established in 1946, this series produces high quality, reflective and innovative scholarship in the field of public international law. It publishes works on international law that are of a theoretical, historical, cross-disciplinary or doctrinal nature. The series also welcomes books providing insights from private international law, comparative law and transnational studies which inform international legal thought and practice more generally.

The series seeks to publish views from diverse legal traditions and perspectives, and of any geographical origin. In this respect, it invites studies offering regional perspectives on core *problématiques* of international law, and in the same vein, it appreciates contrasts and debates between diverging approaches. Accordingly, books offering new or less orthodox perspectives are very much welcome. Works of a generalist character are greatly valued and the series is also open to studies on specific areas, institutions or problems. Translations of the most outstanding works published in other languages are also considered.

After seventy years, Cambridge Studies in International and Comparative Law sets the standard for international legal scholarship and will continue to define the discipline as it evolves in the years to come.

Series Editors

Larissa van den Herik
Professor of Public International Law, Grotius Centre for International Legal Studies, Leiden University

Jean d'Aspremont
Professor of International Law, University of Manchester and Sciences Po Law School
